

3.4.4

Institutional social responsibility activities in the neighborhood community in terms of education, environmental issues like swatchBharat, health and hygiene awareness and socioeconomic development issues carried out by the students and staff during the last five years

Impact of Extension Activities In Sensitizing Students to Social Issue & Holistic Development.

- India being developing country faces different health issues. India is riddled with number of environmental concerns like, air pollution, depletion of ground water, lack of waste disposal as well as sewage disposal facilities, lack of safe water supply, open field or open air defecation etc. Lack of health awareness mainly among rural and tribal Indian population contributes to the health related problems which again becomes hurdle in the development of our country.
- The institute, Anantrao Kanase Homoeopathic Medical College & Hospital, located at Alephata, in Pune district of Maharashtra state appointed team of staff to look in to such social and environmental issues and health related issues. The team members comprises of Dr. Soman Sushrut, Dr. Thorat Sandhya, Dr. Patil Snehal, Dr. Awari Sunita, Dr. Jarad Savita and other faculty members. The team works along with students and interns under the guidance of principal of AKHMC & H, Dr. Gholap Kamlesh.
- The institute team tried to collect information about socioeconomic background of our students as well as environmental and health issues in nearby areas. It is observed that majority of students have well socioeconomic background and less concern with social health issues. Even they have less empathy and sympathy towards poor patients. Understanding these aspects has important role in practice.
- In order to tackle these issues, we conducted meeting with the students, in which we decided to visit nearby schools and communities to create health awareness and encourage development of personal hygienic habits among them. Students decided to participate enthusiastically and conducted health awareness activities, health checkup camps in nearby schools and communities. Enlisting few of such activities
 - Demonstration of hand washing method through a song.
 - Awareness about water borne diseases, mosquito borne diseases.
 - Measures to be taken for personal protection against mosquito bites.
 - Menstrual hygiene for adolescent girls etc.
 - Awareness about AIDS.
 - Swachhata Abhiyan.

- As, Swami Vivekananda correctly said, we want “Education by which character is formed, Strength of mind is increased, the intellect is expended and by which one can stand on one’s own feet. “
- To some extent it came true for us. As an impact of these activities students and staff of our college pledged to maintain environmental sanitation by strictly avoiding use of plastic, not throwing garbage anywhere even during travel, no use of pharmacol plates for any function conducted in college like annual social gathering, in addition to it most important to follow healthy life style by avoiding consumption of processed, fast and junk food. Even they planned for E- exhibition on nutrition information, for which nutrition charts are already prepared for display in our hospital.
- After experiencing Socioeconomic standards of adopted villages, near by communities they decided to do clinical practice in future by considering socioeconomic status of patients, minimizing cost of investigations and treatment and to practice judiciously. Our students accepted it as felt need of the society and assured us for such kind of practice.
