

## 7.2.1.

### Describe two Institutional Best Practices as per the NAAC format provided in the manual

1. Developing Homeopathic knowledge through synergic effect.
2. 72 Lessons

#### 1. Developing Homeopathic knowledge through synergic effect.

##### 1.1 Regional Homoeopathic Conference

###### Title of the Practice

Regional Homoeopathic Conference

###### Objectives of the practice

To get & to provide knowledge from best Homoeopaths from our country.

###### The Context

Challenge was to make contact with such persons & to get their willing ness to visit at our Rural area.

###### The Practice

Regional conference was arranged for 3 days on 16<sup>th</sup>, 17<sup>th</sup>, 18<sup>th</sup> of feb-2020& speakers was,

1. Dr. AdilChimthanawala
2. Dr. AmbrishVijaykar
3. Dr. Prasad Rasal
4. Dr. ShaileshDeshpande
5. Dr. Nandini Joshi

###### Evidence of Success

The conference was really successful event, as students from this as well as from nearby colleges getbenefited by the knowledge given by 11renowned speakers.

###### Problems Encountered/resources Required

The homoeopathic pharmacies like JeevanPharmacy, SBL, Backson provides stall for conference

###### Notes

Students from other homoeopathic college participated in **poster as well as model competition** held on these three days

##### 1.2 M.U.H.S. Rankers

###### Title of the Practice

M.U.H.S. Rankers

###### Objectives of the practice

1. Ume Ruman(2017)
2. Kirti Bhor(2021)
3. ChetanaDahake for Malati Allen Nobel award.

###### The Context

To give guidelines to students to get such success.

  
Principal  
Anant Rao Kanase Homoeopathic  
Medical College & Hospital  
Alephata

## **The Practice**

Regular tutorials Extra lectures. Special guidelines.

## **Evidence of Success**

Certificate of MUHS Rank is enclosed.

Photograph of Malati Allen prize distribution is enclosed.

## **Problems Encountered/resources required**

Regular study material given by teachers.

## **Notes**

### **1.3 Student's achievements**

#### **Title of the Practice**

Student's achievements

#### **Objectives of the practice**

- 1.National Webinar Series at Gadha
- 2.Participation in MUHS Indradhanushya
- 3.Participation in Pandharpur Wari
- 4.MUHS Avishkar Competition
5. Nanal Intermedical competition
6. Internship program of National Academy of Homoeopathy
6. State level online street play competition
7. LMI Global Colloquium 2021
8. MUHS essay writing competition on Hahnemann's day 2022

#### **The Context**

- 1.Geetanjali Abhang
- 2.Almaz Shaikh
3. Preeti Sarfare
1. Shrinivas Rathod
2. Divya Lonari
3. Prasad Joshi
1. Pooja Sahane
2. Sheetal Gambhirrao
3. Aishvarya Jadhav
- Yashvant Chinchane
- Yashvant Chinchane
- Yashvant Chinchane
- 1.Shivani Pnnase
- 2.Gitanjali Abhang
- 3.Ikra Khan
- Yashvant Chinchane

Anant Rao Kanase Homoeopathic  
Medical College & Hospital  
Alephata

## **The Practice**

Students participated in National Webinar series on Basics of Homoeopathy

## **Evidence of Success**

Certificates are enclosed

## **Problems Encountered/resources required**

To encourage students for participation

## **Notes**

### **1.4 Teacher's Achievements**

#### **Title of the Practice**

Teacher's Achievements

#### **Objectives of the practice**

11 teachers of the institute have taken admission for M.U.H.S. PhD course at various colleges in year 2021-22

#### **The Context**

To select proper subject for Research work in Rural area & to do research.

#### **The Practice**

Till the end of Dec 22 All 11 teachers had submitted their synopsis & started their research work in their selected topic.

#### **Evidence of Success**

Teachers list is enclosed..

#### **Problems Encountered/resources required**

Resource is patient itself. All teachers started organizing various camps & started collecting patients of their respective subject.

#### **Notes**

Research work is going on.

### **1.5 N.S.S. activities**

#### **Title of the Practice**

N.S.S. activities

#### **Objectives of the practice**

1. Seven Days residential camp was arranged at Kolwadi - 16-7-22 to 22-7-22.
2. Ayush covid 19 prevention activity. 12-2-22 to 26-2-22
3. International women day 8-3-22.
4. Swachhata Pakhawada on 21-3-22 to 4-4-22
5. Poshan Pakhwada-Anaemia 21-3-22 to 4-4-22
- 6 Tree Plantation on 10-6-22
7. Antimalaria month 30-6-22.
8. Breast feeding awareness week 30-8-22.
9. Sevasaptah 17-9-22 to 23-9-22.
10. Rashtriya Poshan Maah. SEPT 22

## 11. NSS DAY

### **The Context**

1. Challenges was to create awareness in peoples about self & environmental cleanliness.
2. To organize residential camps.
3. To make contact with nearby community and to make them health aware.

### **The Practice**

1. Rally for awareness
2. Survey in families related to health issues
3. Free health checkup camp.
4. Blood donation camp, tree plantation, mental health, female health issues were discussed by college teachers.

### **Evidence of Success**

This camp proves very helpful for the peoples in Malwadi .

### **Problems Encountered/resources required**

At present it is Institutional self-finance unit.

NSS nodal officer making contact with Grampanchayat members, Sarpanch, local authorities for organization of NSS programs

### **Notes**

All programs were conducted successfully.

## 1.6 Campus Conducted

### **Title of the Practice**

Campus Conducted

### **Objectives of the practice**

About 15 to 20 camps are conducted every year to give benefit to the nearby community.

### **The Context**

1. To expose the students for Hands on clinics.
2. To give benefits to Nearby community.

### **The Practice**

About 15,20 camps were conducted by Institution. List is enclosed.

### **Evidence of Success**

Event is successful. Few pictures are enclosed.

### **Problems Encountered/resources required**

Grampanchayat members , Sarpanch , local authorities, involved students for organization of local camps.

### **Notes**

Students are getting hands on clinic. Nearby community is getting health checkup benefit which is free of cost.

## 1.7 Distribution of Arsenicum album 30C during Covid 19 pandemic

### Title of the Practice

Distribution of Arsenicum album 30C during Covid 19 pandemic

### Objectives of the practice

To distribute Aesenic 30C in nearby community as per guidelines given by Ayush.

### The Context

To distribute Arsenic 30C in community as a prophylactic against Covid -19

To develop immunity of community against Covid-19

### The Practice

All teachers & students are instructed to distribute Arsenic 30 & asked to prepare its report to principal.

### Evidence of Success

About 10,000 bottles of Arsenic 30C were distributed to various villages, Banks, Police stations etc. Appreciation certificate were collected.

### Problems Encountered/resources required

Activity was conducted during Covid-19 pandemic so to take self-protection, to get PPE kit was major problem in this activity.

### Notes

Program was successful.

## 2. 72 Learning lessons for Interns for clinical examinations.

### 2.1-72 Learning lessons for Interns for clinical examinations

#### Title of the Practice

72 Learning lessons for Interns for clinical examinations.

#### Objectives of the practice

The Institute is running this activity since last 4 years. The objective is to make the Interns skillful in diagnosis at clinical level.

#### The Context

Challenges are to allot the teachers for each group of student & subject for clinical examination.

#### The Practice

Interns are working for various clinical examinations & are submitting it to various teachers. Teachers are not signing their assignment till they are not giving proper answers to teachers.

#### Evidence of Success

Interns become confident in clinical examination & also develop their confidence of actual examination on Patient.

#### Problems Encountered/resources required

Resources required are Intern itself & faculty of institute.

#### Notes

It is very useful & very favorite activity among interns& fourth year students.

  
Principal  
Anantrao Kanase Homoeopathic  
Medical College & Hospital  
Alephata

## 2.2- E-Museum

### **Title of the Practice**

E-Museum

### **Objectives of the practice**

Objective is to expand the knowledge of students related to that subject

### **The Context**

Challenges are related to collect the information which is not given in text-books. So students were instructed to collect it from internet.

### **The Practice**

Different groups of students of all years was prepared by HOD of respective department & was ask to prepare hard copy of e-museum in file & soft copy in pen drive. They are also instructed to add animated videos & live videos of their topics. Activity seems to be innovative among students. All e-museums are preserved in respective departments.

### **Evidence of Success**

Students gained more knowledge regarding their subject with the help of internet facility. They also get more knowledge after observing animated videos of their subjects.

### **Problems Encountered/resources required**

Resource required was to make availability of internet to students & pen drive. Internet is available in e- library as well as in all four classrooms which are ICT based classrooms.

### **Notes**

It is very one of the best innovative activities among students.

## 2.3- Journal Club

### **Title of the Practice**

Journal Club

### **Objectives of the practice**

Objective is to expand the general knowledge of students and Faculty through different Journals.

### **The Context**

Challenges are to order different Journals.

To encourage students to read various journals.

### **The Practice**

Program coordinator selects any one journal form library & encourages different students to read different topics from it. It is followed by question & answer session.

### **Evidence of Success**

Students gained more knowledge regarding their subject with the help of various journals. They also get acquainted with recent research work done & published in the field of medical science thought the world.

*Sujkv.*  
Principal  
Anantrao Kanase Homoeopathic  
Medical College & Hospital  
Alephata

### **Problems Encountered/resources required**

Resources required were to make available various journals in central library. At present our institute has subscribed for 14 different journals & it is available for students for reading.

### **Notes**

Students are getting recent research knowledge in the field of medical science.

## **2.4- Arogya – Jagar Facebook page**

### **Title of the Practice**

Arogya – Jagar Facebook page

### **Objectives of the practice**

To create awareness among lay person on different health issues and promote knowledge on healthy life.

### **The Context**

To promote this page and to reach to all the places where proper medium of knowledge can't be reached

### **The Practice**

Depending upon the occasion health tips are updated on Face book page. Like on event of Navratri teachers talk about different health problems which are face by females.

### **Evidence of Success**

A growth in awareness about health of people increased and people from different field approached for more knowledge about health.

### **Problems Encountered/resources required**

As it is Facebook page people are still not aware about its utility.

### **Notes**

<https://www.facebook.com/groups/259530551915531/>

Link is provided

## **2.5- CPR – Module created by students**

### **Title of the Practice**

CPR – Module created by students

### **Objectives of the practice**

To give knowledge to all the staff and students of our institute about CPR & Basic Life Support

### **The Context**

All the staff and students were taught basic CPR

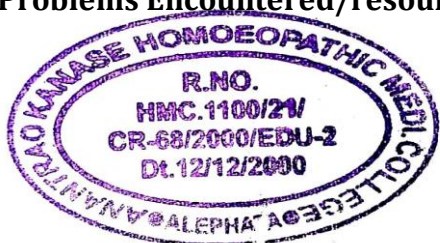

### **The Practice**

Teachers & 4<sup>th</sup> year students are first trained with the activity & they all are instructed to conduct same activity with all students, teaching staff, nonteaching staff & hospital staff.

### **Evidence of Success**

All the staff and students were able to perform CPR as each participant was required to do demonstration of CPR.

### **Problems Encountered/resources required**

  
Principal  
Anant Rao Kanase Homoeopathic  
Medical College & Hospital  
Alephata

Technical issues like unable to open link.

Also while giving online exam class 4 staff found it difficult as exam was in English language

**Notes**

Photos and certificates attached

**2.6- Knee joint pain – Module created by students**

**Title of the Practice**

Knee joint pain – Module created by students

**Objectives of the practice**

To give knowledge to all the staff and students of our institute about Knee Joint pain.

**The Context**

All the staff and students were taught all information regarding Knee joint

**The Practice**

Teachers & 4<sup>th</sup> year students are first trained with the activity & they all are instructed to conduct same activity with all students, teaching staff, nonteaching staff & hospital staff.

**Evidence of Success**

All the staff and students were able to perform knee joint pain module as each participant was required to do demonstration of it.

**Problems Encountered/resources required**

Technical issues & in understanding the concept to nonteaching staff.

**Notes**

Photos and certificates attached.

# आळेफाटा येथे राष्ट्रीय सेवा योजनेचे शिबिर

आळेफाटा, ता. २३ : आळेफाटा (ता. जुन्नर) येथील कुलस्वामी मेडिकल फाउंडेशन संचलित अनंतराव कणसे होमिओपॅथिक मेडिकल कॉलेज व हॉस्पिटलचे कोळवाडी या ठिकाणी राष्ट्रीय सेवा योजना निवासी शिबिर झाले.

या शिबिरात विद्यार्थ्यांनी गावातील ग्रामस्थांची मोफत आरोग्य तपासणी, आरोग्य जनजागृती रॅली, कुटुंब, आरोग्य सर्वेक्षण, स्वच्छता मोहीम, व्याख्यान-महिलांचे आरोग्य व

पथनाट्य, एड्स, रक्तदान व नेत्र तपासणी शिबिर व अवयव दान तसेच वृक्षारोपण यावर व्याख्यान देण्यात आले. या शिबिराला कोळवाडीच्या सरपंच अतिशा कुन्हाडे, ग्रामपंचायत सदस्या ललिता पारवे, अर्चना सहाने, शिवाजी गाढवे, प्रेमलता गाढवे आदी मान्यवर उपस्थित होते.

शिबिर डॉ. स्नेहल पाटील यांच्या मार्गदर्शनाखाली पार पडले. शिबिरात डॉ. निखील कणसे यांनी मानसिक आरोग्य व डॉ. सविता जराड यांनी महिला आरोग्य या विषयावर ग्रामस्थांना मार्गदर्शन केले.

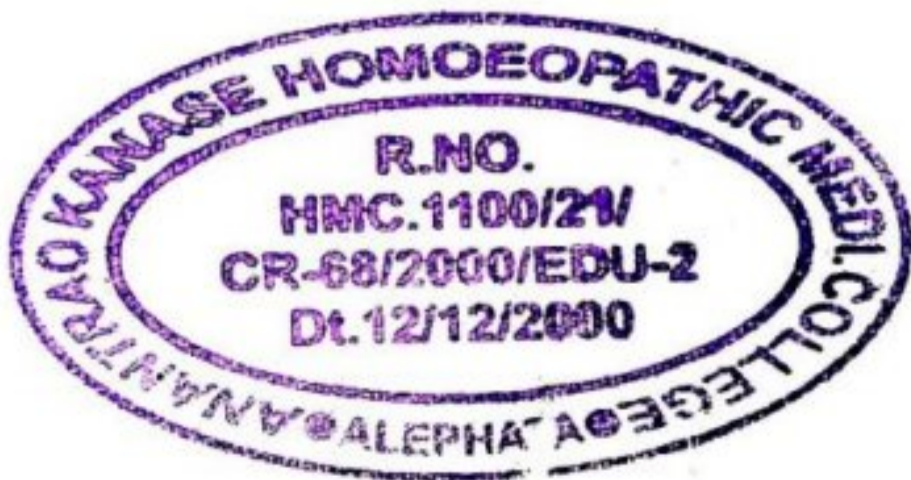

कोळवाडी (ता. जुन्नर) : शिबिरप्रसंगी उपस्थित अनंतराव कणसे होमिओपॅथिक मेडिकल कॉलेजचे विद्यार्थी.

**Extension And Outreach Activities**

**Report**

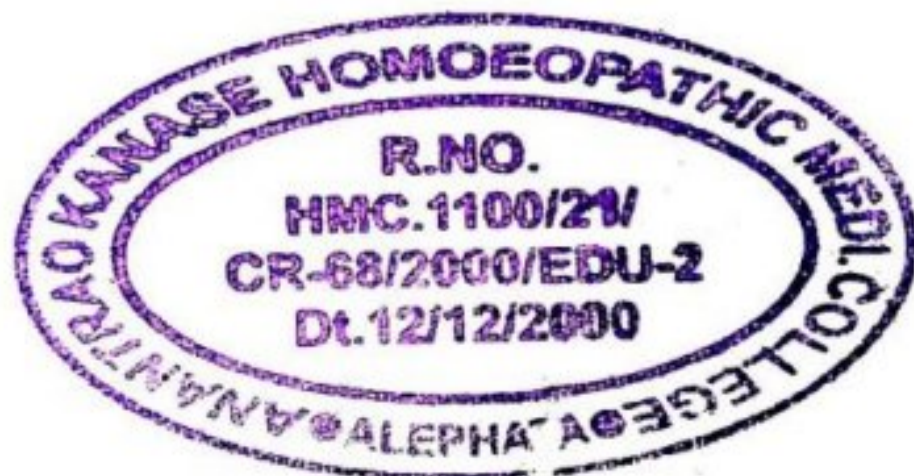

**Distribution of Homoeopathic Prophylactic Medicine - Arsenicum album  
to Nearby Communities for Prevention of COVID - 19**

As a part of extension and outreach activities, in the year 2020, during the pandemic period of COVID - 19, our college distributed the homoeopathic medicine Arsenicum album, which was approved as prophylactic medicine for COVID - 19. This medicine was distributed in 30<sup>th</sup> potency, using globule size 35. All the beneficiaries were asked to take 4 globules at morning with empty stomach, for three consecutive days.

The team of Anantrao Kanase Homoeopathic Medical College and Hospital implemented these activities under guidance of principal, Dr. Gholap kamlesh sir. This team distributed the medicine to the nearby communities. Simultaneously they created awareness regarding COVID - 19. The team members motivated people about use of mask, maintaining social distancing and maintaining hand hygiene.

The team members distributed Arsenicum album at following places

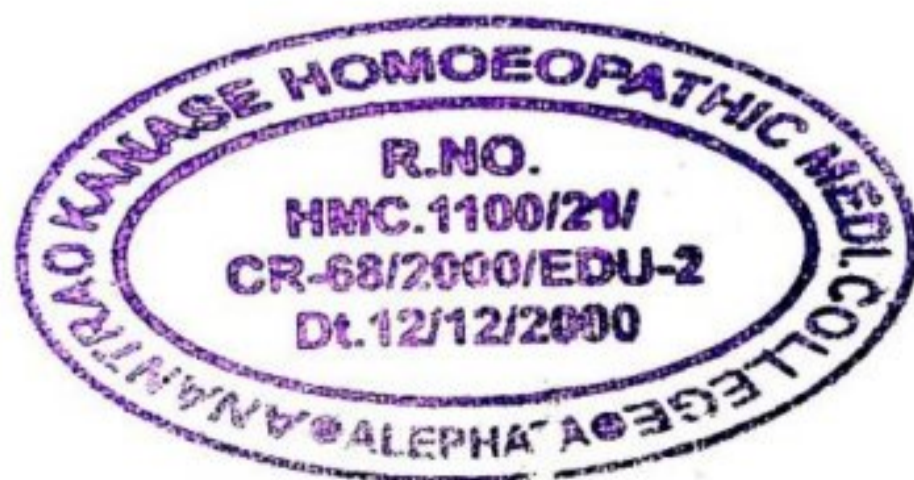

Sr. No.	Date	Place	Homoeopathic Medicine	Quantity
1	14/05/2020	Junnar Nagarparishad, Junnar	Arsenicum album 30C	100 bottles
2	15/05/2020	Jay Bajarang Gramin Bigar Sheti Sahakari Patsanstha, Otur	Arsenicum album 30C	25 bottles
3	15/05/2020	Junnar Nagarparishad, Junnar	Arsenicum album 30C	2000 bottles
4	16/05/2020	H.P. Gas agency, Otur	Arsenicum album 30C	35 bottles

विषय - जनता सहकारी बँक, ओतूर शाखेस अडचणीक अल्बम मिळणेबाबत

वि. वि.

सध्या COVID 19 मुळे निर्माण झालेल्या परिस्थितीत इतर सेवांसोबत बँकिंग सेवा हि सुद्धा अत्यावश्यक आहे.

जनता सहकारी बँक ओतूर शाखा हि ग्राहकांच्या सेवेमध्ये गेल्या ३७ वर्षांपासून कार्यरत आहे. ओतूर शाखा हि जुनी असल्या कारणामुळे येथे ग्राहक वर्ग अधिक प्रमाणात दिसून येतो. शिवाय ग्रामीण भागात COVID 19 चे प्रमाण कमी असल्या कारणामुळे शाखेमध्ये ग्राहकांचा ओघ अधिक प्रमाणात आहे.

सद्य परिस्थिती लक्षात घेता शाखेतील एकूण १६ कर्मचारी वृन्दांकारिता आपल्या संस्थेमार्फत अडचणीक अल्बम मिळावा जेणेकरून आम्ही ग्राहकांना अधिक चांगली व काळजीपूर्वक सुविधा देऊ शकू.

तरी एकूण परिस्थितीचा विचार करून शाखेतील कर्मचाऱ्यांना अडचणीक अल्बमचे कीट मिळावे. हि विनंती, कळावे.

आपला विश्वासू

शाखा व्यवस्थापक ( ओतूर शाखा )

- परिपत्रक -

प्रति  
मा. अध्यक्ष / सचिव / अधिष्ठाता / प्राचार्य,  
विद्यापीठ संलग्नित सर्व महाविद्यालये  
मंत्राविवि, नाशिक.

**विषय :-** विद्यापीठ निर्देश क्र. ०३/२०२० लागू करण्यात आल्याबाबत.

महोदय,

आपणाम विदीतच आहे की, विद्यापीठ संलग्नित महाविद्यालयांमध्ये संबन्धित केंद्रीय परिषद / केंद्र शासन / राज्य शासन / राज्य परिषद / विद्यापीठ ड. यांनी विहित केल्याप्रमाणे आवश्यक शैक्षणिक व भौतिक मांडणीसुविधा, शिक्षकांचे प्रमाण वगैरे आहेत. महाविद्यालयांमध्ये शिक्षकांच्या नियुक्तीकामी विद्यापीठाकडून जाहिरात मसुदा मंजूर करून घेणे आवश्यक आहे. विद्यापीठाच्या विशेष वक्ष विभागाकडून विद्वानांमार्फत नांदवहोती प्राथमिक तपासणी करून जाहिरात मसुदा मंजूर करून दिला जातो.

उपरोक्त विषयाचे अनुषंगाने आपणाम कळविण्यात येते की, विद्यापीठाच्या विशेष वक्ष विभागाच्या कार्यप्रणालीच्या सोयीसाठी दर्शने व सामक्यात सुसूत्रता घेण्याकरिता, "विद्यापीठ संलग्नित महाविद्यालयांमध्ये शिक्षकांच्या नियुक्तीकरिता विद्वानांमार्फत नांदवहोती प्राथमिक तपासणी व त्यानुसार जाहिरात मसुदा मंजूर करून देणे व इतर तत्सम बाबींच्या अनुषंगाने विद्यापीठ निर्देश क्र. ०३/२०२०" लागू करण्यात येत आहे. सदर निर्देश विद्यापीठ संकेतस्थळावर उपलब्ध आहे.

सदर विद्यापीठ निर्देश क्र. ०३/२०२० प्रसिध्दीच्या दिनांकापासून अमलात येईल. सर्व संलग्नित महाविद्यालयांनी सदर बाबींचा नोंद घेऊन आवश्यक ती कार्यवाही करावी.

### 3. RETINA

- 1) This is the thin, delicate, inner layer of the eyeball. It is continuous posteriorly with optic nerve. The outer surface of retina is attached to choroid, while the inner surface is in contact with the hyaloid membrane.
- 2) The retina diminishes in thickness from behind forward and is divided into optic, ciliary and iridial parts. The optic part of the retina contains nervous tissue and is sensitive to light.
- 3) The depressed area of the optic disc is called physiological cup. It contains no rods or cones and is therefore, insensitive to light. It is the physiological blind spot.

a) The rods and cones are the light receptors of the eye. The rods contain a pigment called visual purple. They can respond to light. The periphery of the retina contains only rods, but the fovea has none at all. The cones respond only to bright light and are sensitive to color.

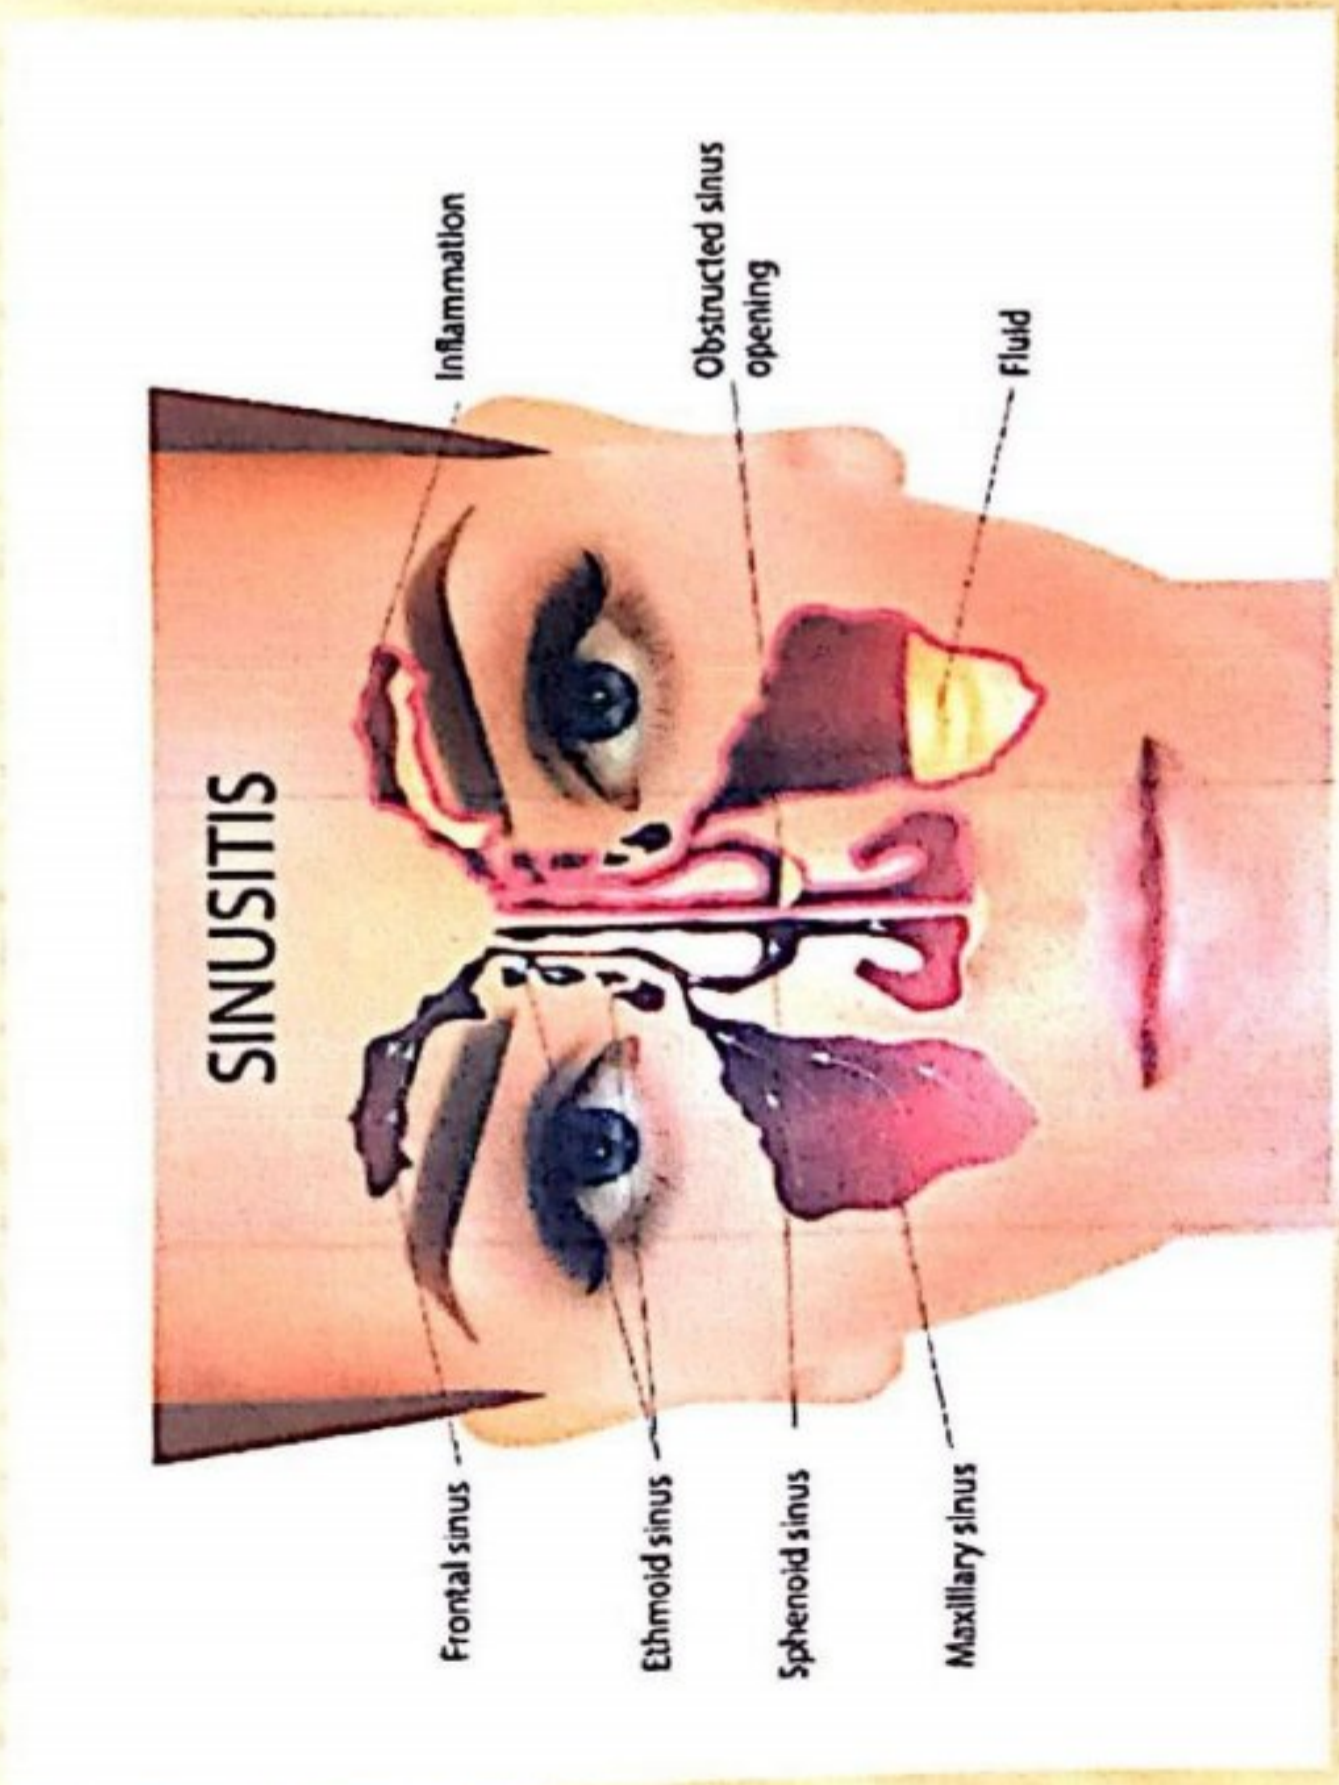

## 2. Sinusitis

Sinusitis, also known as rhinosinusitis, is inflammation of the mucous membranes that line the sinuses resulting in symptoms that may include thick nasal mucus, a plugged nose, and facial pain. Other signs and symptoms may include fever, headaches, a poor sense of smell, sore throat, and cough. It is defined as acute sinusitis if it lasts less than 4 weeks, and as chronic sinusitis if it lasts for more than 12 weeks.

Sinusitis can be caused by infection, allergies, air pollution, or structural problems in the nose. Most cases are caused by a viral infection. Recurrent episodes are more likely in persons with asthma, cystic fibrosis, and poor immune function. Diagnostic imaging is not usually needed unless complications are suspected. In chronic cases, confirmatory testing is recommended by either direct visualization or computed tomography

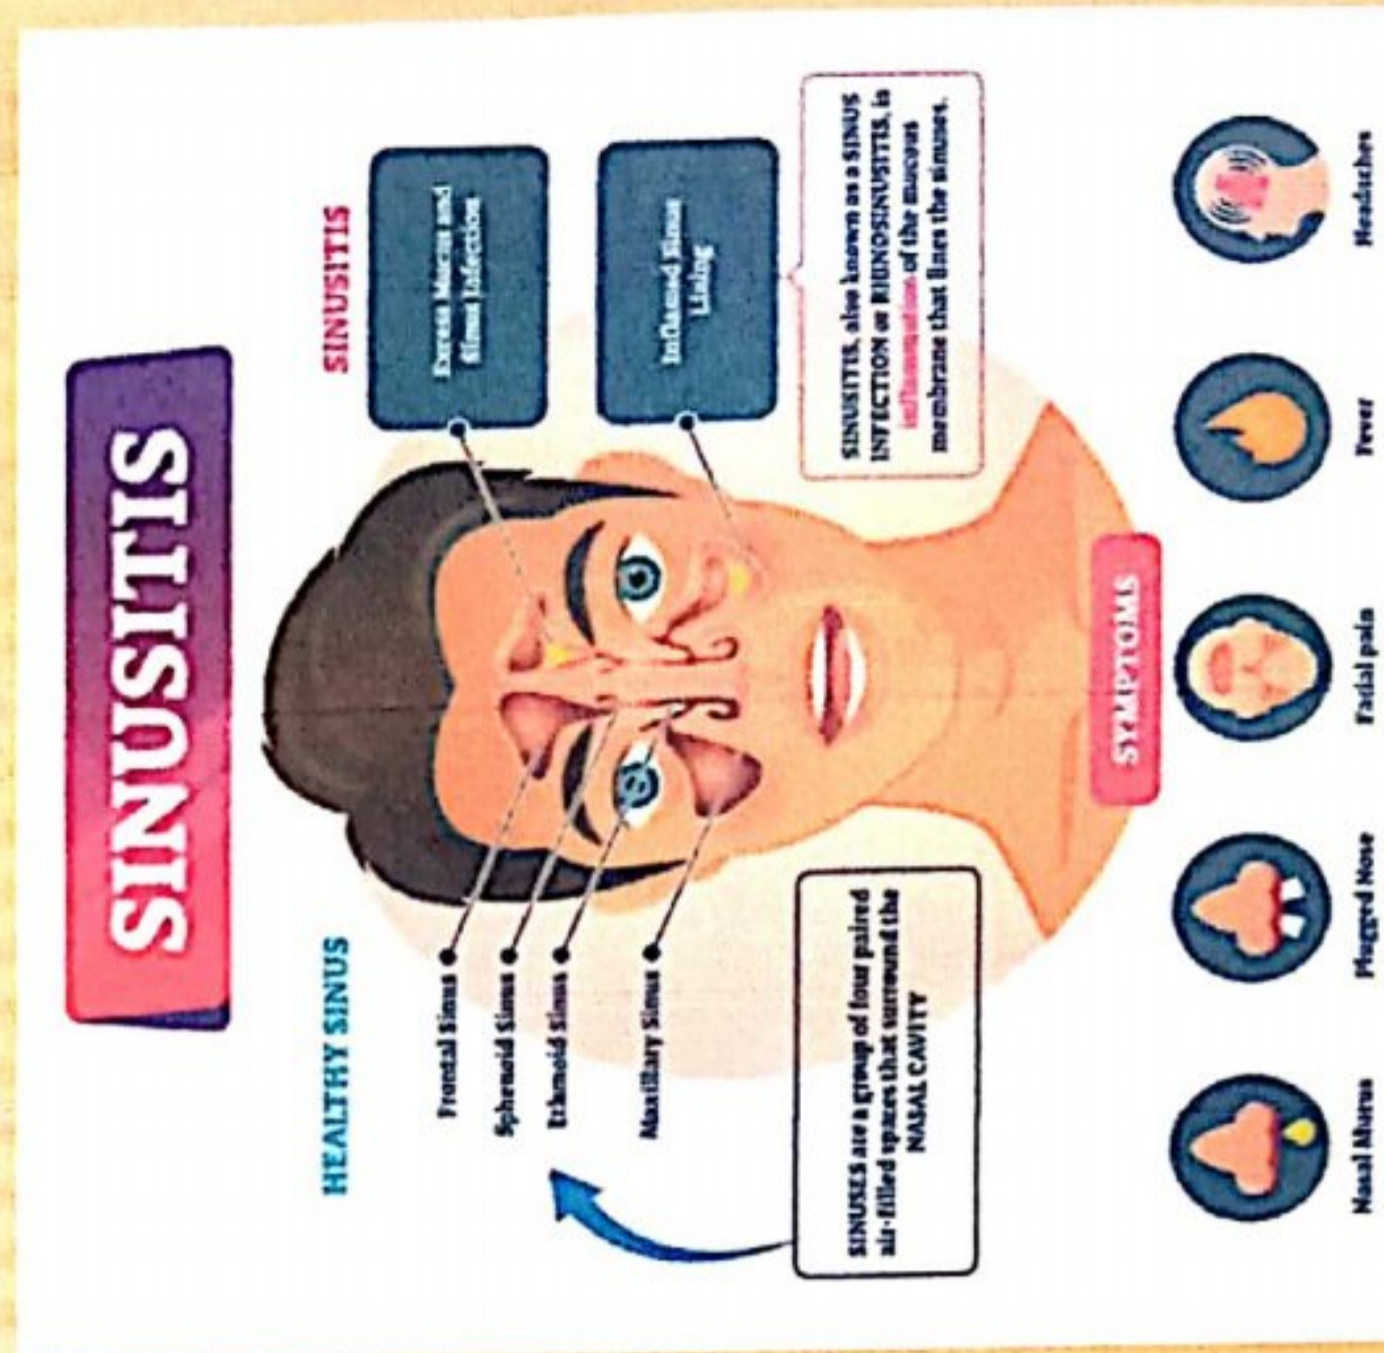

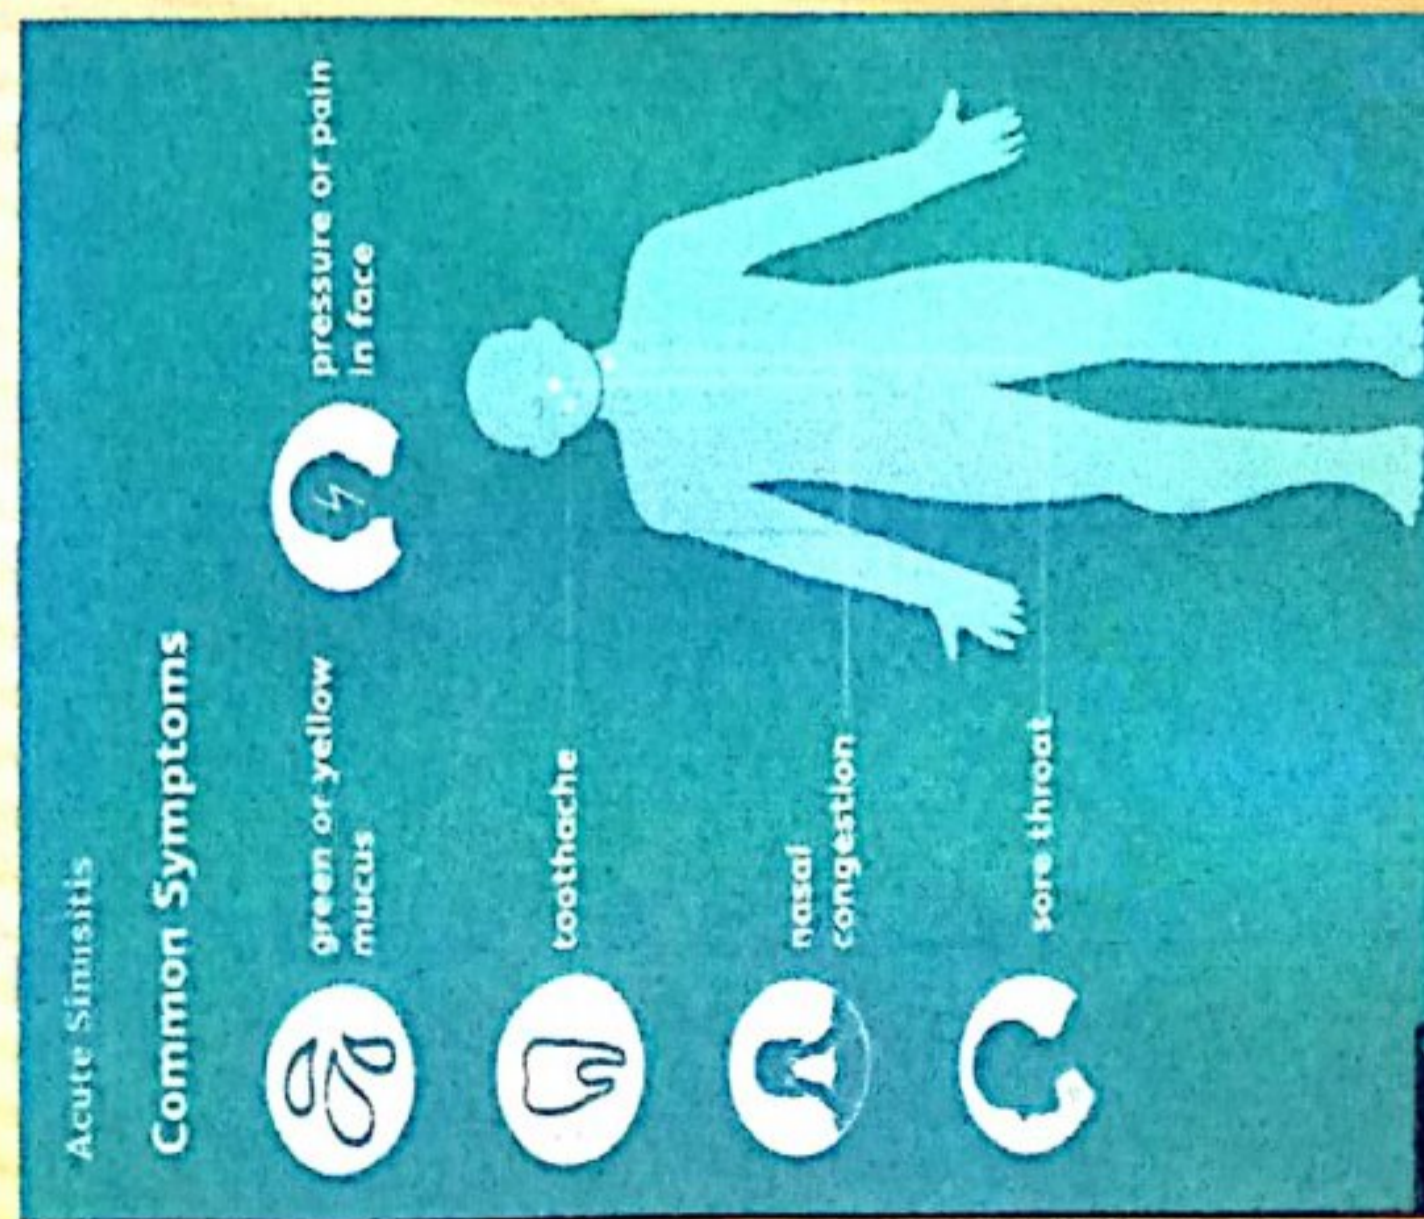

Headache, facial pain, or pressure of a dull, constant, or aching sort over the affected sinuses is common with both acute and chronic stages of sinusitis.

This pain is usually localized to the involved sinus and may worsen when the affected person bends over or lies down. Pain often starts on one side of the head and progresses to both sides. acute sinusitis may be accompanied by a thick nasal discharge that is usually green in color, and may contain pus or blood.

Often, a localized headache or toothache is present, and these symptoms distinguish a sinus-related headache from other types of headaches, such as tension and migraine headaches. Another way to distinguish between toothache and sinusitis is that the pain in sinusitis is usually worsened by tilting the head forward and with the valsalva maneuver. Other symptoms associated with acute rhinosinusitis include cough, fatigue, hyposmia, anosmia and ear fullness or pressure.

<b>Symptoms</b>	Thick nasal mucus, plugged nose, pain in the face, fever <sup>(1)(2)</sup>
<b>Causes</b>	Infection (bacterial, fungal, viral), allergies, air pollution, structural problems in the nose <sup>(2)</sup>
<b>Risk factors</b>	Asthma, cystic fibrosis, poor immune function <sup>(1)</sup>
<b>Diagnostic method</b>	Usually based on symptoms <sup>(1)</sup>
<b>Differential diagnosis</b>	Migraine <sup>(3)</sup>
<b>Prevention</b>	Handwashing, avoiding smoking
<b>Treatment</b>	Pain medications, nasal steroids, nasal irrigation, antibiotic <sup>(1)(4)</sup>
<b>Frequency</b>	10–30% each year (developed world) <sup>(1)(5)</sup>

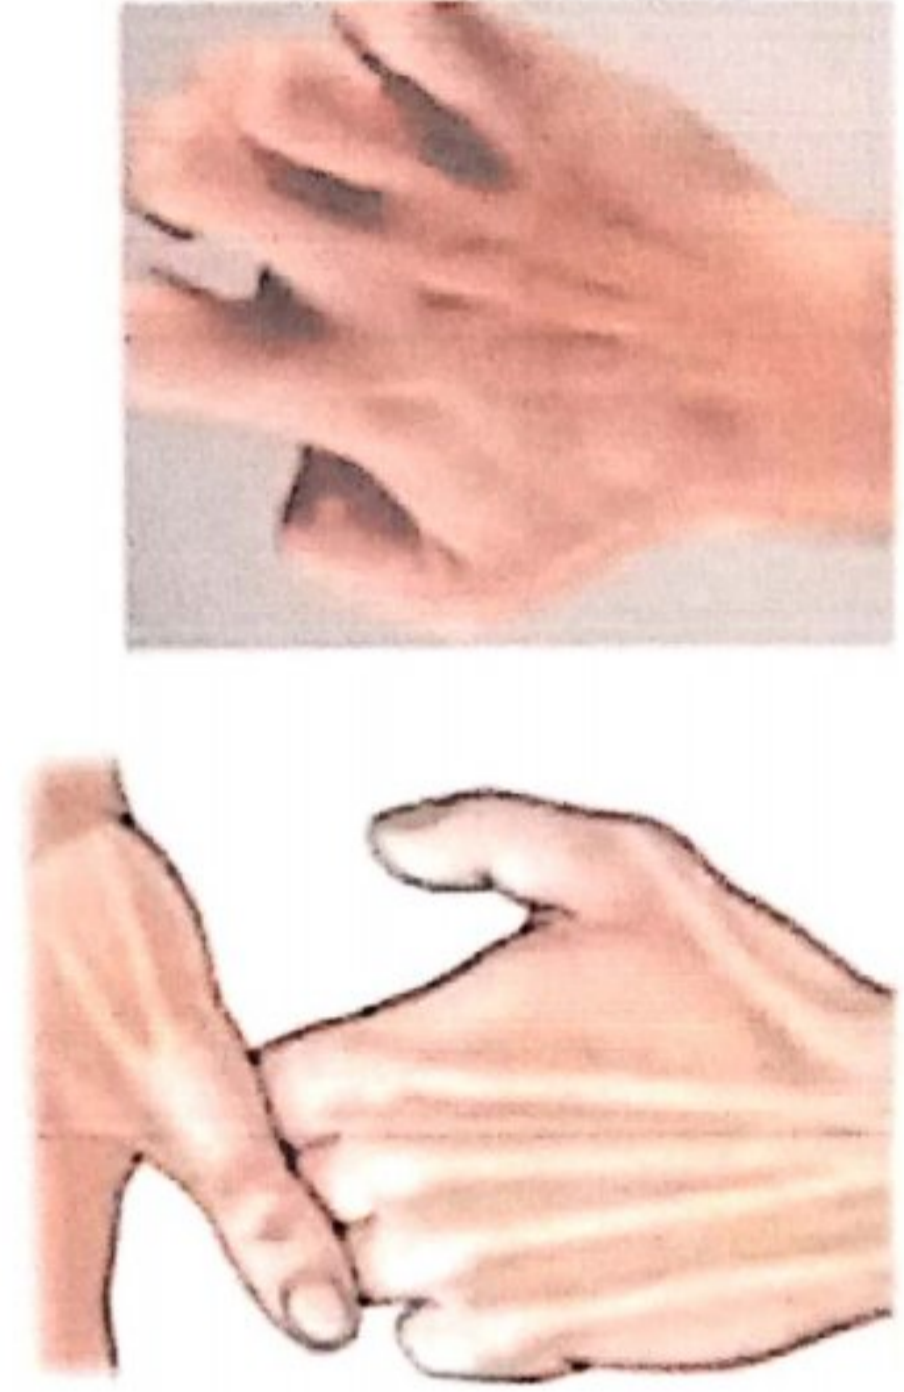

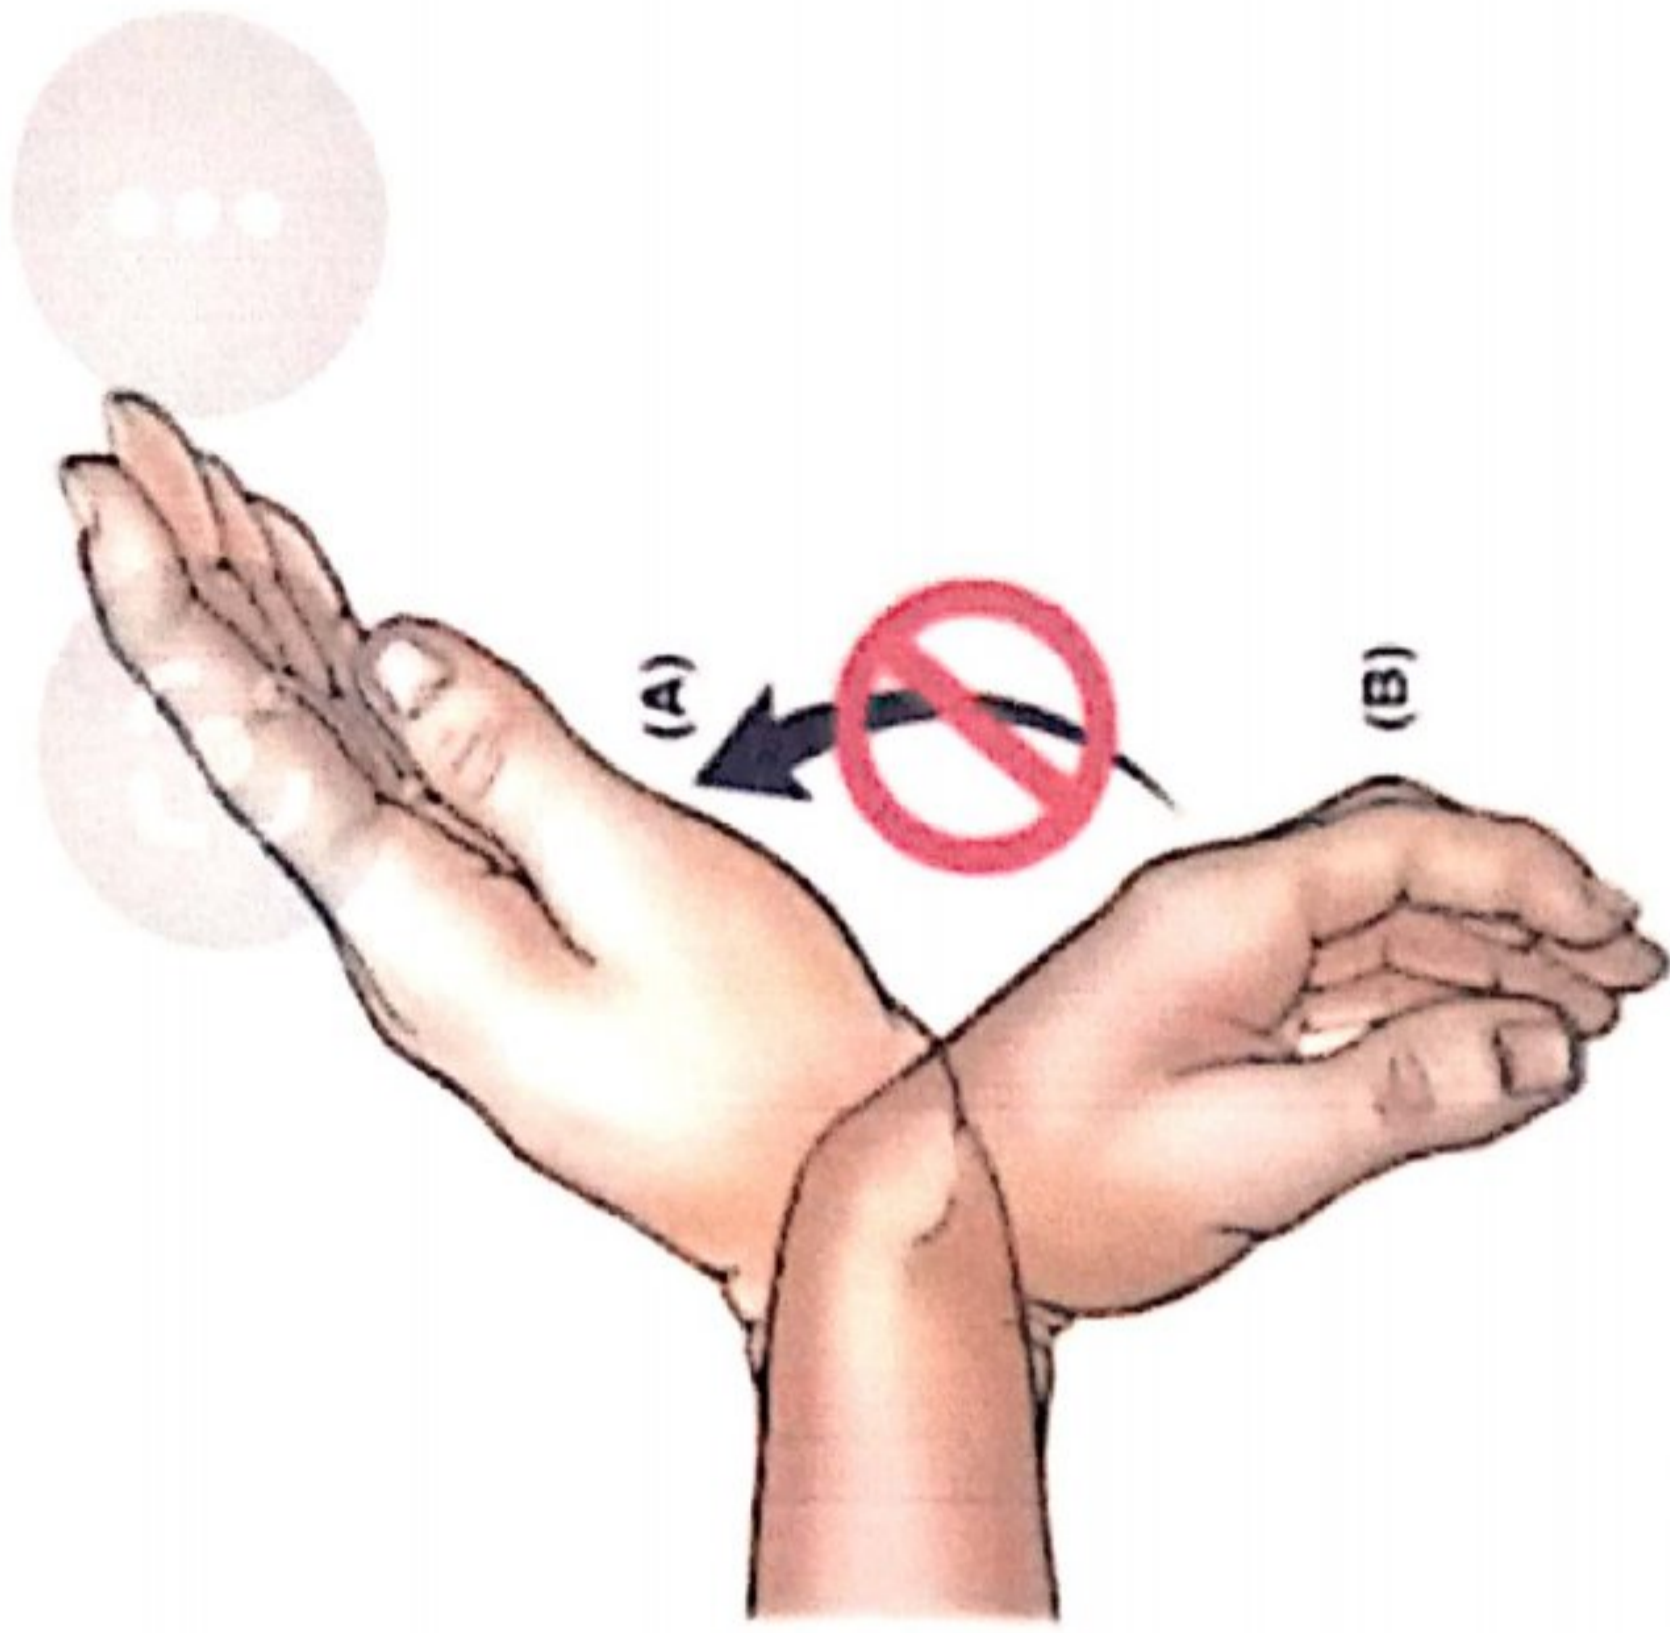

## Radial nerve injury

- Injury in the axilla
  - Wrist-drop
- Injury in the spiral groove
  - Wrist-drop
- Injury to the deep branch
  - No wrist-drop
  - Inability to extend the thumb and the metacarpophalangeal joints (test against resistance)
- Injury to the superficial branch
  - No loss of sensation
- Injury to the superficial branch
  - Limited anaesthesia

# History of ECG

**Willem Einthoven** (21 May 1860 – 29 September 1927) was a Dutch doctor and physiologist. He invented the first practical electrocardiograph (ECG or EKG) in 1895 and received the Nobel Prize in Physiology or Medicine in 1924 for it ("for the discovery of the mechanism of the electrocardiogram").

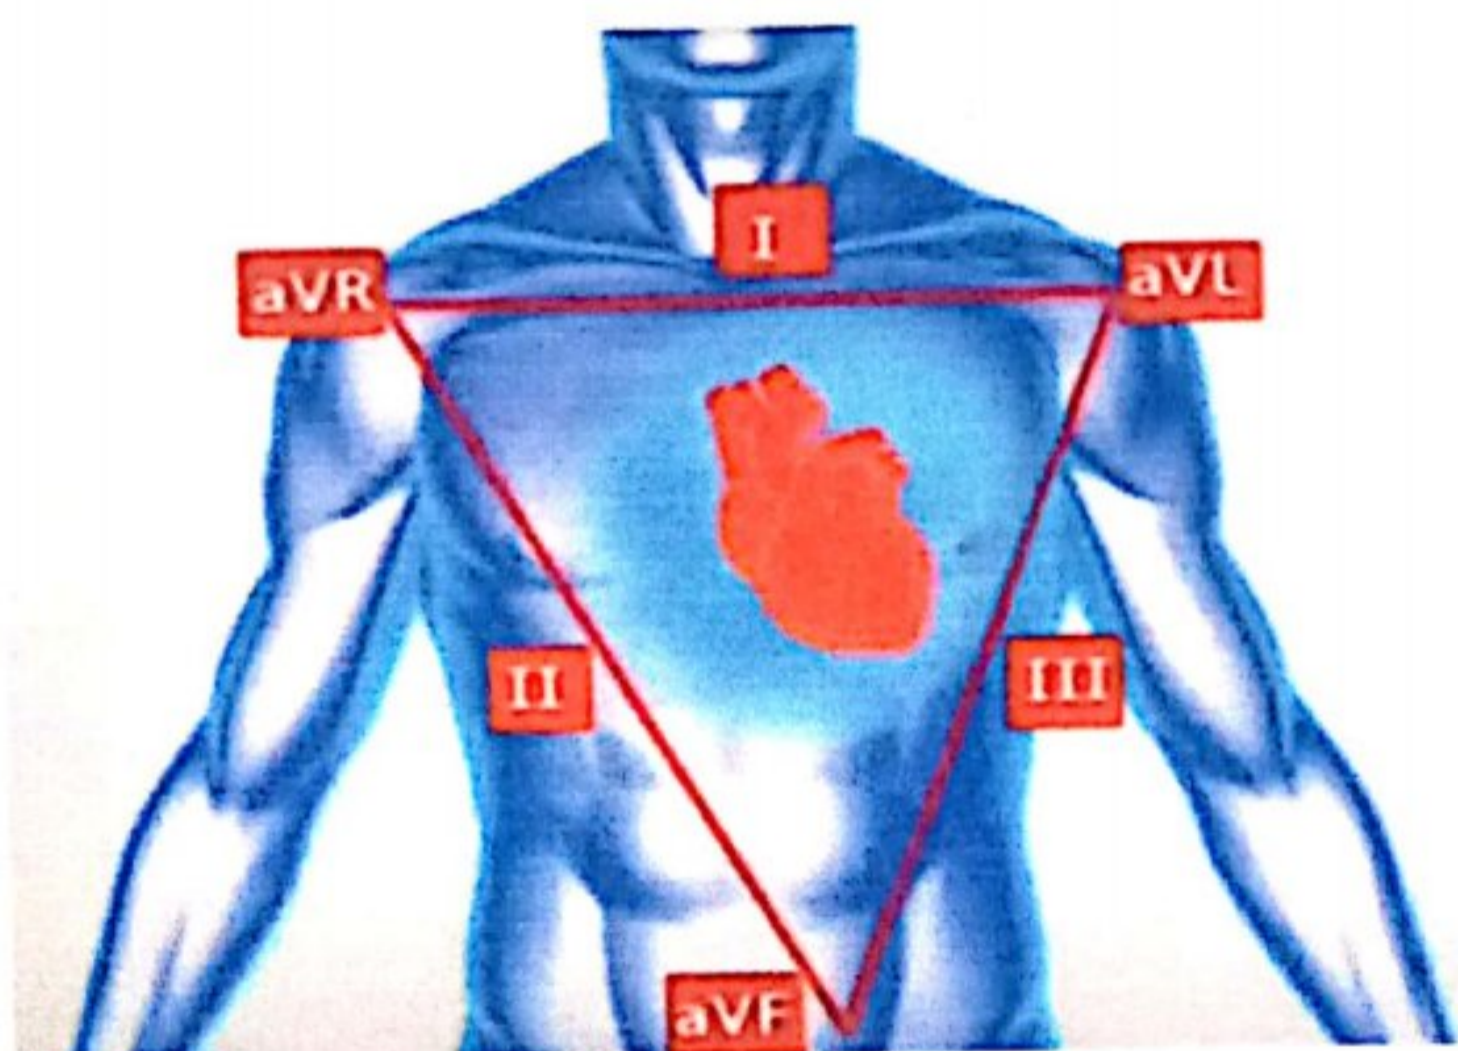

Before Einthoven's time, it was known that the beating of the heart produced electrical currents, but the instruments of the time could not accurately measure this phenomenon without placing electrodes directly on the heart. Beginning in 1901, Einthoven completed a series of prototypes of a string galvanometer.

Although later technological advances brought about better and more portable EKG devices, much of the terminology used in describing an EKG originated with Einthoven. His assignment of the letters P, Q, R, S and T to the various deflections are still used. The term Einthoven's triangle is named after him.

### EINTHOVEN'S TRIANGLE

Limb leads should be placed on the limbs to record a diagnostic 12-Lead.

Three of the leads are augmented voltage and when there is a 4<sup>th</sup> this is an earth.

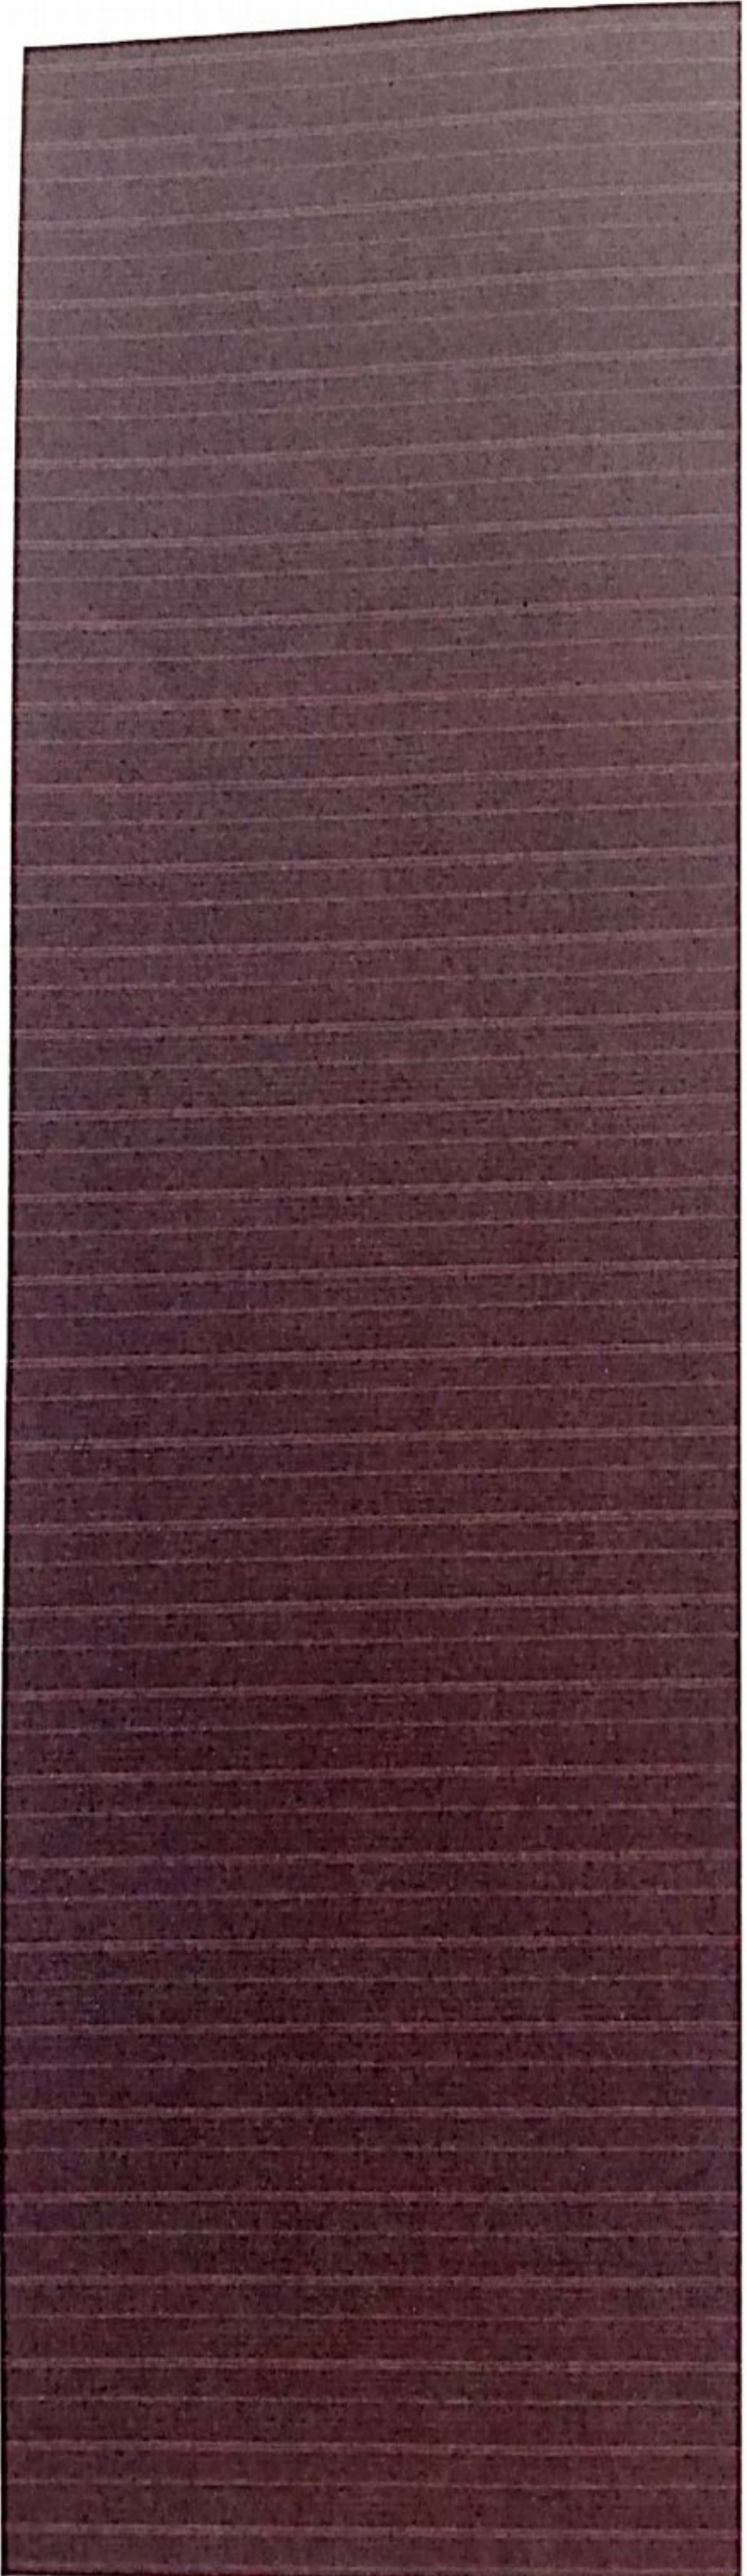

I, II & III are not true leads but computer generated views.

It refers to the imaginary inverted equilateral triangle centered on the chest and the points being the standard leads on the arms and leg.

After his development of the string galvanometer, Einthoven went on to describe the electrocardiographic features of a number of cardiovascular disorders.

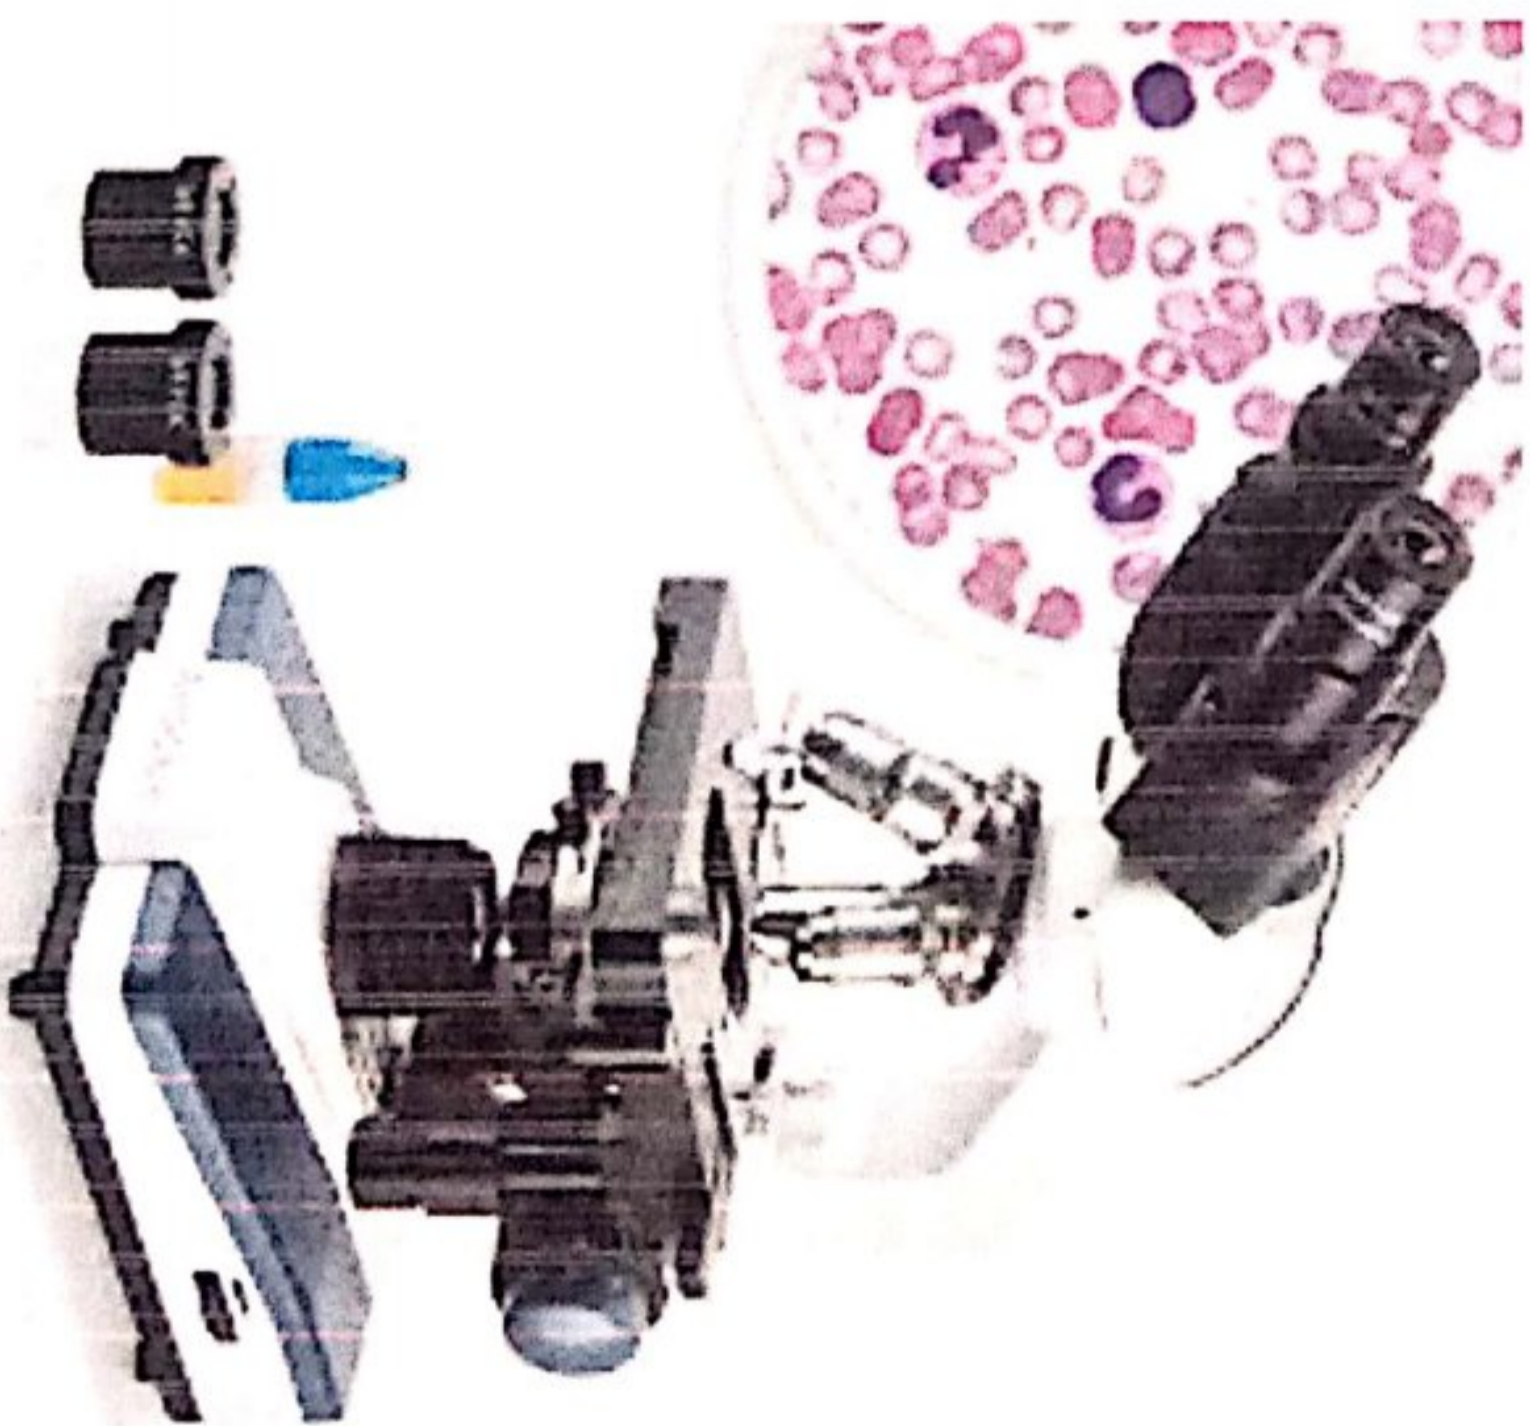

# HISTORY OF MICROSCOPE

# MICROSCOPE

- A microscope is a laboratory instrument used to examine objects that are too small to be seen by the naked eye.
- Microscopy is the science of investigating small objects and structures using a microscope.
- Microscopic means being invisible to the eye unless aided by a microscope.

**Candida** is a common fungus affecting skin and lungs. The research shows that a nosode prepared from Candida fungus was able to inhibit the growth of candida fungus in the laboratory. Its success was as effective as standard anti-fungal medicine called **amphotericin**.

Similarly, the homeopathic nosodes prepared from (Salmonella typhi) in certain doses could inhibit the growth of the germs similar to that by Ciprofloxacin and Ofloxacin. A new drug prepared from E. Coli could also inhibit the growth of E. Coli bacteria as effectively as the previously mentioned antibiotics. Typhoid and E. Coli bacteria are amongst the major bacteria producing infections of the intestines and other organs.

## Electrohomeopathy

Mattei cancer cure is a derivative of homeopathy invented in the 19th century by Count Cesare Mattei. The name is derived from a combination of **electro** (referring to an electric bio-energy content supposedly extracted from plants and of therapeutic value, rather than electricity in its conventional sense) and **homeopathy** (referring to an alternative medicinal philosophy developed by Samuel Hahnemann in the 18th century). Electrohomeopathy has been defined as the combination of electrical devices and homeopathy.

# Homeopathic Remedies in COVID-19: Prognostic Factor Research

As the race for a cure or vaccine intensifies, medical researchers and doctors have been experimenting with different drugs, medicines to see if there is a possible cure for the problem. Alternative and complementary medicine forms, such as Ayurveda are also being studied extensively. One such among them is homeopathy, which is being currently studied as a treatment form.

against COVID-19. Its prophylactic use has been advised in states like Karnataka, Tamil Nadu, Kerala and Maharashtra and in some places, it has been used in high-risk areas. In places like Bhopal, claims were raised when doctors said that mild COVID cases were successfully treated with homeopathy.

## Reading the Skin Test

- The injection site should be assessed by a trained health care professional at 48 hours ( $\pm 4$  hours) following administration<sup>2,3</sup>
- Palpate the induration and note the edges. Consider using a pen to mark the edges at its largest diameter<sup>2</sup>
- Redness around the injection site is typical, but should **NOT** be used to measure the reaction<sup>3</sup>

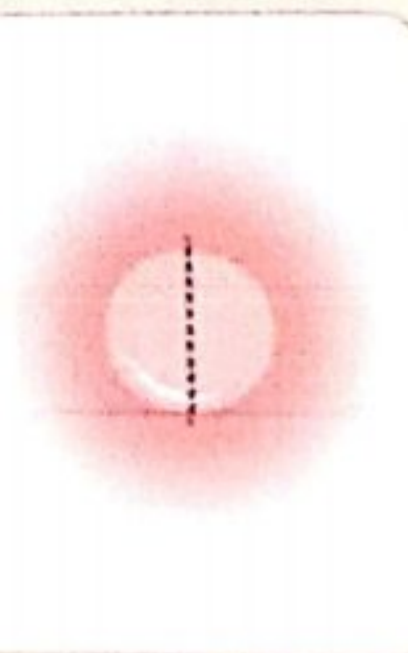

### Measure

- **DO NOT** include the redness as part of the measurement<sup>3</sup>

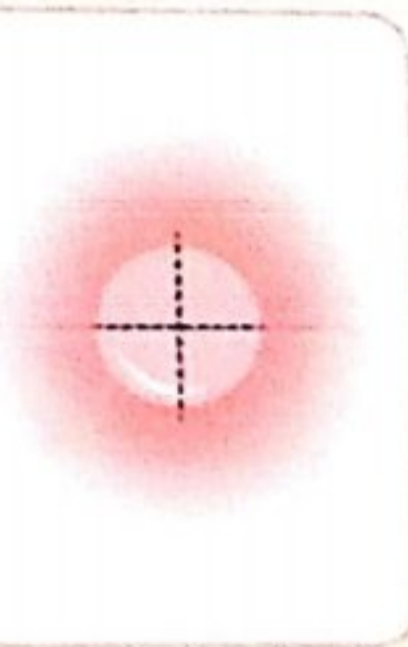

1

Measure the largest diameter of the area of induration first and record<sup>2,3</sup>

2

Measure the perpendicular (orthogonal) diameter and record<sup>2,3</sup>

3

Add the two measurements and divide by 2 to obtain the mean diameter and record<sup>2,3</sup>

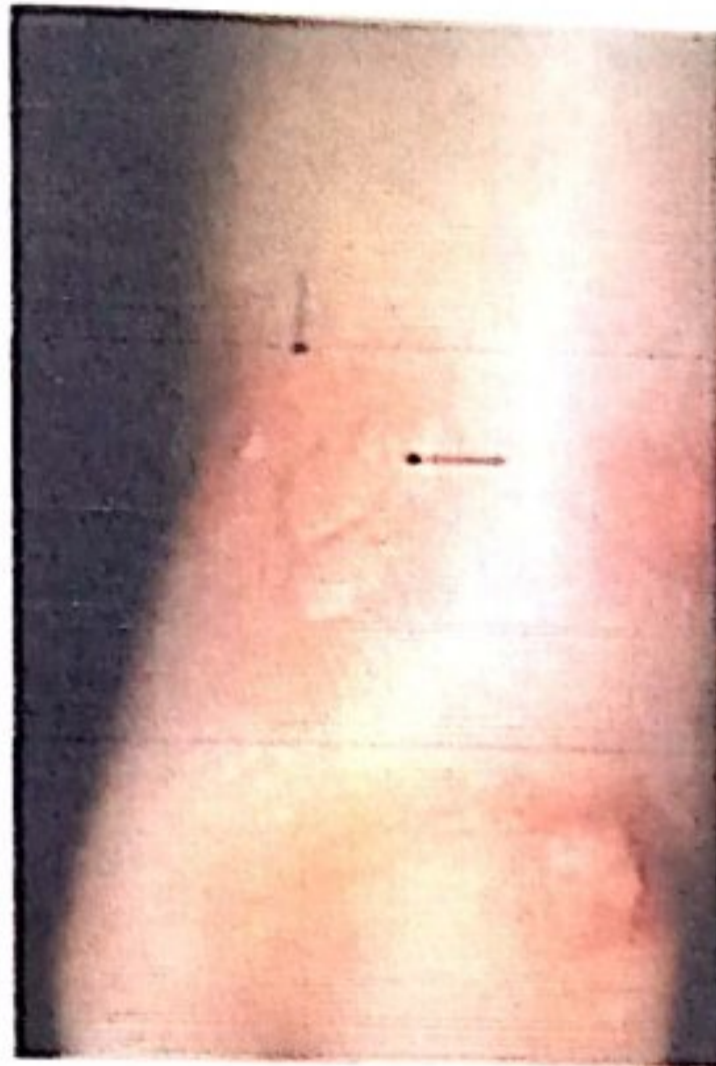

A positive CANNING response should be noted if the mean diameter is  $\geq 5$  mm<sup>2,3</sup>

• The response may be interpreted as:

- **Negative:** No reaction, or reaction not different from -ve control
- **Intermediate:** erythema and/or induration whose larger diameter is  $< 3$  mm (or  $< 3$  mm above the -ve control)
- **Positive:** induration whose longer diameter is  $> 3$  mm (or  $> 3$  mm above the -ve control)

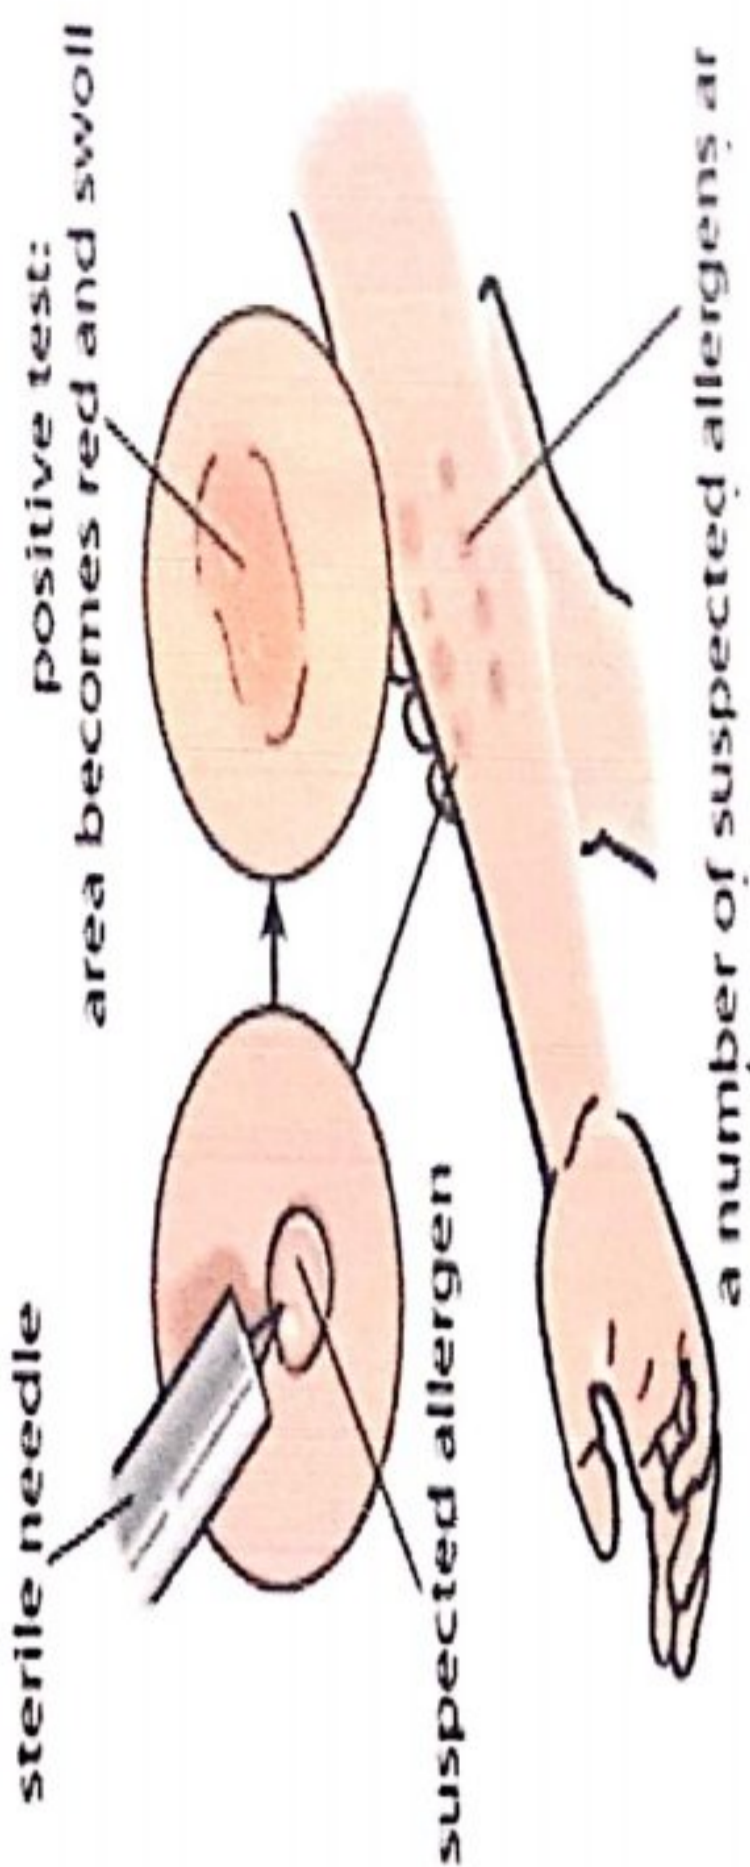

• Considering the wheal only in interpreting +ve test results  
 † reproducibility.

• It may be better to record the exact reaction size.

Wheal and Flare  
 In Urticaria Lesions

sterile needle

# Rhinosporidiosis

First described by  
Guillermo Seeber  
in Argentina

Chronic granulomatous disease  
caused by *Rhinosporidium seberi*

Eukaryotic pathogen  
of the class  
Mesomycetozoa

Hot tropical climate is  
suitable environment  
for the organism

Thick walled  
sporangia  
containing  
endospores

Infection occurs  
while swimming in  
fresh water

Endemic in India, Sri  
Lanka. Also reported in  
USA, South America & Iran

Common sites - Nasal  
cavity & nasopharynx  
Less common sites -  
Conjunctiva ; Skin

Presents as  
reddish  
polypoidal,  
bulky friable  
mucosal mass

# Hydrostatic Test:-

(Raygat's test ,1<sup>st</sup> life test)

• **Definition** – Hydrostatic test is the test involving floatation of lungs on water, to confirm live birth.

• **Procedure:-**

5

1. If all lung pieces float after applying pressure---respiration had been established
2. Some of the pieces float-partial inflation of lung ,baby lived for short period of birth.& partially respired
3. Whole lung & cut pieces sink , respiration had not been established.

## •Principle:-

The specific gravity of a non respired lung is 1040-1050 & of a respired lung is 940- 950, so the respired lung floats on water (sp. gr. of water is 1000). The increased volume of lungs after respiration, well compensates the increase in weight after respiration.

**Demonstration of Hydrostatic Test to differentiate between Live Born Child and Dead Born Child**

Fallacies of hydrostatic test	
<b>Respired Lung may sink (False Negative)</b>	<b>Unrespired Lung may float (False Positive)</b>
1. Acute pulmonary edema	1. Presence of decomposition
2. Bronchopneumonia	2. Artificial respiration
3. Atelectasis	3. Mouth to mouth insufflation
4. Alveolar duct membrane	
5. Very feeble respiration	

## •Conditions where the test is not to be done

1. Dead birth confirmed –
  - a) Age less than 180 days.
  - b) Signs of maceration / decomposition/ mummification
  - c) Monster baby.
2. Live birth confirmed-
  - a) Atelectasis
  - b) Altered milk present in stomach
  - c) Umbilical cord is shed off after mummification.

# PHOSPHOROUS POISONING :-

*(Irritant Inorganic Non Metal Poison)*

- **Fatal Dose:** -100-150mg
- **Fatal Period:** -Variable

## **2 Forms of Phosphorus**

- White or Yellow
- Red or Violet

Red and White (yellow) phosphorus

### ● **Acute Poisoning:-**

Signs & Symptoms:

Stage I First latent period of 1-6 hrs.

Stage II GIT and CNS manifestations.

Stage III – Second latent period of 2LP 2-3 days.

Stage IV – Liver failure and CNS manifestations.

### ● **Chronic Poisoning:-**

#### ● **Phossy Jaw/GLASS JAW:**

It is the manifestation in teeth of chronic Phosphorous poisoning, resulting due to necrosis and sequestration of the jaws due to increased bone formation. Changes start in the area of a decayed tooth.

### ● **POST-MORTEM APPEARANCE:-**

I) **In early deaths:** Skin is yellow, Inflammations, erosion.

II) **In late deaths:** Jaundice, bleeding from orifices, dehydration.

### ● **MEDICOLEGAL ASPECTS:**

1. Derivatives of phosphorous are phosphoric acid, phosphine, aluminium phosphide and zinc phosphide.
2. Is used for suicide, homicide and to cause criminal abortion.
3. Used in rodenticides, insecticides.

### ● **Treatment/prevention**

#### **ion includes:-**

1. Use of exhaust fans.
2. Regular dental checkups.
3. Carious teeth should be filled in or extracted.
4. Regular mouth washes with sodium bicarbonate.
5. Periodic X-ray examination of jaws.

# WEAPONS

## Semiautomatic rifles firearm

Description of weapon-Shoulder arm with long rifled barrel, magazine and bolt action

- Injuries produced by weapon-Firearm wounds, fracture by butt
- Medicolegal aspects – Mostly used for homicidal.

## Pistol

•Description of weapon – Hand arm, small rifled barrel, semiautomatic.

- Injuries produced by weapon-Firearm wounds.
- Medicolegal aspects-Homicidal, suicidal and accidental

## •kitchen knife

•Description of weapon-Light sharp cutting weapon with pointed tip, metal blade with two edges. One edge is sharp cutting, serrated and other edge is blunt. Handle is made up of plastic

- Injuries produced by weapon-incised wound, stab (punctured. Penetrating, perforating) wound
- Medicolegal aspects-homicidal, suicidal, accidental & Self-inflicted/fabricated wounds.

## •Hammer

Description of weapon-heavy hard blunt weapon, striking surface is circular on one side and other side knob like injuries produced by weapon- depressed fracture on the skull abrasion, contusion, laceration & fracture

- medicolegal aspects – mostly homicidal-framum-a la signature sometimes accidental

## •Wooden log

description of weapon moderately heavy hart blunt made of wood, non flexible weapon, elongated roller, with smooth surface all around.

Injuries produced by weapon-lacerated wound on the skull may resemble incised wound so called Incised-looking wound. Contusion & abrasions, fracture &

- medicolegal aspects-mostly homicidal head injuries

## •Screwdriver

•description of weapon-moderately heavy blunt weapon, long circular shaped one end with sharp edges and other end filed with the handle

injuries produced by weapon-punctured, perforating, penetrating wound.

- Medicolegal aspects-accidental and homicide

•motorcycle chain description of weapon-made of iron screws and bolts which are arranged in a regular pattern injuries produced by weapon-patterned abrasion, laceration, contusion medicolegal aspects-homicidal (strangulation). Used in gang wars & riots.

# VITRIOLAGE

## Medicolegal importance

- Accidental
- Vitriolage
- Abortifacient
- Suicidal

## Vitriolage

Throwing of any corrosive on a person with malicious intent.

- These fluids are usually thrown on the face with the object of destroying vision or causing facial disfigurement and this result in Grievous hurt.
- E.g **Sulphuric Acid (OIL OF VITRIOL)** is most commonly employed for this purpose and hence it is called vitriolage.

Purpose: The purpose of Vitriolage is to take revenge or it is done in a fit of anger

or for jealousy.

Sec. 326A IPC: Acid attack

Sec.326B IPC: Attempt to acid attack

## Treatment of Vitriolage

- Wash away corrosive acid with large amount of water and soap or dilute solution of  $\text{NaHCO}_3$  or  $\text{KHCO}_3$ .
- Later a thick paste of magnesium oxides applied.
- skin raw surfaces can be covered by Antibiotic ointment.

EYE Involved:

Treatment with large amount of water followed by irrigation 1 % solution of sodium bicarbonate .

- Few drops of olive oil instilled into eyes.
- Steroids and Antibiotic containing eye drops are very helpful.

## Common Causes Of Infertility

## Male Infertility

### INFERTILITY IN MALE

Male infertility means a man is not able to start a pregnancy with his female partner. Male infertility can have many causes. You may not make enough sperm or healthy sperm. You may have a genetic problem like cystic fibrosis.

- **CAUSES**---Abnormal sperm production
- Problems with the delivery of sperm
- Overexposure to certain environmental.

- **SIGN AND SYMPTOMS**

- Problems with sexual function — for example, difficulty with ejaculation or small volumes of fluid ejaculated, reduced sexual desire, or difficulty maintaining an erection (erectile dysfunction)
  - Pain, swelling or a lump in the testicle area
  - Recurrent respiratory infections
  - Inability to smell
  - Abnormal breast growth (gynecomasti)
- TREATMENT**
- Non-surgical therapy for Male Infertility

# VIRILISM

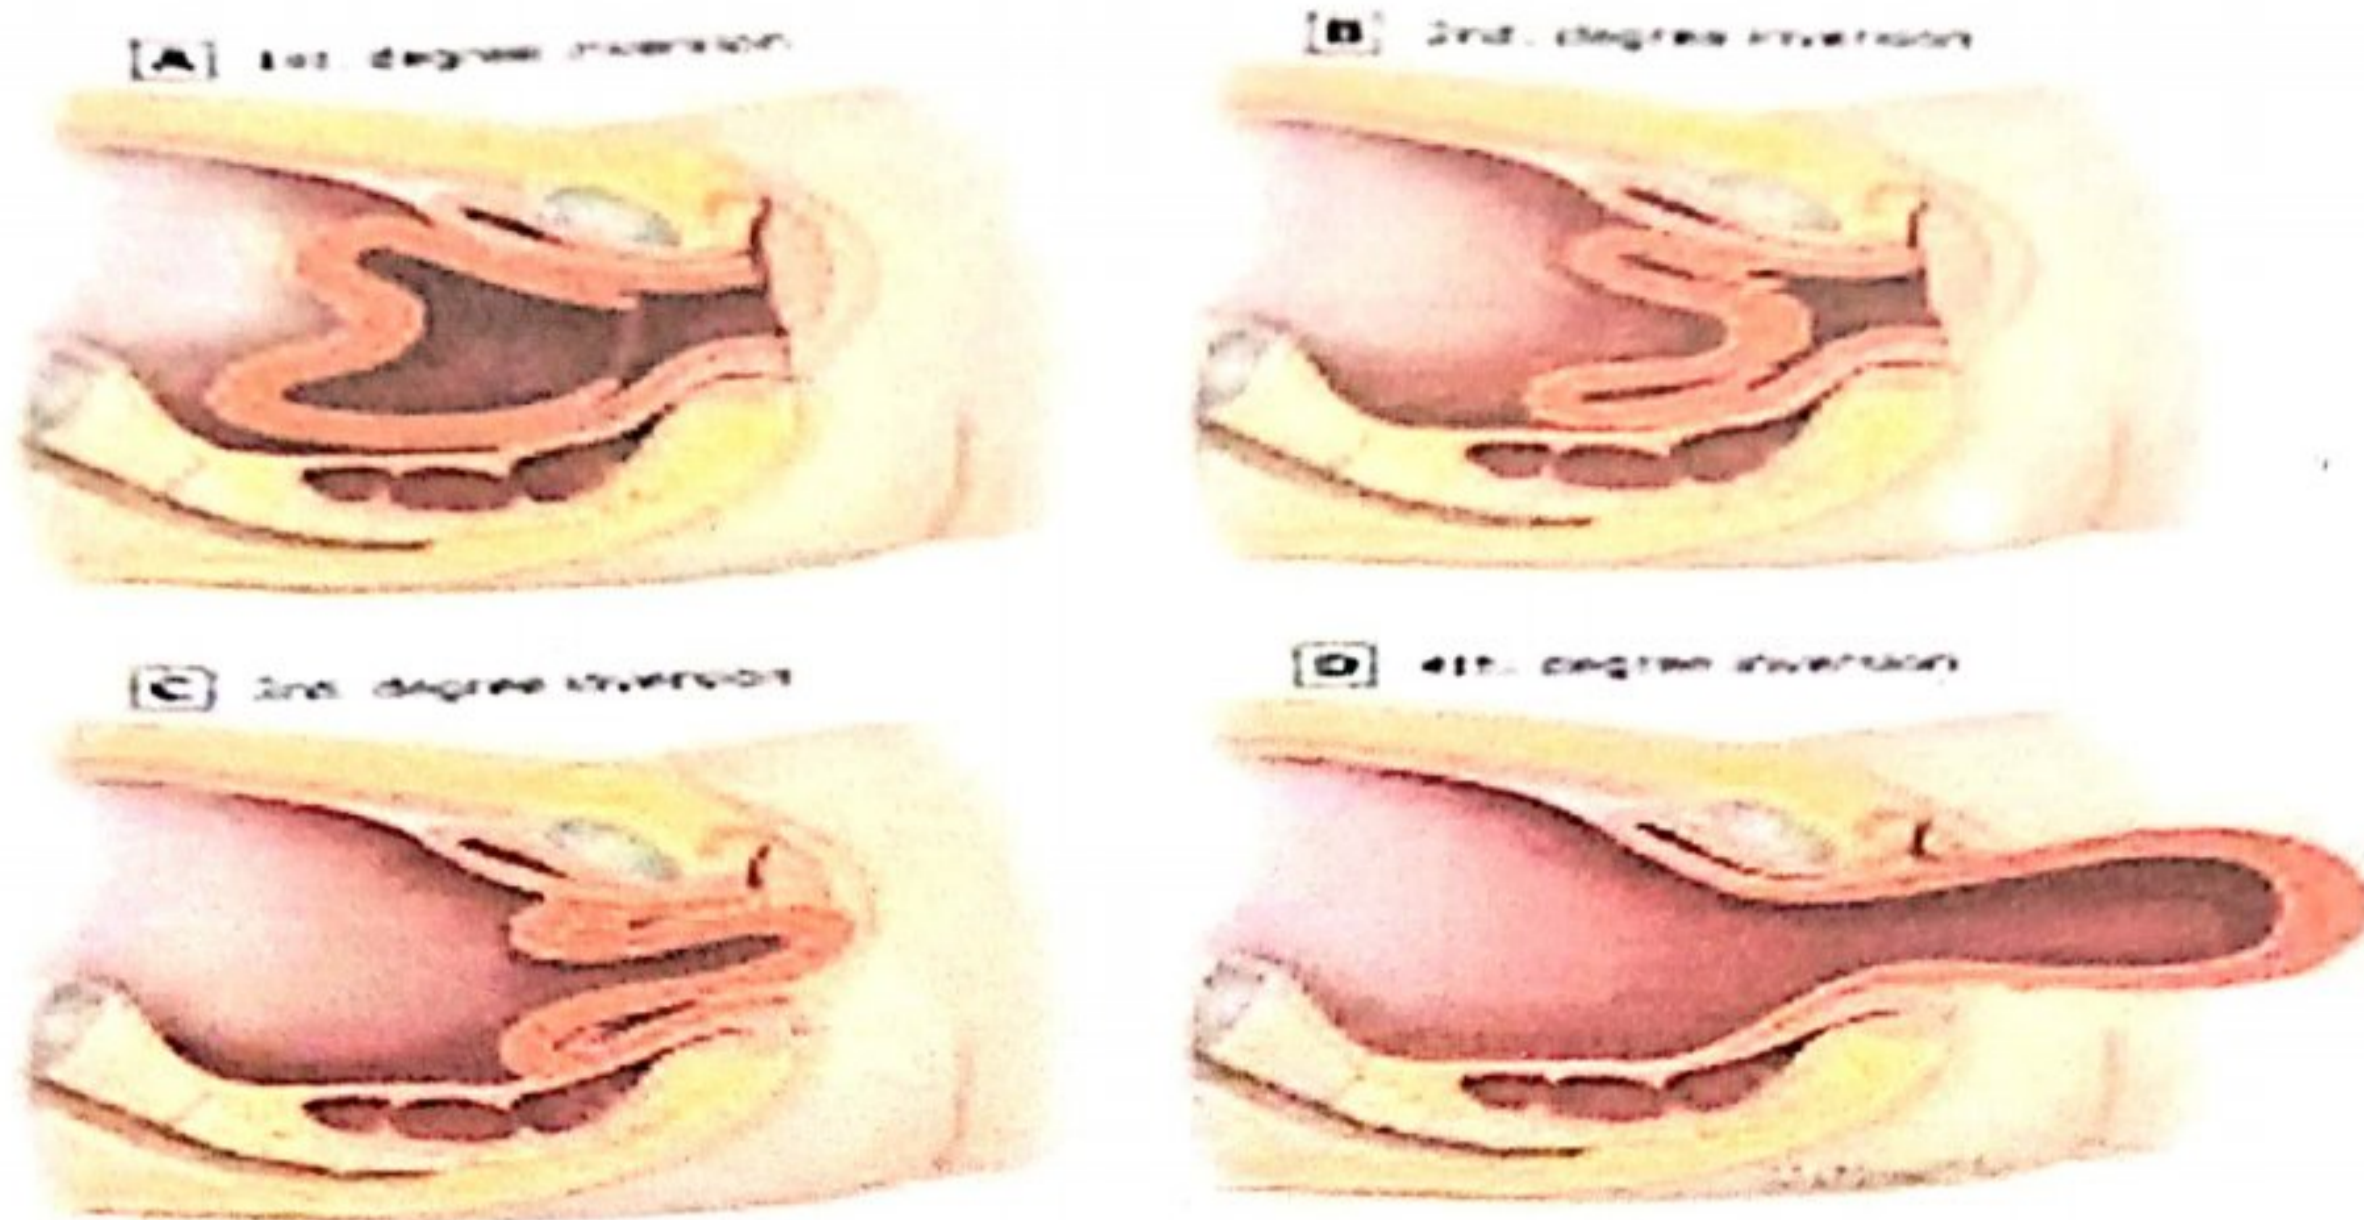

Virilization is a condition in which a female develops characteristics associated with male hormones (androgens), or when a newborn has characteristics of male hormone exposure at birth.

- **CAUSES**
- Use of anabolic steroids, uncommon among women.
- Medications.
- Tumors that release male hormones (especially on the ovaries or adrenal glands)
- Polycystic ovary syndrome (PCOS)
- Congenital adrenal hyperplasia (usually in adoloes)
- **TREATMENT**
- Nitroglycerin (Nitrostat, Nitro-Dur). ...
- Beta blockers. ...
- Calcium channel blockers. ....
- Statins. ....
- ACE inhibitors and ARBs. ....
- Ranolazine (Ranexa). ....

# INVERSION OF UTERUS

**INTRODUCTION-** Uterine inversion occurs when the uterine fundus collapses into the endometrial cavity, turning the uterus partially or completely inside out.

## CLASSIFICATION

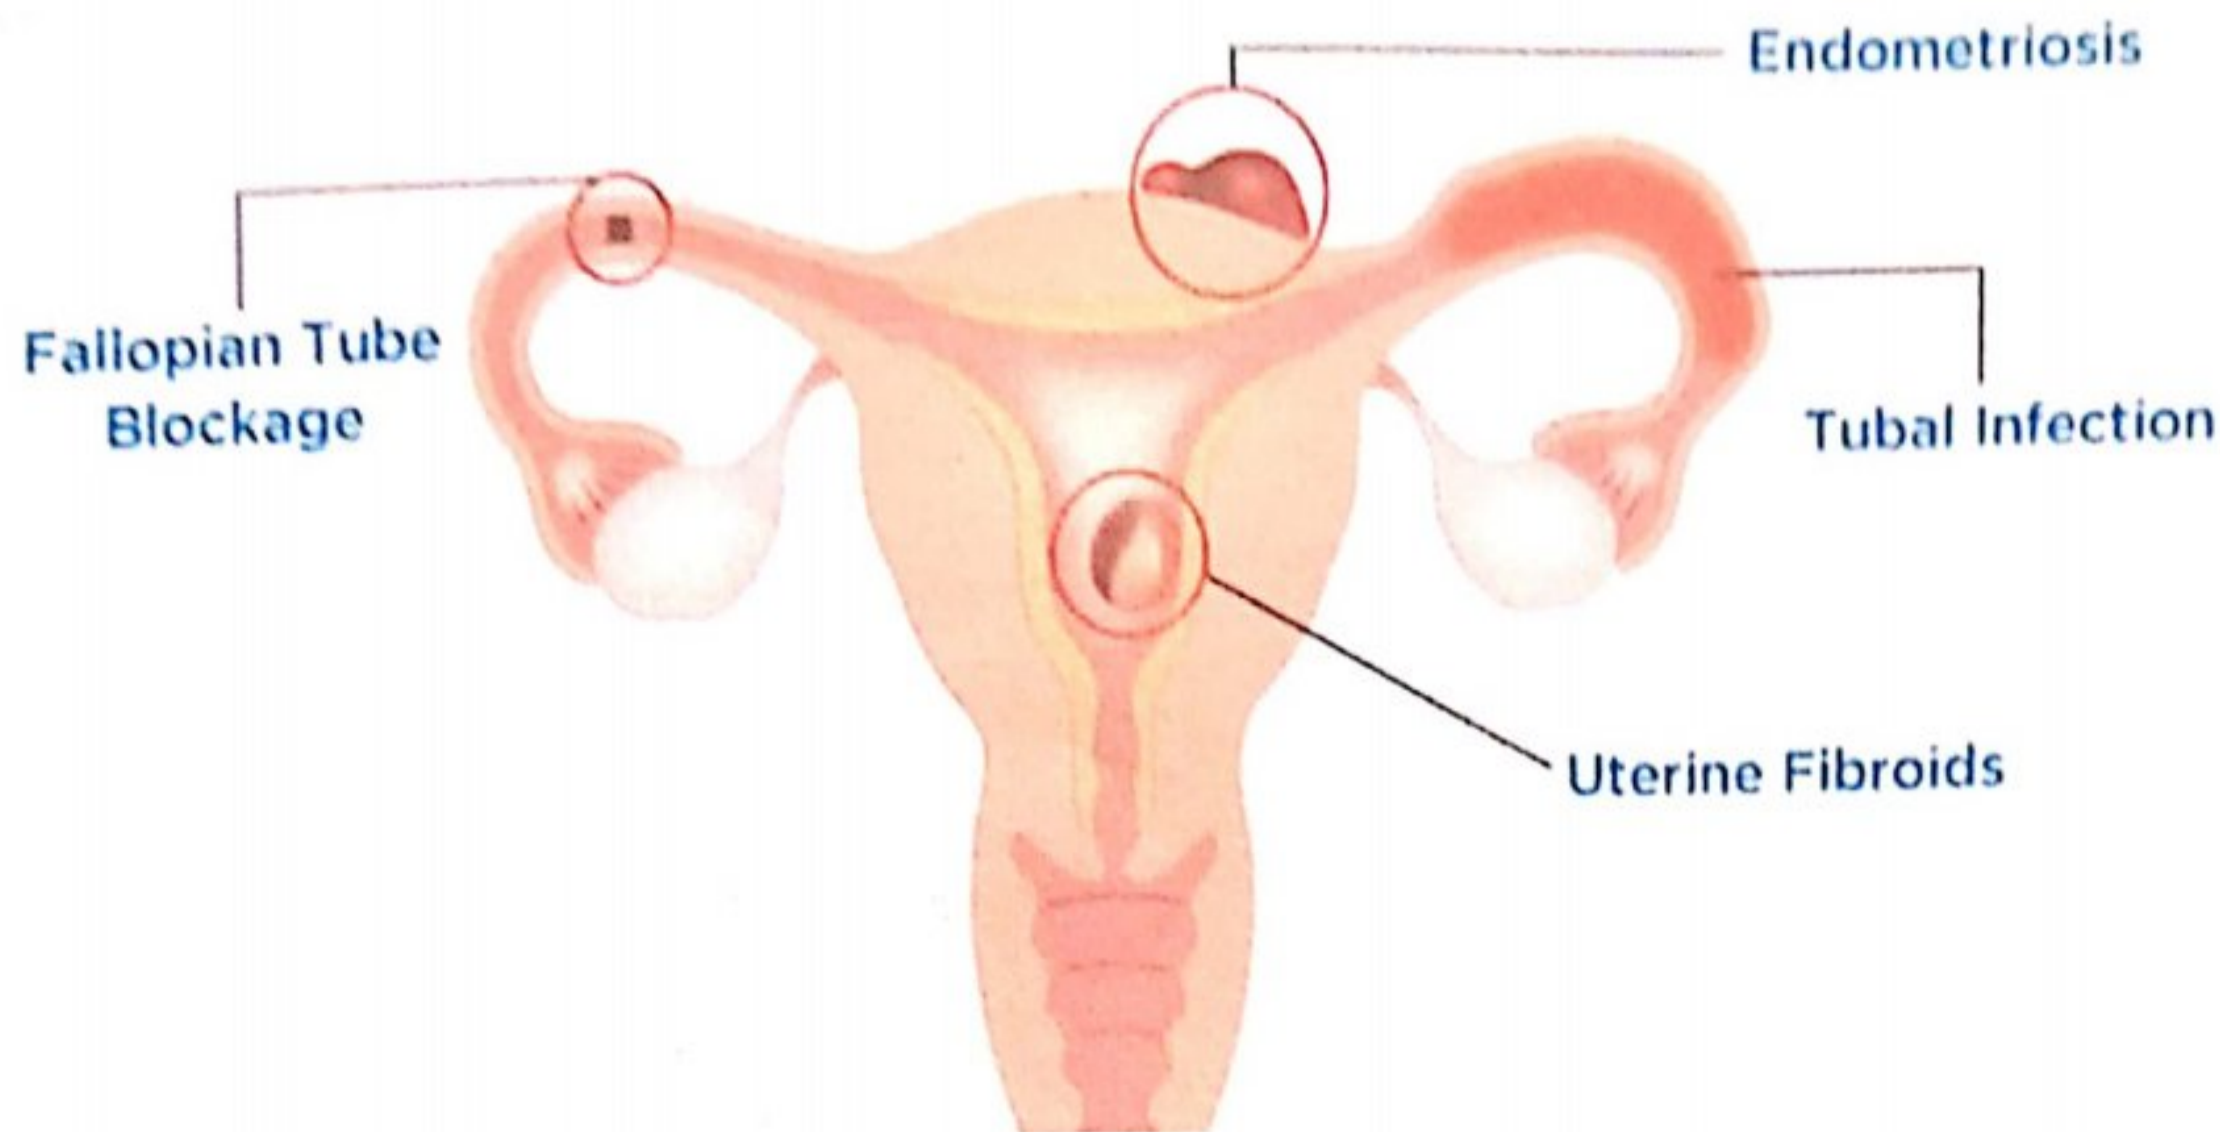

Uterine inversions are classified by the extent of inversion and time of occurrence:

Extent of inversion (figure 1) [6-8]:

- 1st degree (also called incomplete) – The fundus is within the endometrial cavity
- 2nd degree (also called complete) – The fundus protrudes through the cervical os
- 3rd degree (also called prolapsed) – The fundus protrudes to or beyond the introitus

# INFERTILITY FEMALE

**DEFINITION-** Infertility is defined as trying to get pregnant with frequent, unprotected sex for at least a year with no success.

## SYMPTOMS-

The main symptom of infertility is the inability to get pregnant. A menstrual cycle that's too long (35 days or more), too short (less than 21 days), irregular or absent can mean that you're not ovulating. There might be no other signs or symptoms.

## CAUSES-

For pregnancy to occur, every step of the human reproduction process has to happen correctly. The steps in this process are:

One of the two ovaries releases a mature egg.

The egg is picked up by the fallopian tube.

Sperm swim up the cervix, through the uterus and into the fallopian tube to reach the egg for fertilization.

The fertilized egg travels down the fallopian tube to the uterus.

The fertilized egg attaches (implants) to the inside of the uterus and grows.

## RISK FACTORS-

1. Age. The quality and quantity of a woman's eggs begin to decline with age. In the mid-30s, the rate of follicle loss speeds, resulting in fewer and poorer quality eggs. This makes conception more difficult, and increases the risk of miscarriage.

2. Smoking. Besides damaging your cervix and fallopian tubes, smoking increases your risk of miscarriage and ectopic pregnancy. It's also thought to age your ovaries and deplete your eggs prematurely. Stop smoking before beginning fertility treatment.

3. Weight. Being overweight or significantly underweight may affect ovulation. Getting to a healthy body mass index (BMI) might increase the frequency of ovulation and likelihood of pregnancy.

(a) Local anaesthetic infiltration

(b) Holding the needle

(c) Inserting the needle into the skin/wound

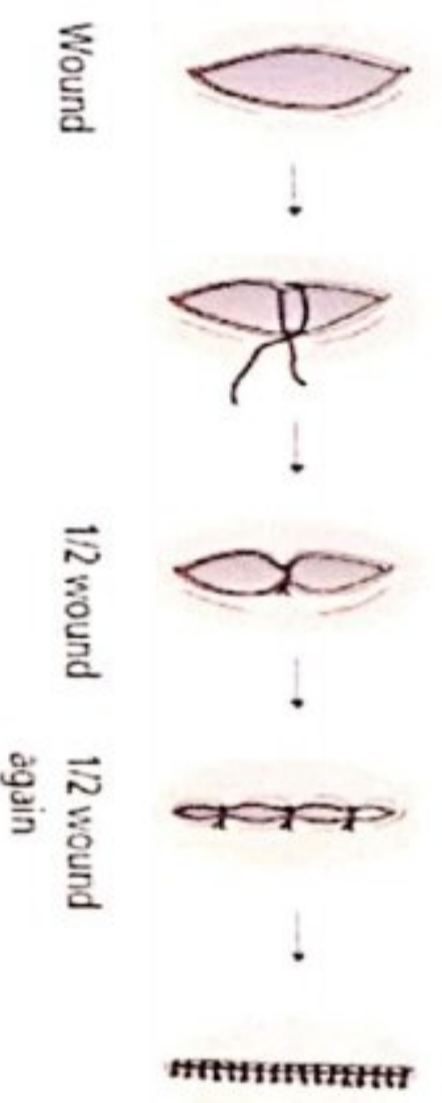

(d) Tying suture knot: 3-2-1 technique

Pull the knot tight, so that wound ends appose but not overlap, and are not under tension

(e) Half and half technique: knots to one side of the wound

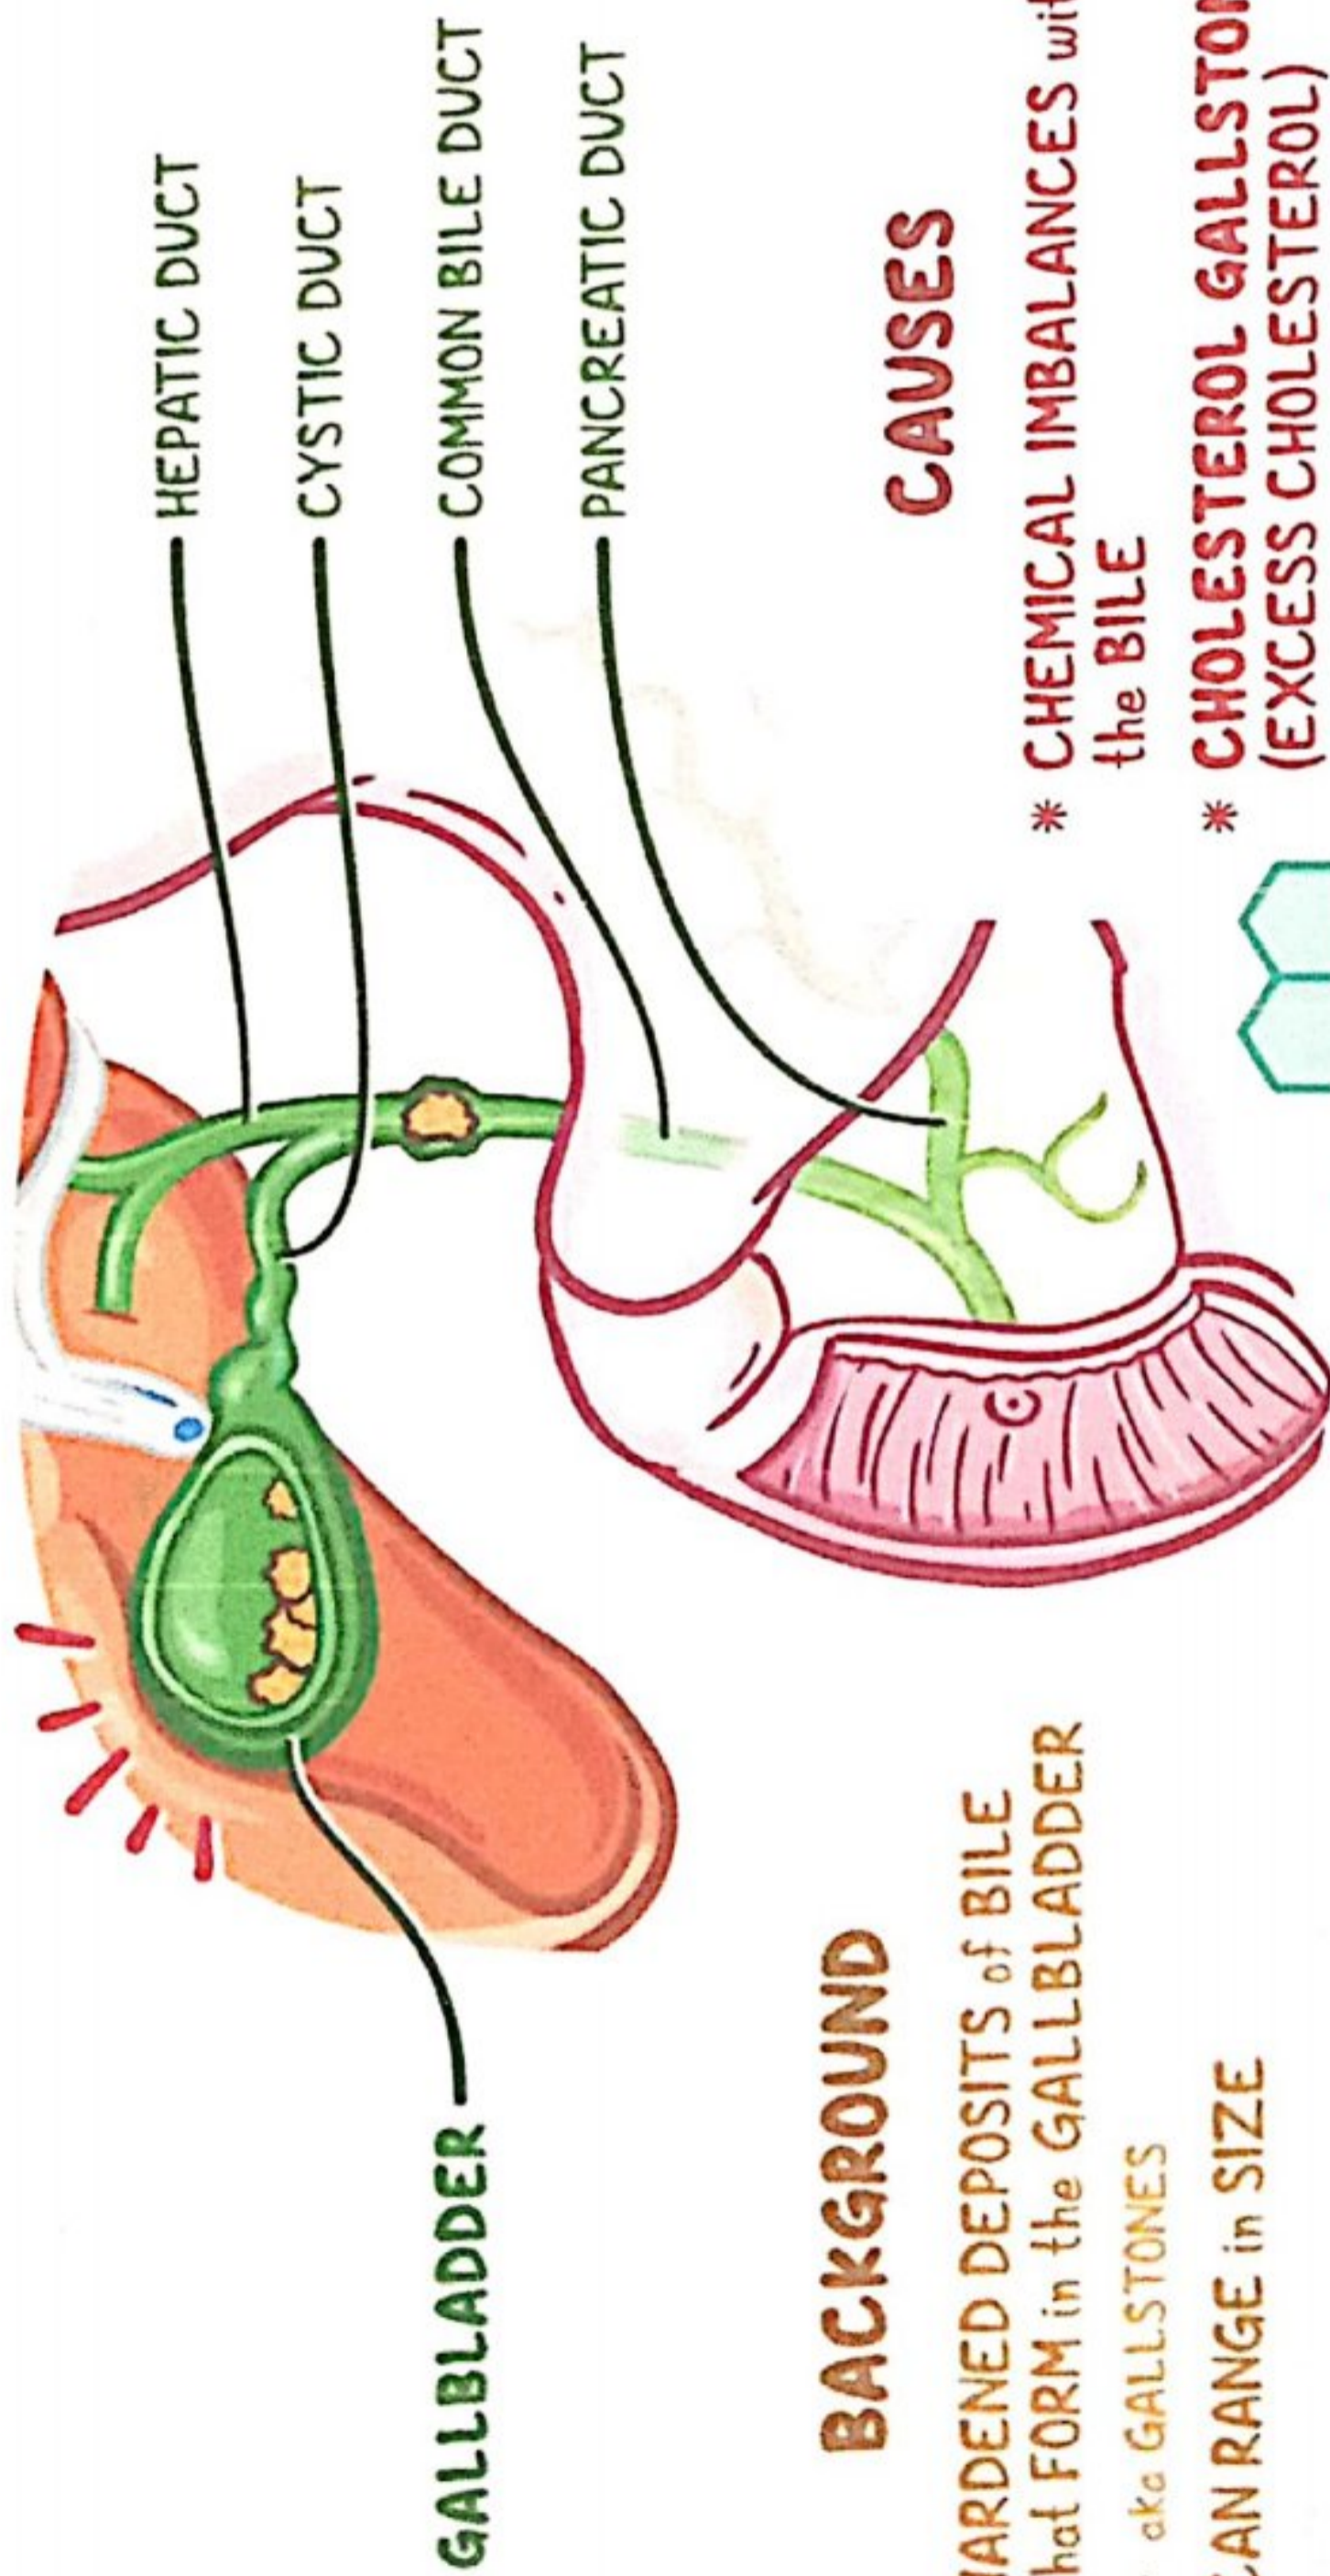

i.e. keep suturing by making the wound in half, then half again, then half again until finished

# GALLSTONES

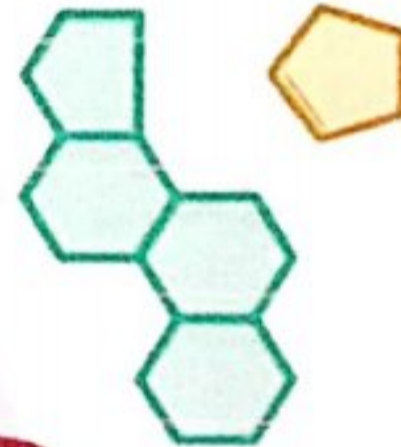

## BACKGROUND

- \* HARDENED DEPOSITS of BILE that FORM in the GALLBLADDER ~ aka GALLSTONES
- \* CAN RANGE in SIZE

## CAUSES

- \* CHEMICAL IMBALANCES within the BILE
- \* CHOLESTEROL GALLSTONES (EXCESS CHOLESTEROL)
- \* PIGMENT GALLSTONES (EXCESS BILIRUBIN)

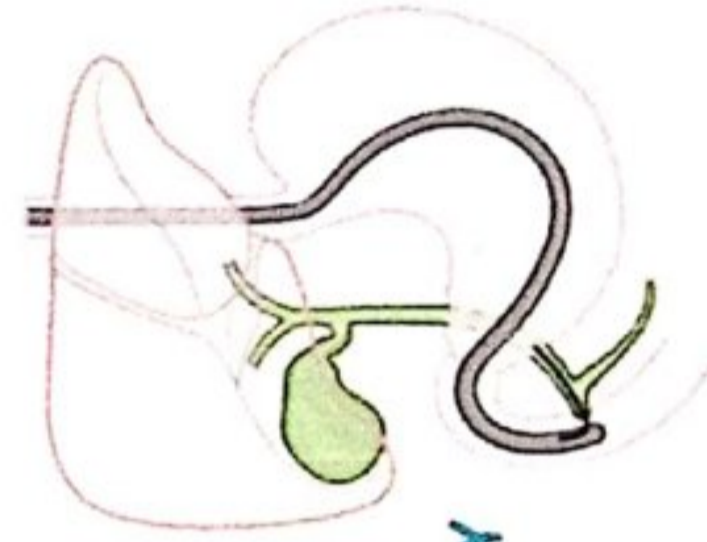

## SIGNS & SYMPTOMS

- \* USUALLY ASYMPTOMATIC
- \* BILIARY COLIC ~ SEVERE, RAPIDLY INTENSIFYING ABDOMINAL PAIN ~ LOCALIZED to UPPER RIGHT or CENTRAL ABDOMEN ~ TRIGGERED at NIGHT after FATTY MEAL

## DIAGNOSIS

- \* ABDOMINAL ULTRASOUND
- \* ENDOSCOPIC ULTRASOUND
- \* ENDOSCOPIC RETROGRADE CHOLANGIOPANCREATOGRAPHY (ERCP)

~ MAY ALSO be USED as TREATMENT

CHOLESTEROL STONES

BLACK PIGMENTED STONES

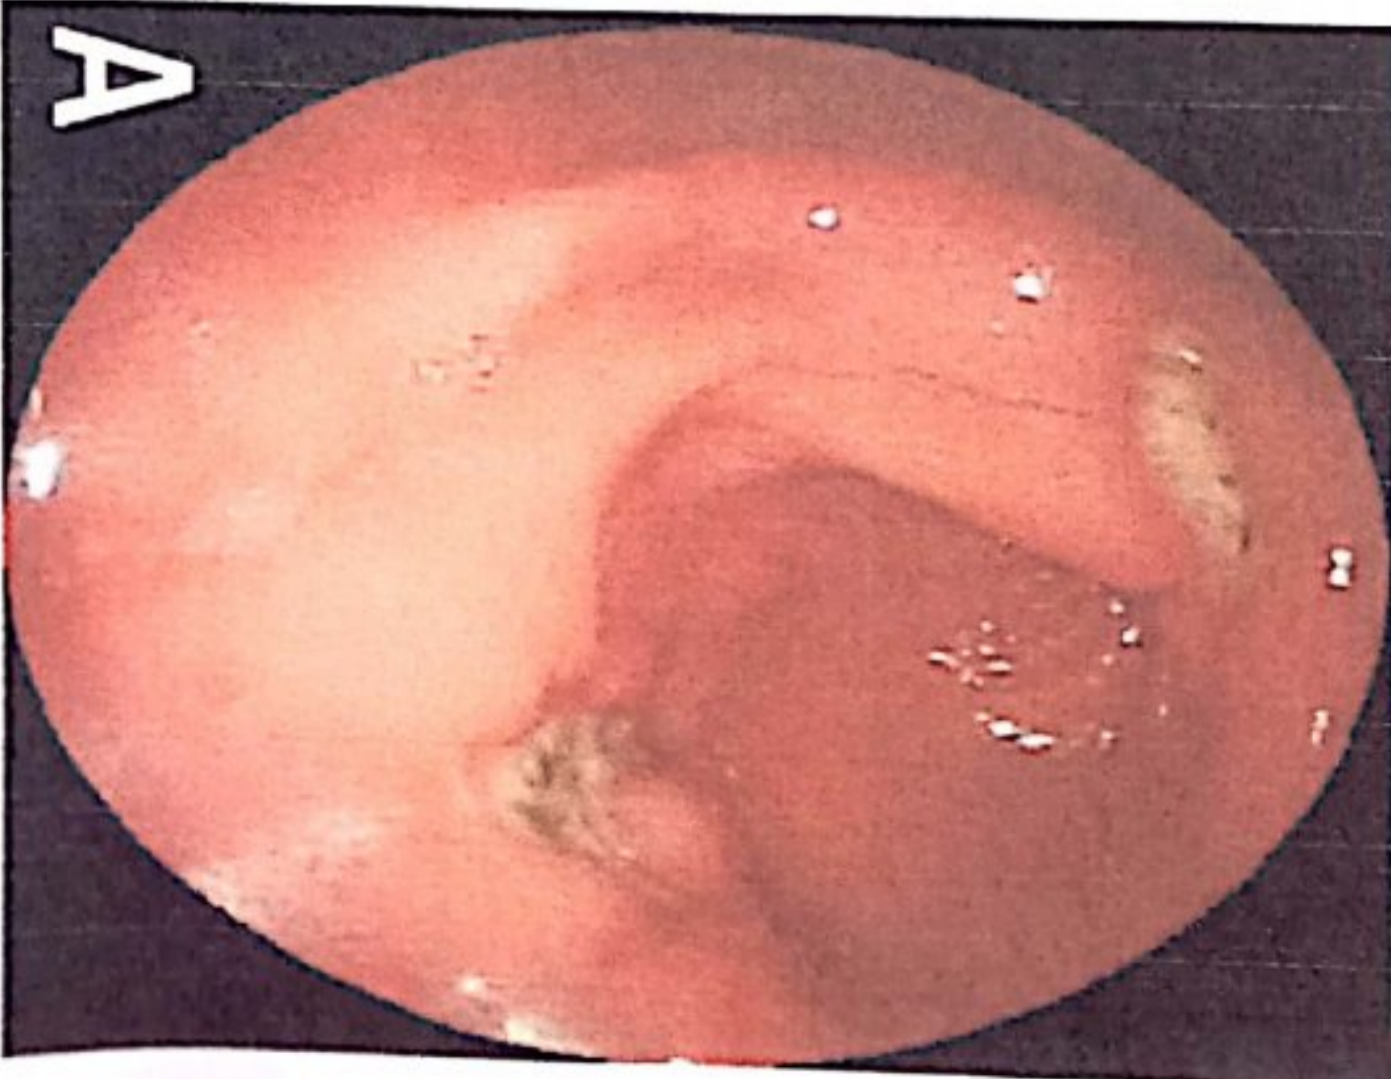

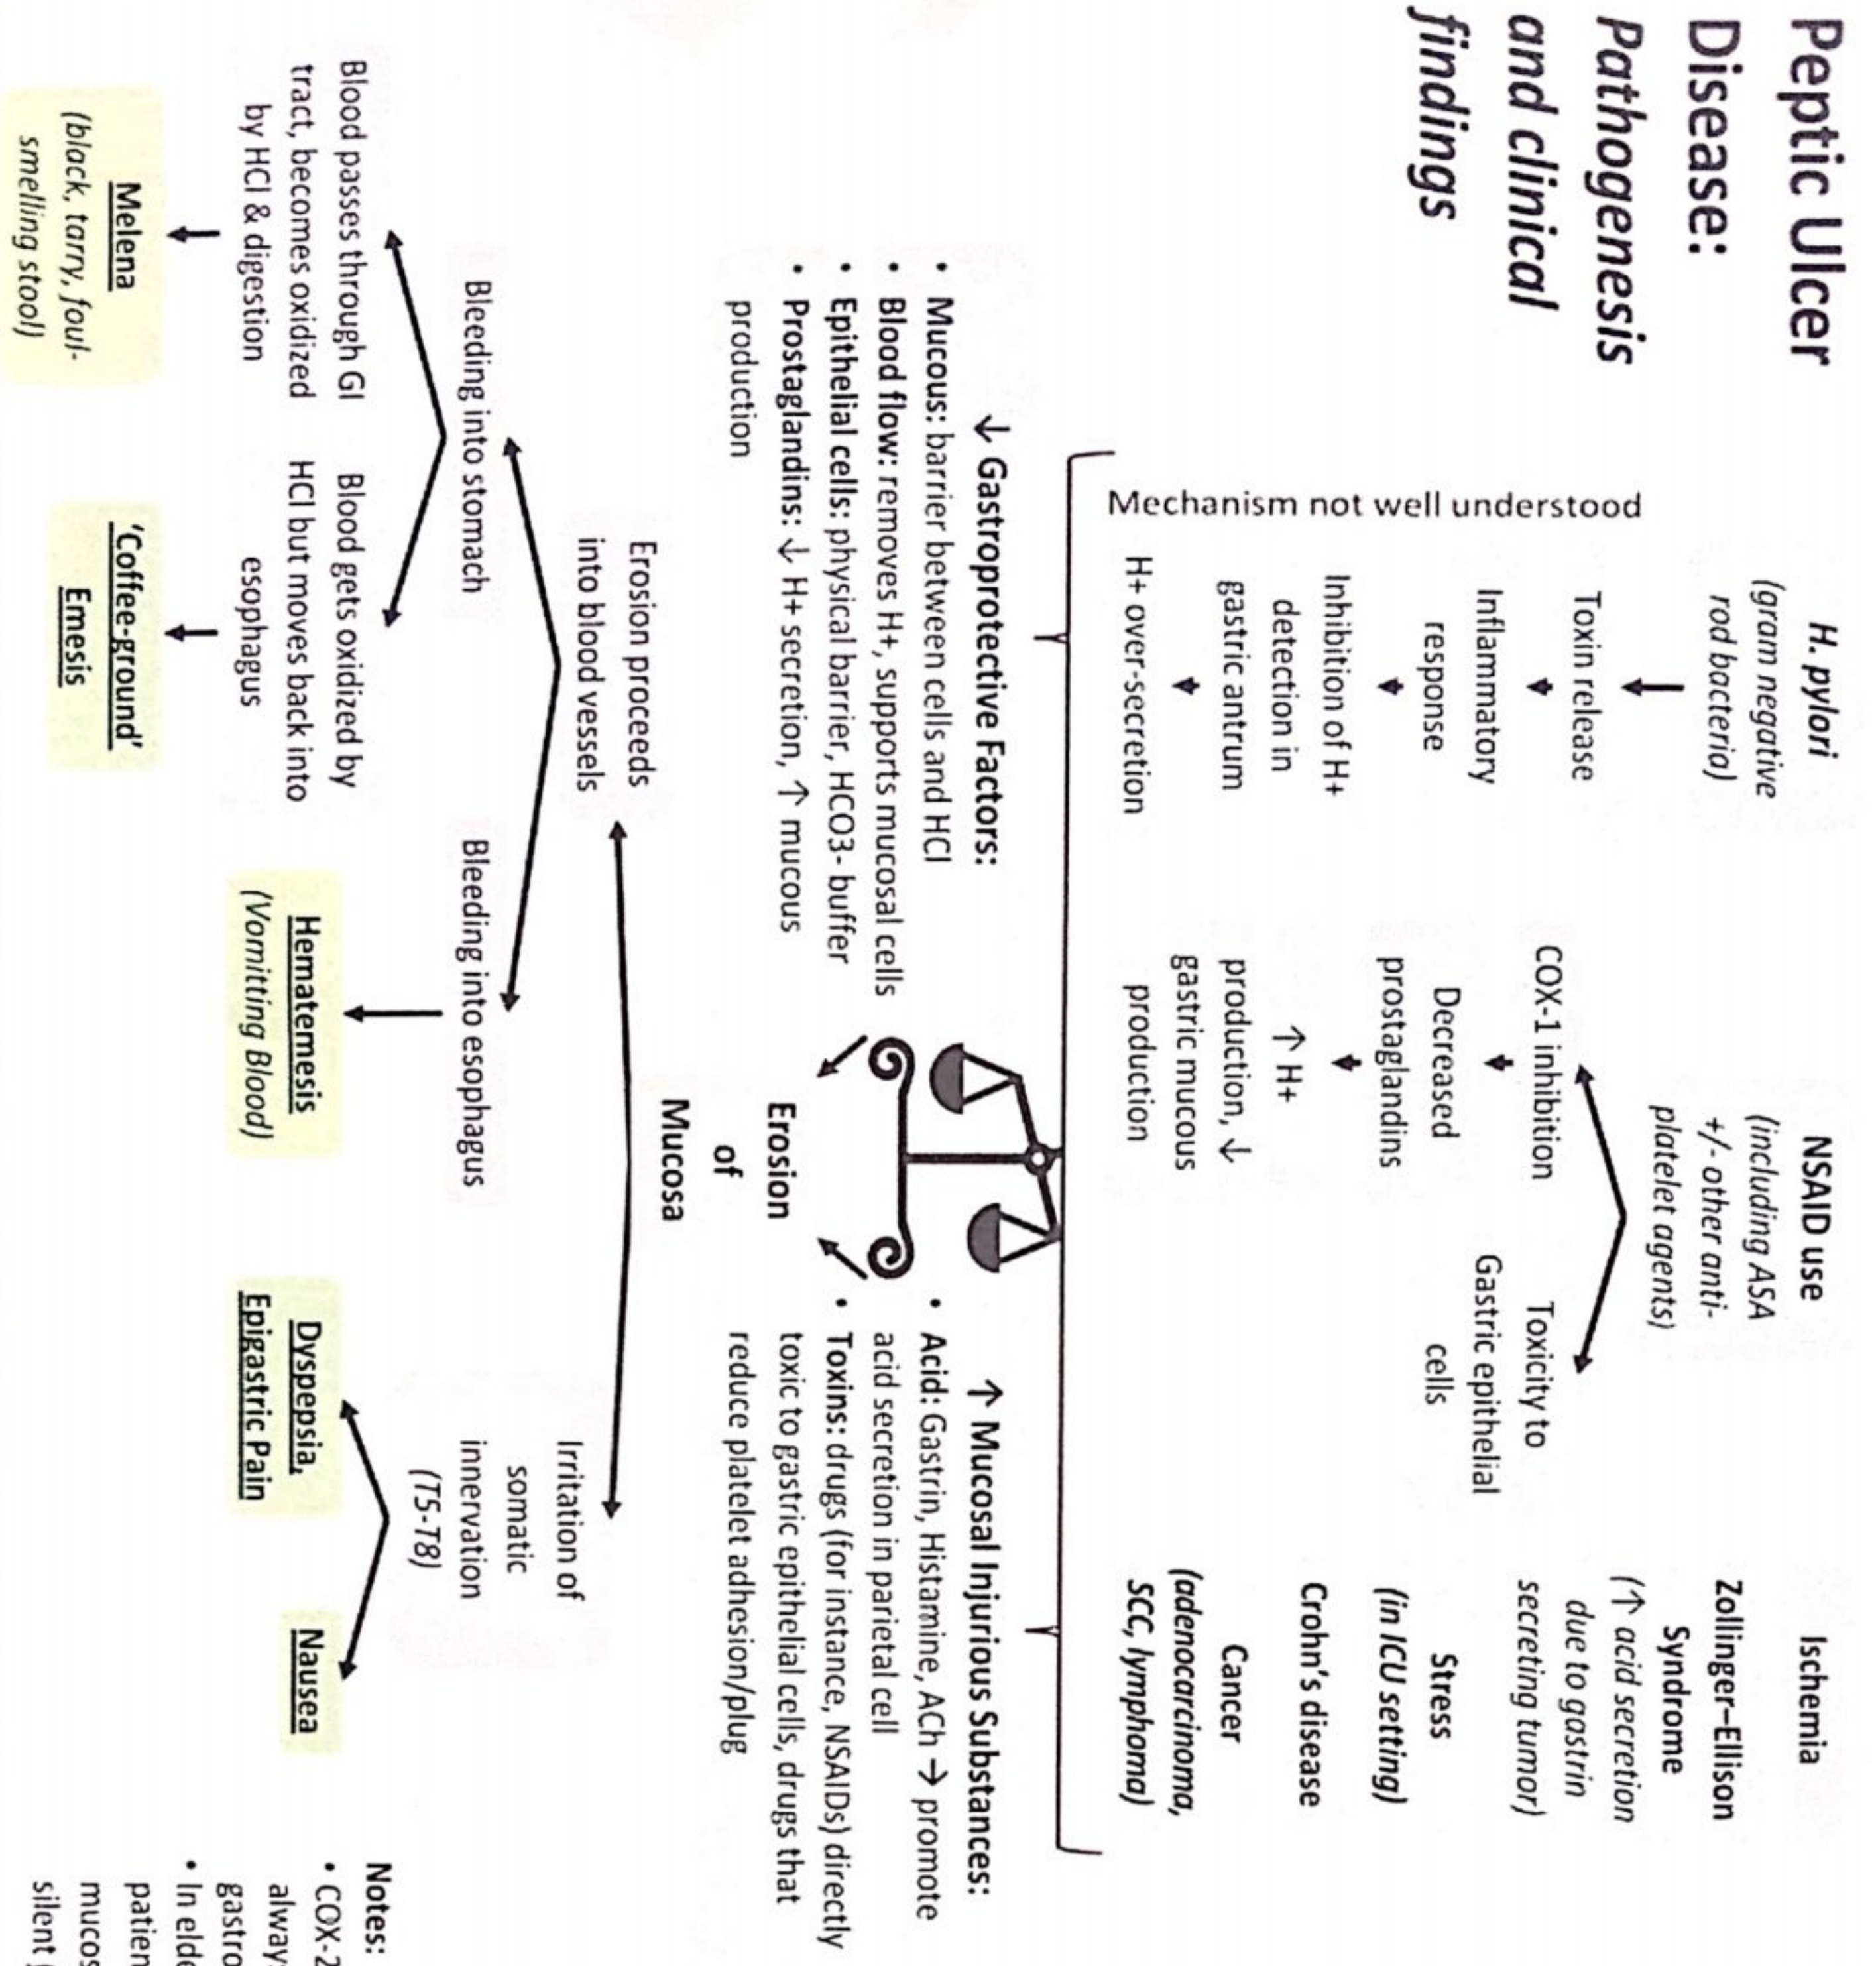

BROWN PIGMENTED STONES

# HEMIPLEGIA

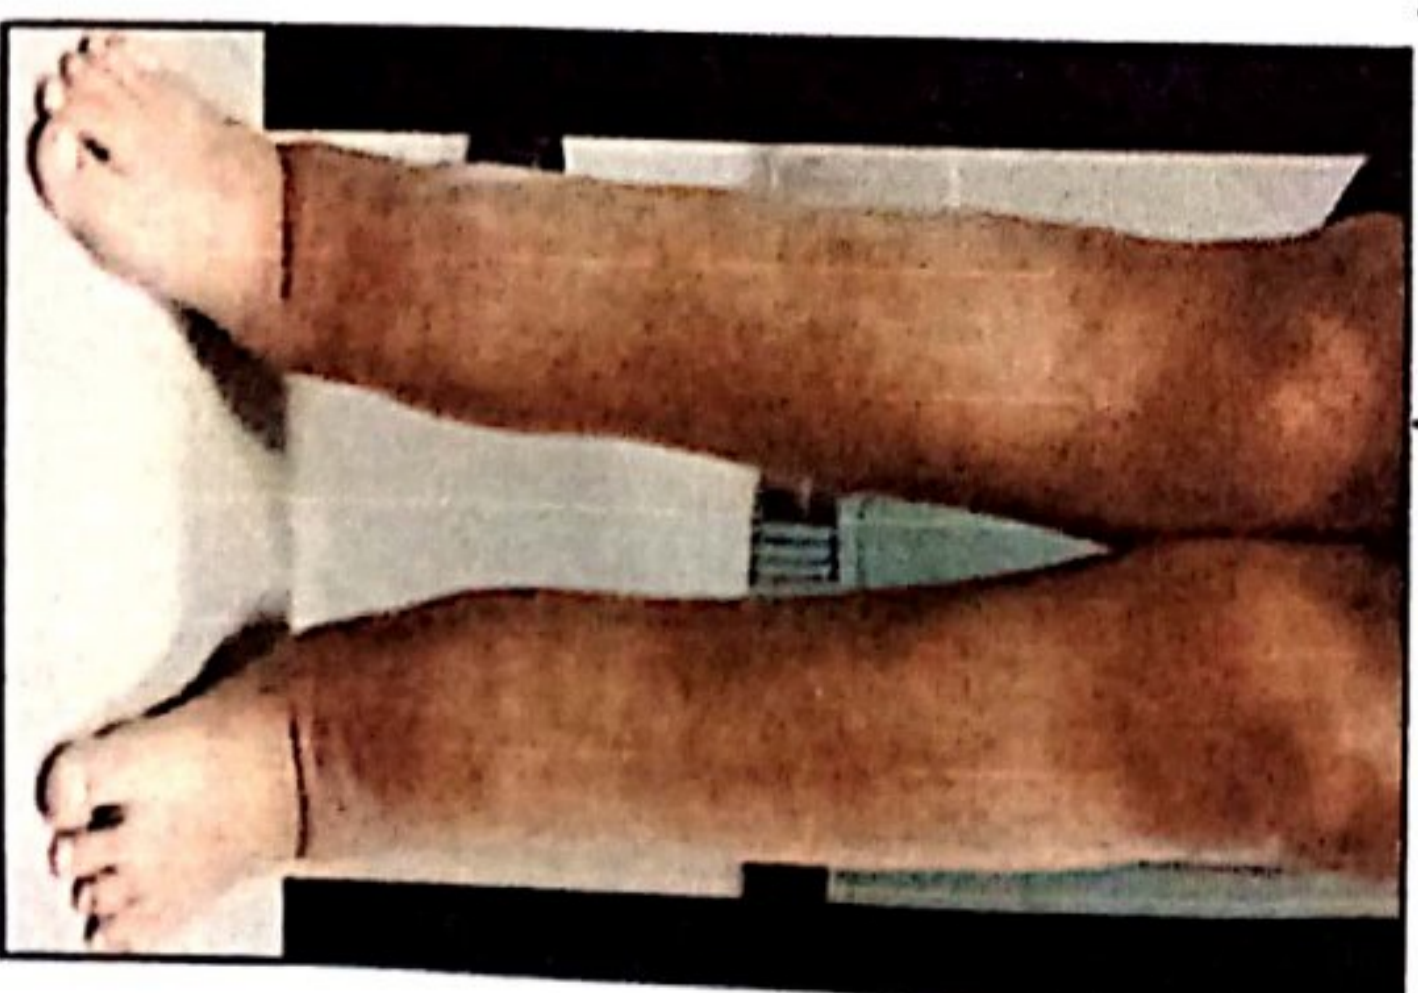

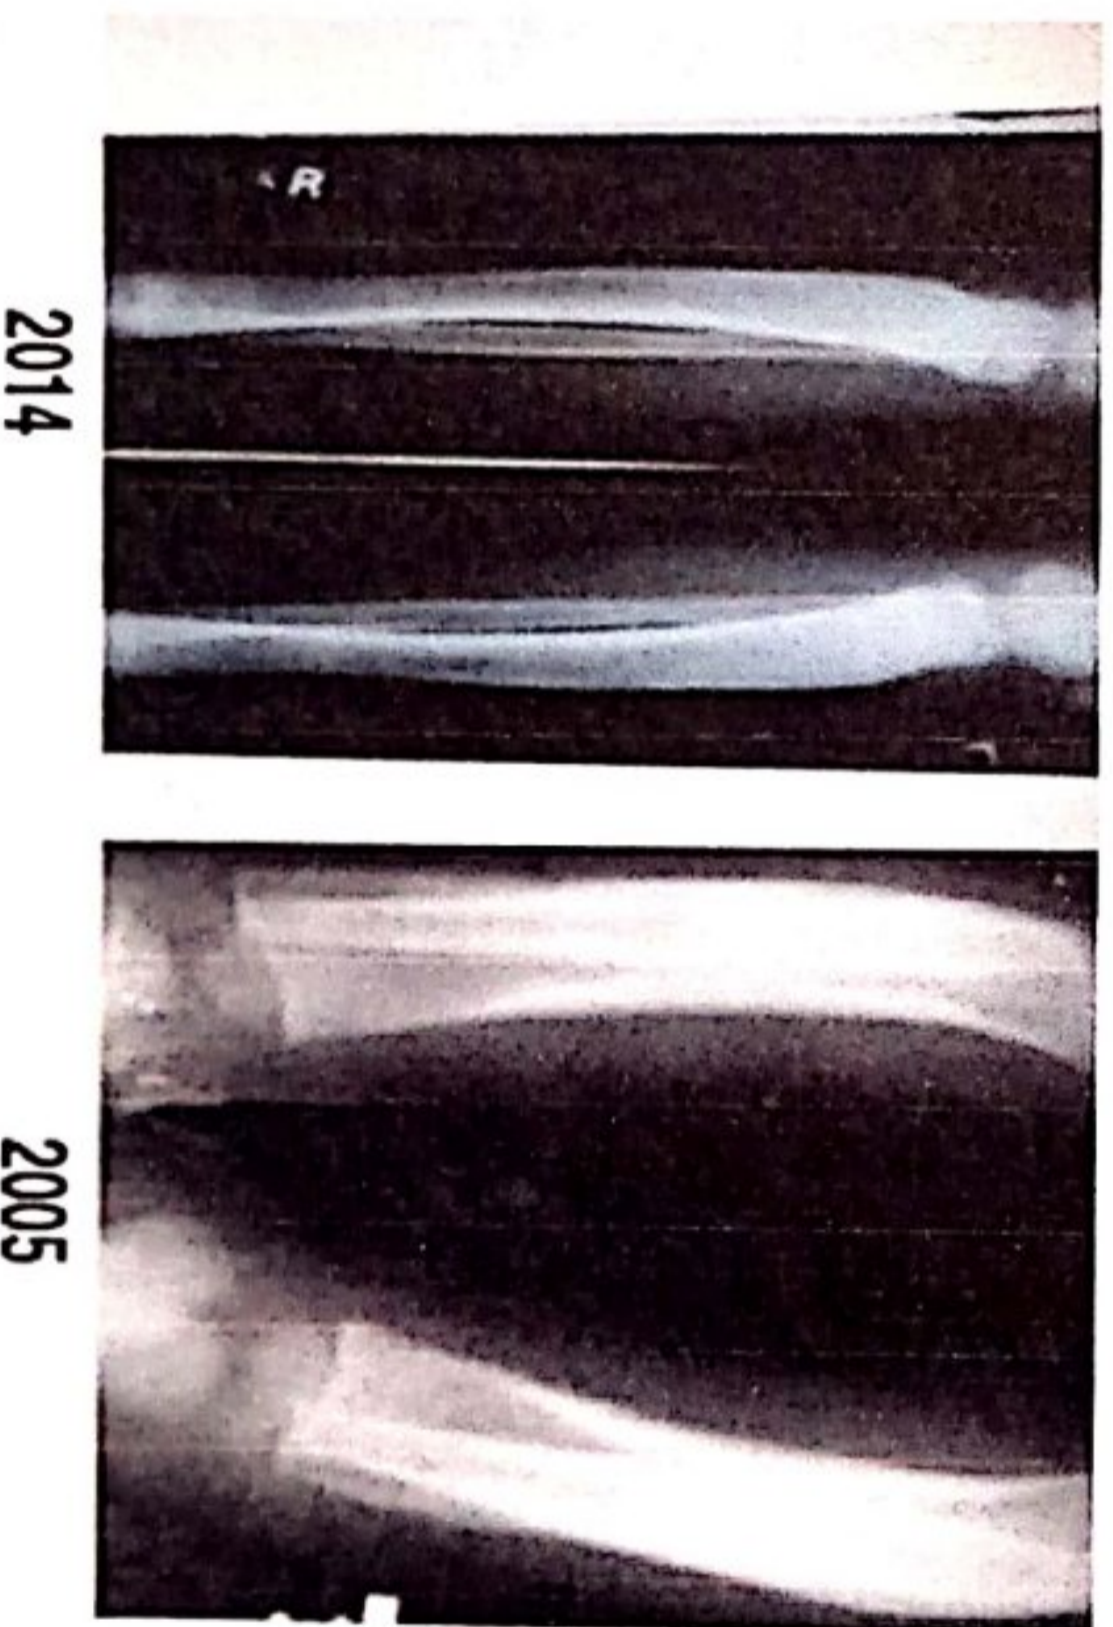

- Definition – Paralysis of one side of the body due to pyramidal tract lesion at any point from its origin in cerebral cortex down to the 5<sup>th</sup> cervical segment.
- Signs & symptoms –
  - Difficulty with gait
  - Increasing stiffness of muscles
  - Difficulty with speech
  - Muscle spasms

# GHOSAL SYNDROME

- Definition –
- Ghosal hemodysplasia, is a rare, autosomal recessive disease, characterized by diaphyseal dysplasia and metaphyseal dysplasia of the long bones and refractory anemia.
- It is associated with a deficiency of Thromboxane-A synthase, which produces Thromboxane A<sub>2</sub>.
- Symptoms –
  - Anemia
  - Thrombocytopenia
  - Leukopenia
  - Hypocellular bone marrow

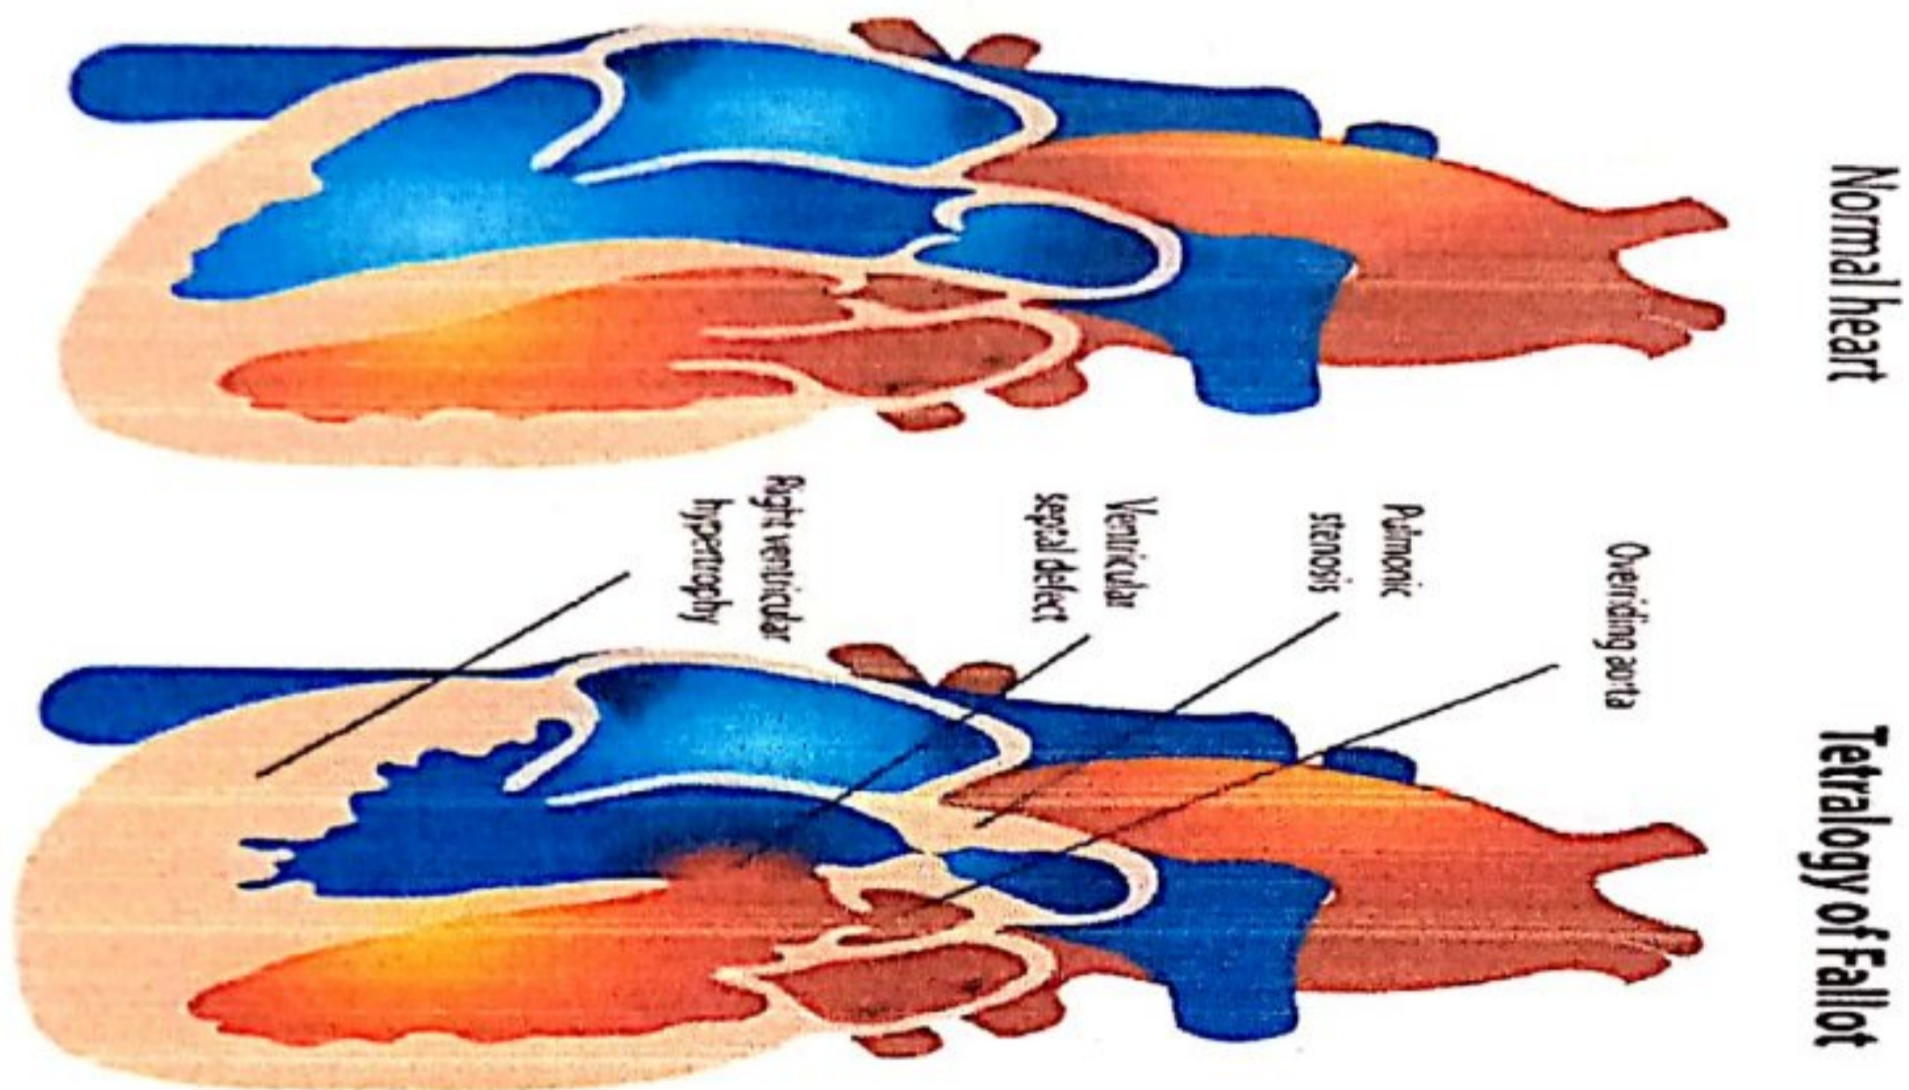

# Tetralogy of Fallots

## Tetralogy of Fallot

Tetralogy of Fallot (TOF) is the most common cyanotic congenital heart disease (CHD) affecting ~3 out of 10,000 live births (7-10% of all CHD)

- Pulmonary outflow tract obstruction
- Ventricular septal defect
- Overriding aorta
- Right ventricular hypertrophy

# Fatal Fours of Fallot

Tetralogy of Fallot

Fatal Fours of Fallot

1. Right Ventricular Hypertrophy

EEE Can't PUSH Through...  
Despite my Hypertrophied Musculature...

Right to left Shunt

3. VSD (Ventricular Septal Defect)

Yeaah Nothing can Pass through me...

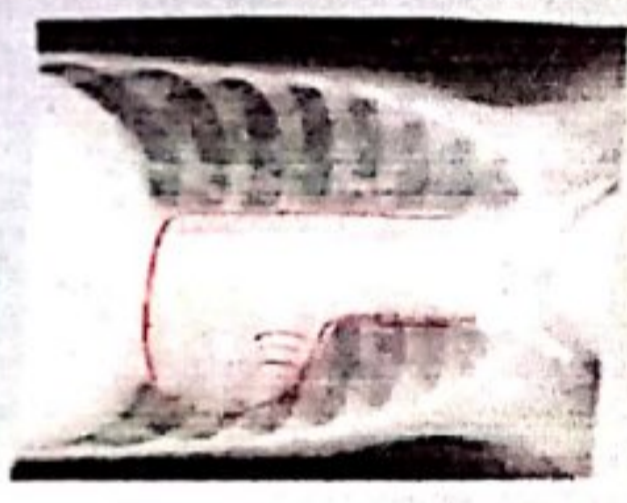

2. Right ventricular outflow Tract obstruction  
Creative-Med-Doses

Get us Oxygen... We are turning Blue..

Hypoxemia is rising...not our Fault...huh...

We don't get much blood to Oxygenate

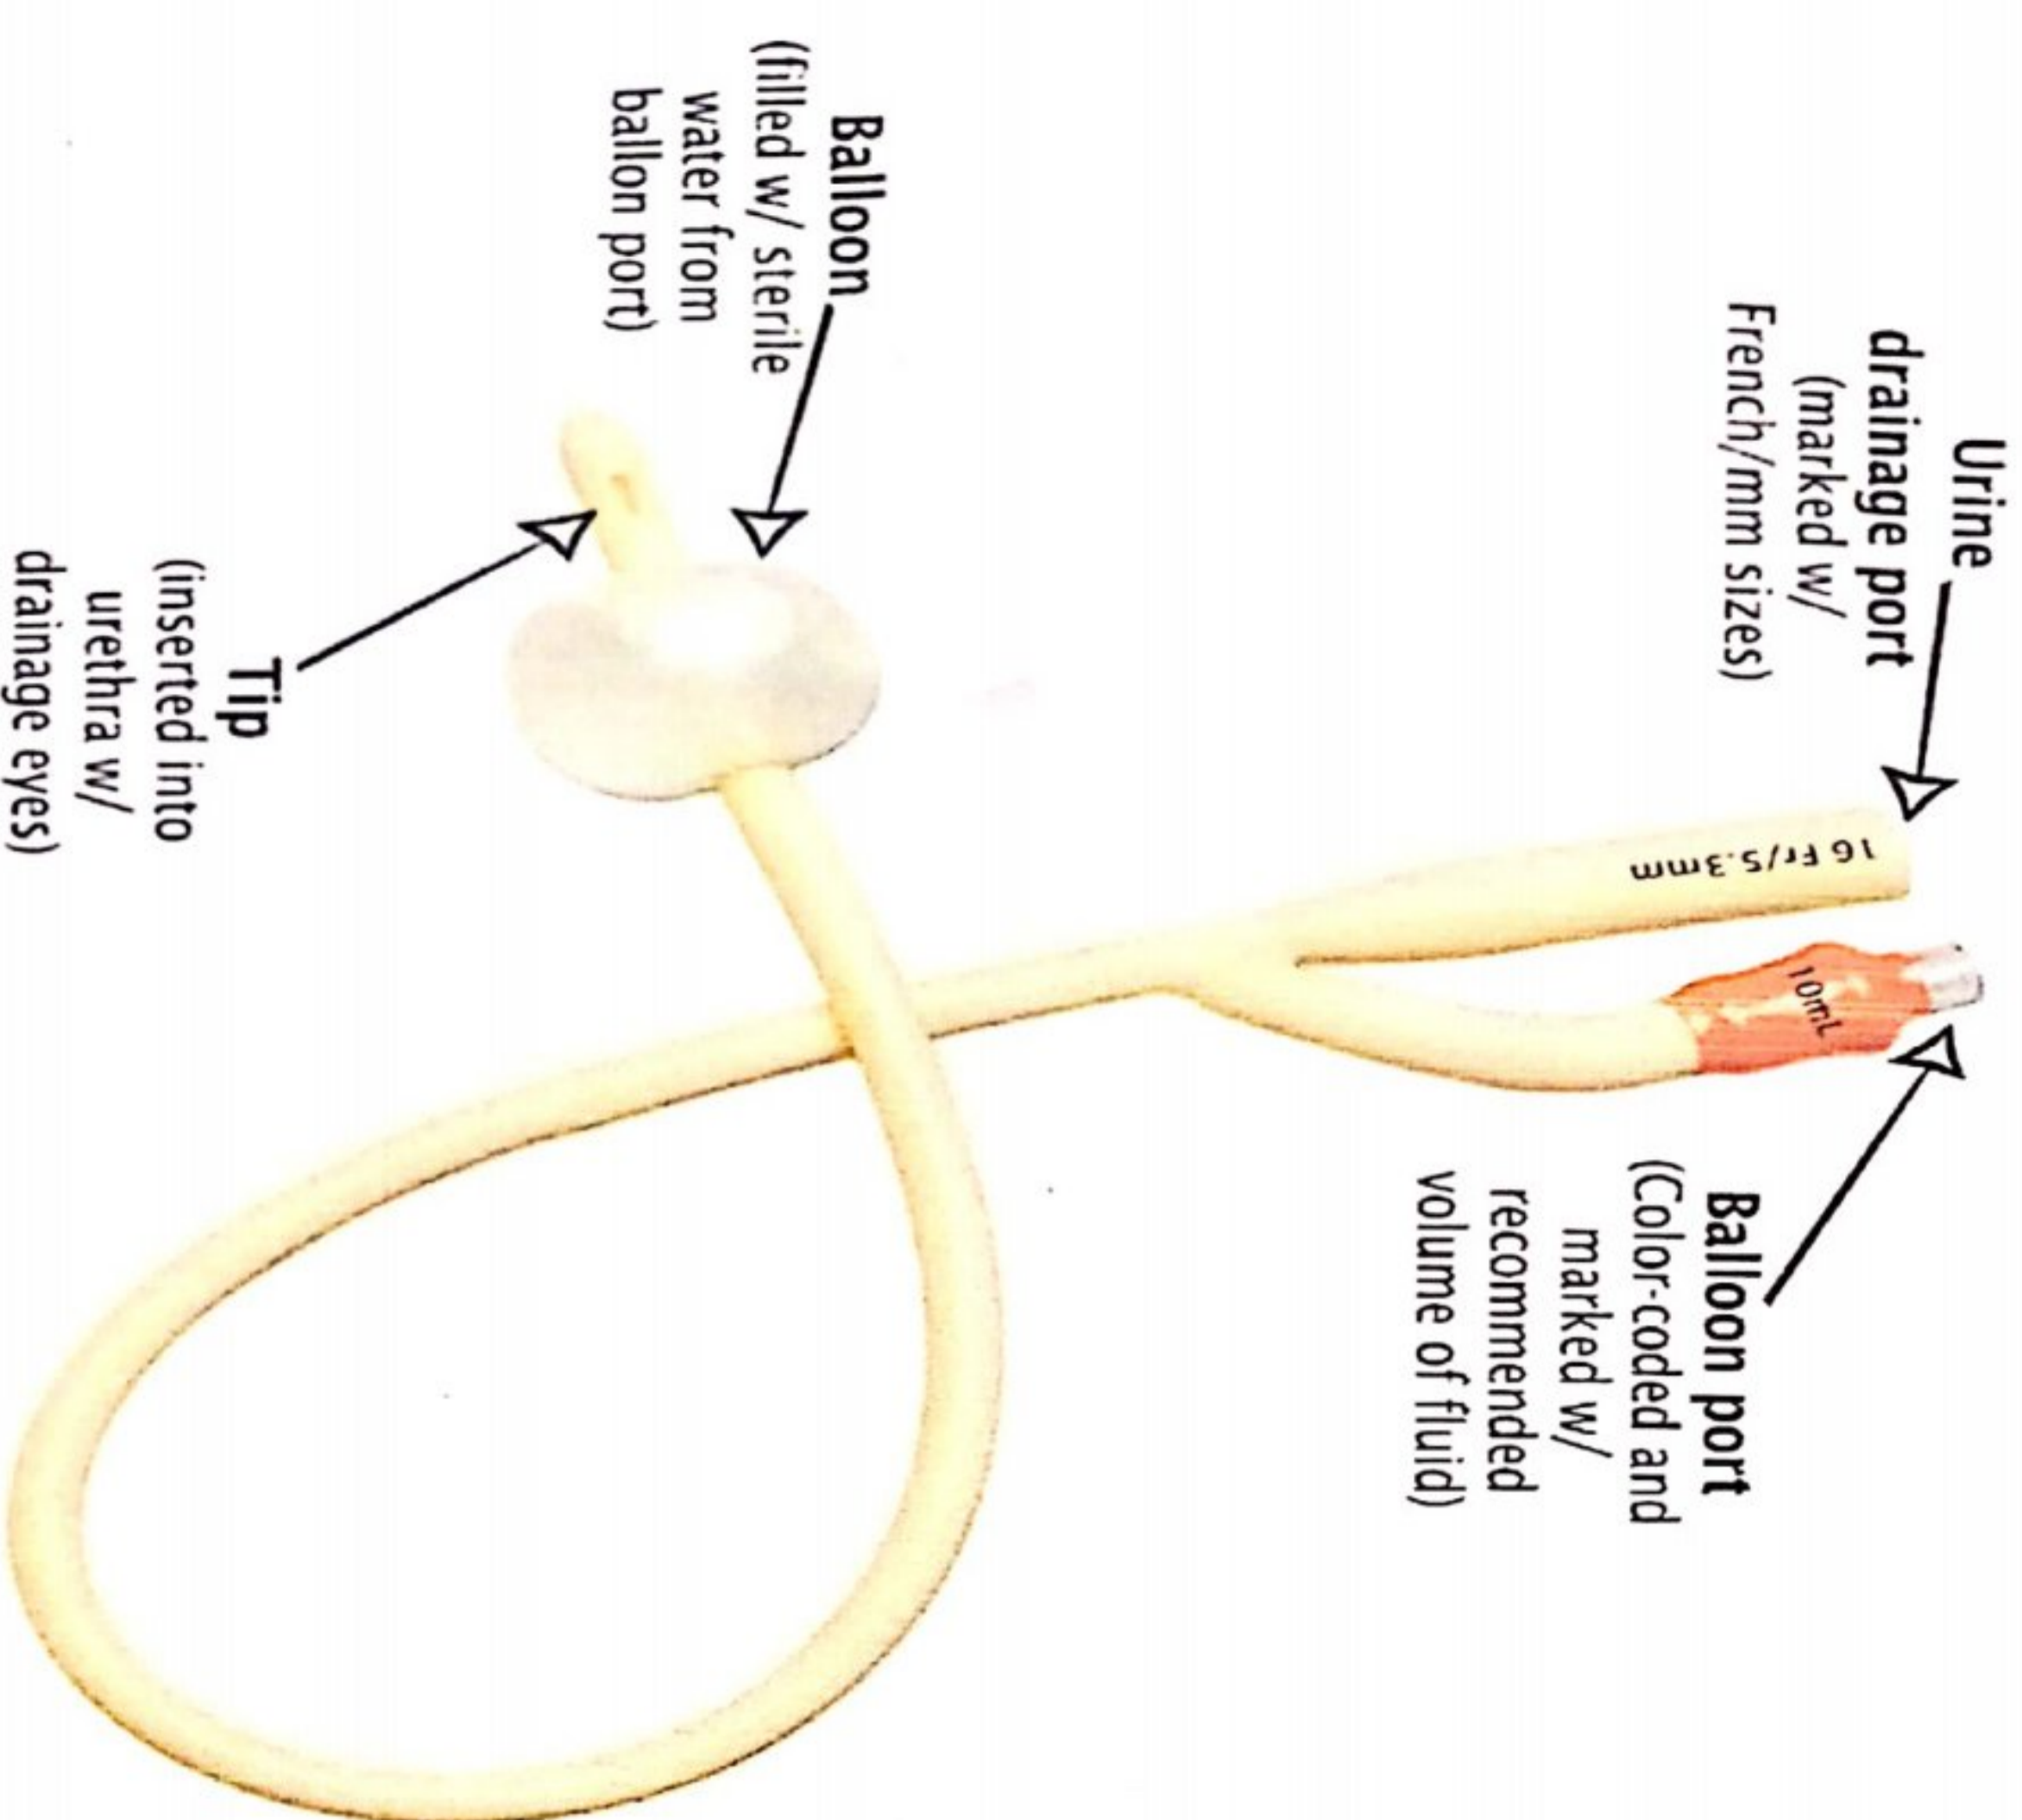

Hypoxemia  
Exercise/ crying / feeding  
Leads to cyanotic spell

Boot shaped heart On X ray

# • Foley's Catheter

## Foley's Catheter

### • Uses of Foley's Catheter :

- To pass per urethrally in retention of urine of any cause (BPH, stricture, trauma).
- To measure the urine output in renal failure, postoperative patients, terminally ill patients.
- Percutaneous cystostomy;
- Cholecystostomy;
- To drain fistulas.
- It is used for continuous drainage of bladder in cases with - (I) Eclampsia, (ii) retroverted gravid uterus
- In the management of atonic PPH and to control atonic PPH

## राष्ट्रीय होम्योपैथी आयोग

**National Commission for Homoeopathy**Jawahar Lal Nehru Bhartiya Chikitsa Avum Homoeopathy Anusandhan Bhavan  
No 61-65, Institutional Area, Opp. 'D' Block, Janakpuri, New Delhi-110 058

F.No.3-1/2021-NCH (HEB)/ 151-152

Dated

12 AUG 2021

To

1. The Registrar of all the Universities (including Deemed Universities), having Homoeopathic Faculties ( or Department/Boards)
2. The Principal of all Homoeopathic Medical Colleges.

**Sub: Cooperation for Azadi ka Amrit Mahotsav-reg.**

Sir,

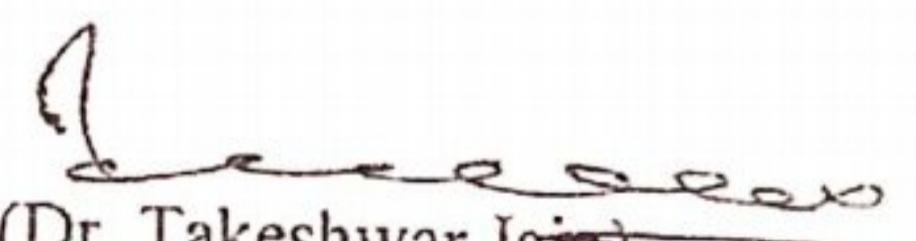

It has been decided by the Govt. of India to celebrate 'Azadi ka Amrit Mahotsav' for which guidelines have been issued by the Ministry of AYUSH vide their letter No. X-18030/201/2020(Part 1)-CND dated 10.08.2021. The Mahotsav will commence from 15.08.2021. The Mahotsav will be celebrating throughout the year and a week has been earmarked for the activities of AYUSH Ministry. AYUSH week will be celebrated from 30.08.2021 to 05.09.2021. During this week various activities related to AYUSH streams will be conducted. The information of the same will be made available from time to time.

All the Universities/ Homoeopathic Colleges are directed that they should associate with minimum 100 (or more) Primary, Middle and Senior Secondary Schools and interact with the students and to aware them about the basics of AYUSH systems of medicine and AYUSH medical streams. All efforts are to be made to implement the scheme. The information based on the enclosed letter, regarding consents of the schools and colleges participating with the scheme and details of the students associated with this programme, be forwarded on the email (nchindia123@gmail.com) of the Commission by 21.08.2021.

The said activity is compulsory for all the Universities/Colleges. The cooperation of all teachers and interns are solicited in this Mahotsav.

Thanking You,

Yours Sincerely

(Dr. Takeshwar Jain) 12/8/2021  
Secretary I/C

President, Homoeopathy Education Board,  
NCH
