CRITERIA NO 1.3.

1.3.1.

The institute integrates cross cutting issues relevant to gender, environment and sustainability, human values, health determinants, Right to Health and emerging demographic issues and Professional Ethics into the curriculum as prescribed by the university / respective regulative councils.

CROSS CUTTING ISSUES :-

The cross cutting issues like gender, Environment sustainability, Human values and Professional Ethics etc find an ample space when it comes to applying them positively into the curriculum. We believe in maintaining a healthy environment for all the students. The curriculum is designed by the college itself does not include many of these aspects.

1) HUMAN VALUES:-

Human values are something which is described & worthy of esteem for their own sake. Human values are which help us to live in harmony with the world. The following courses describe the human values

~~selected~~ selected ~~courses~~ courses

- > Introduction of Effective communication.
- > Anatomy & Physiology.
- > Nutrition & health.
- > Public Health & Hygiene.
- > Common Human diseases.
- > Health awareness.

- management in Pandemics
- management in Natural calamities
- Social welfare of society

Professional Ethics :-

The course describes professionally accepted standards of professional behaviour, values & guides. Principle code of Professional ethics are established by professionals to help guide members in performing their jobs functions according to sound & consistent ethical principles.

- Social Responsibilities
- Medical Environment
- Organisational Behaviour
- Corporate Governance
- Following the Rules & Regulations of Institute
- Laboratory safety & unit measurements
- Behaviour in OPD wards.
- Dress code.

Gender :-

The institute teaches gender issues by providing the skill set necessary for life long learning & provide opportunities for the students to explore subjects or area of interest. It teaches equality in gender & also about action against bias.

- Gender studies
- Equality of gender
- N.S.S activities

Environmental & sustainability:-

This appreciates the ethical cross cultural environmental issues and links between human and nature. This enables the students to learn about the eco system or other environmental factors. They also learn to protect environment and are made aware to global warming & other related issues.

- Community & health & mental health
- Biodiversity
- Environmental studies
- ecosystem
- Population ecology
- Biodiversity & its conservation
- Recycling
