

UNITS :- MEDICAL EDUCATION TECHNOLOGY UNIT (METU) (Annexure 30)

List of equipment required in Medical Education Technology Unit (See sub-clause C. (2.) of sub-regulation C of Schedule-I of regulation 5) Space for teachers and supporting staff- 40 sq.mt.				
Functions of the department shall, inter alia, be as follows, namely:-				
Curriculum planning and implementation of Competency Based Dynamic Curriculum as directed by the Commission;		Yes	Verified	
Evaluation of teaching and training programme;		Yes		
Conduct workshop for faculty in areas of medical education technology;		Yes		
Conducting research in Medical Education.		Yes		
S.No.	Medical Education Technology Unit (METU)	Quantity	Available	Verified
1.	Smart board	1	1	
2.	Computer with latest configuration	2	2	
3.	Round tables	2	2	
4.	Chairs	10	10	
5.	Printer and scanner	1 each	1	
6.	Over head projectors	1	1	
7.	Books and journals on Medical Education Technology -: Physical and soft copy procured online	10 copies	10	
8.	Stationary	As required	Available	
*Certificate of Participation in periodical training on technology used in teaching of each faculty shall be documented

CBDC Curriculum

SLO's (Specific Learning Outcomes)

Dr. Gholap K.V.

Principal, Professor AKHMC& H, Alephata, Pune

Ref. Zone-wise training program conducted for CBDC Curriculum on 16th Feb 2023 at D.Y. Patil HMC, Pune.
This training is to learn SLO's of CBDC curriculum like Miller's Pyramid like different competency levels – Knows, Knows How etc, & Bloom's Taxonomy for planning & conducting theory & practical.

1. Education as a system –

Education process is a complete & continuous process.

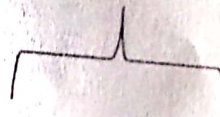

It has a chief goal.

To bring desirable changes.

In the behaviour of learners.

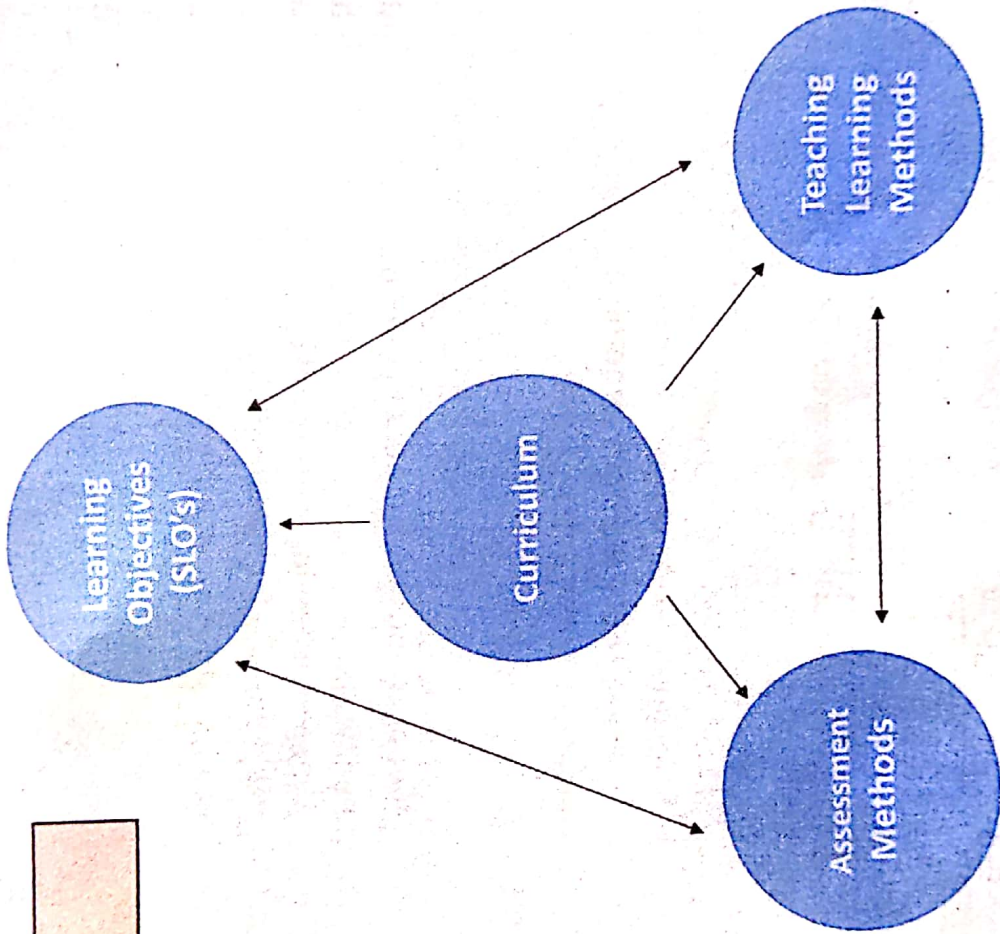

On relatively permanent basis.

By way
of

Acquiring Knowledge
Improving Skills.
Developing attitude.

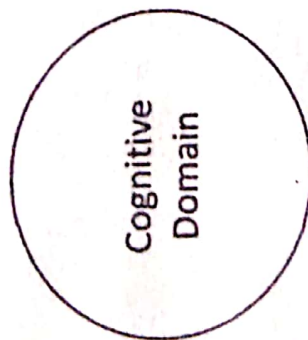

CBDC Curriculum has 3 components

Specific Learning Objectives of CBDC Curriculum -

Bloom's Domain of learning or Blooms Taxonomy

Learning components are classified into 3 basic steps as follows.

If brain is becoming active
Thinking or Understanding something
Thinking & getting Knowledge

If your various organs are becoming active.
They are showing some activity
Skill based + Thinking (Mind)

Bloom's Taxonomy is a hierarchical framework developed in 1956 by Benjamin Bloom to classify educational learning objectives into levels of cognitive complexity, ranging from basic knowledge recall to higher-order thinking. Revised in 2001, the six levels are: **Remember, Understand, Apply, Analyse, Evaluate, and Create**. It helps educators structure curricula and assessments.

Along with skill & thinking feelings are coming. & Communication is becoming active.
Skill + Thinking + Communication + Emotions + Attitude & Values

Bloom's Taxonomy, categorizes learning into three domains—Cognitive (knowledge/thinking), Affective (attitudes/feelings), and Psychomotor (skills/actions)—ranging from simple to complex processes. It helps educators set learning objectives, with the Cognitive domain to include: Remembering, Understanding, Applying, Analysing, Evaluating, and Creating.

THE THREE DOMAINS OF LEARNING

Cognitive Domain

Focuses on knowledge and intellectual skills. It involves processes like remembering, understanding, applying, analyzing, evaluating, and creating.

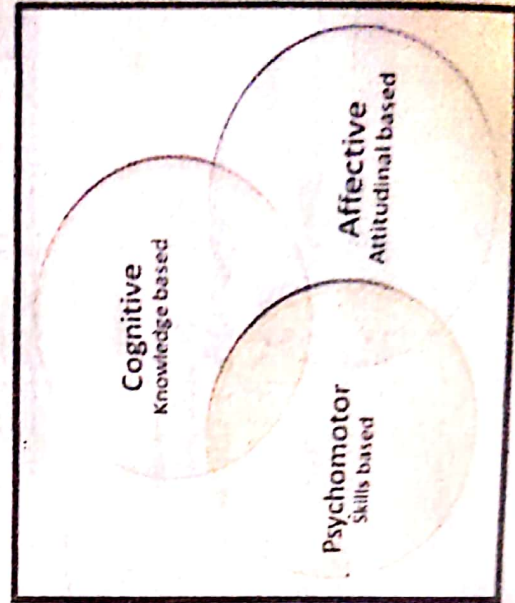

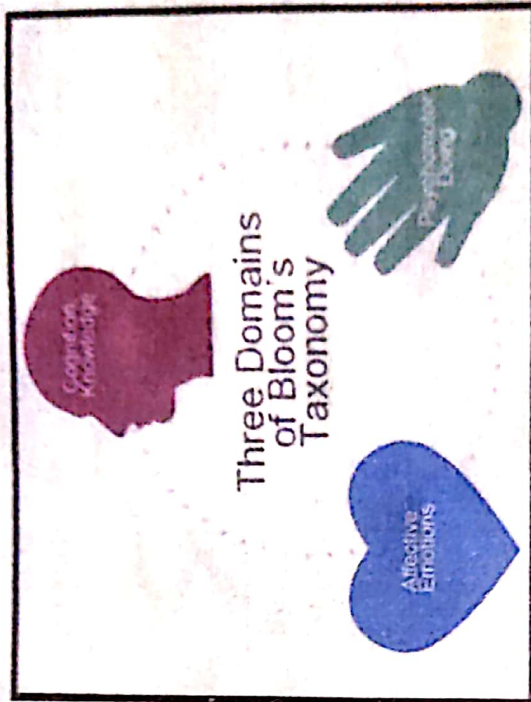

Affective Domain

Relates to emotions, attitudes, and values. It includes receiving, responding, valuing, organizing, and internalizing values.

Psychomotor Domain

Involves physical skills and motor activities, such as coordination, precision, and using tools or instruments effectively.

Adapted from Blooms Taxonomy

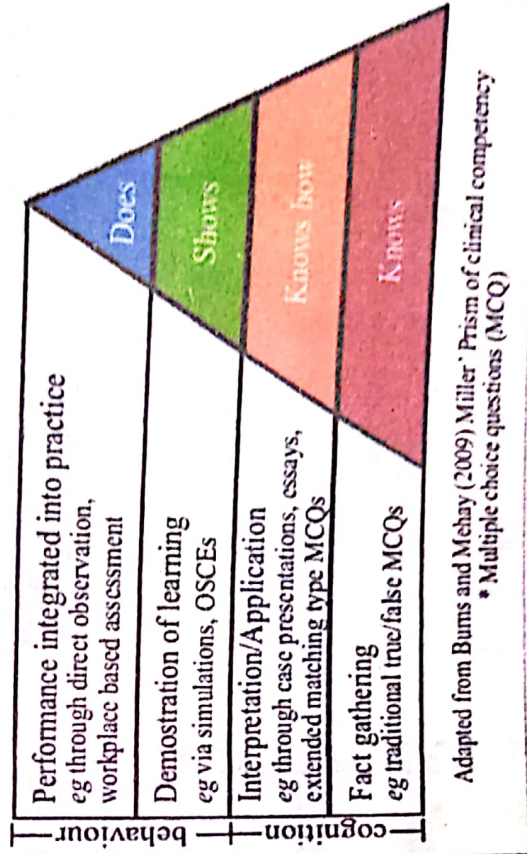

Miller's Pyramid -

Miller's pyramid, developed by George Miller in 1990, is a foundational, four-tiered framework for assessing clinical competence in medical education, mapping a learner's progression from possessing knowledge to independent practice. It structures competence hierarchically, moving from knowing, to knowing how, showing how, and finally, doing.

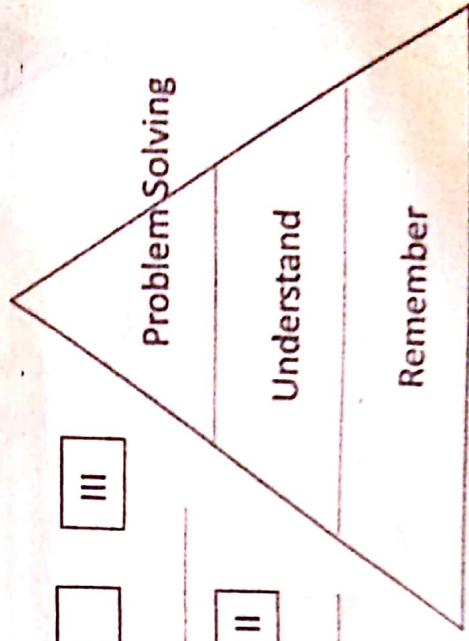

IT consist of 4 levels -

1. **Level I - Knows (Knowledge):** Assesses the knowledge base, typically through written exams or MCQs.
2. **Level II - Knows How (Competence):** Assesses the ability to apply knowledge, often measured through scenarios, data interpretation, and case studies.
3. **Level III - Shows How (Performance):** Assesses the ability to demonstrate skills, usually in simulated, controlled settings like OSCEs (Objective Structured Clinical Examinations).
4. **Level IV - Does (Action):** Assesses the actual, independent practice of skills in real-world clinical settings, monitored through direct observation or workplace-based assessments.

Miller's Pyramid of Competency evaluation through Performance

Gilbert's Hierarchy or **Gilbert's Levels of learning** - Gilbert's Hierarchy is a tool that describes the various levels of learning that can be mapped in the 3 domains of learning - cognitive psychomotor & affective. There are also other tools of education that demonstrate the progression of learning such as Bloom's Taxonomy & Miller's Pyramid. All these tools have their strength for discerning the different levels.

Cognitive Domain -

III

Evolve totality of Symptoms

II

Differentiate between Common & Uncommon symptoms

I

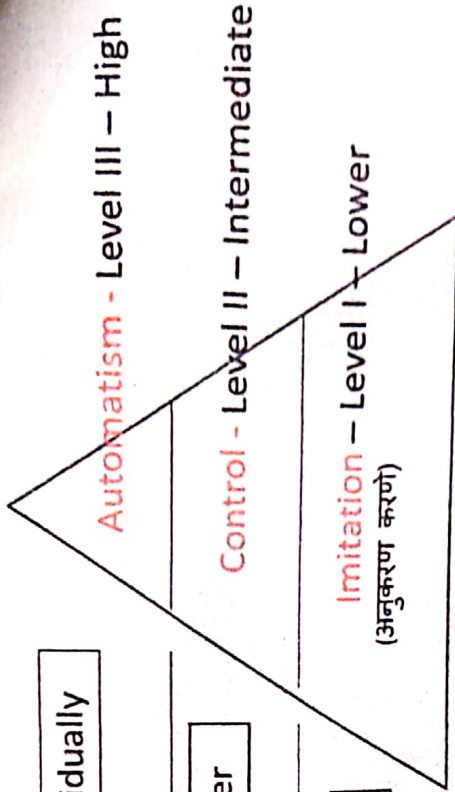

Define common symptoms

Psychomotor Domain -

To perform auscultation individually

To perform auscultation in presence of teacher

To observe teacher for sequences of auscultation of breath sounds.

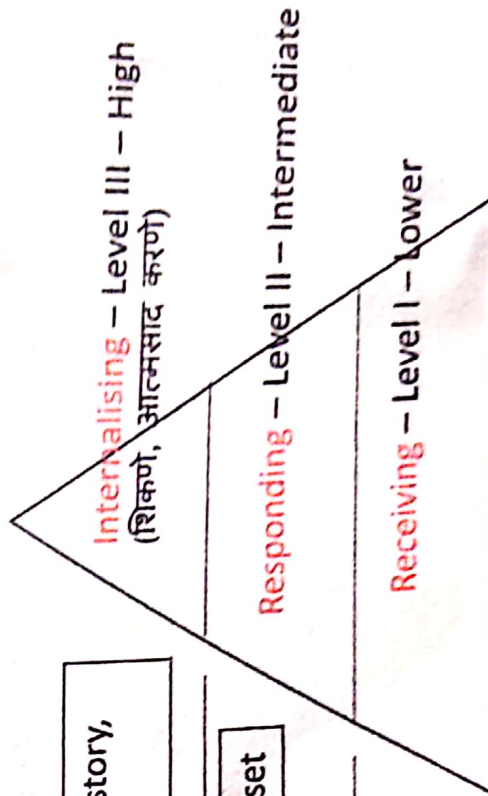

Affective Domain -

Recognise the anxiety of a patient before starting history, talking & reassure him/her at outset.

Respond to the anxiety of a patient, reassure him/her at outset

Listen to the patient with empathy during history taking

Medical Education Training 2024-2025

Date :- 10/08/2025

Time:- 11: 00 am

Venue:- AKHMC, Seminar Hall

MET was conducted by Dr. Gholap K.V. sir for 1st year senior batch.

80 students were present for the training program. Google form link was shared with students and E- Certificates for participation were generated.

CBDC Curriculum

SLO's (Specific Learning Outcomes)

Dr. Gholap K.V.

Principal, Professor AKHMC& H, Alephata, Pune

Ref. Zone-wise training program conducted for CBDC Curriculum on 16th Feb 2023 at D.Y. Patil HMC, Pune.
This training is to learn SLO's of CBDC curriculum like Miller's Pyramid like different competency levels – Knows, Knows How etc, & Bloom's Taxonomy for planning & conducting theory & practical.

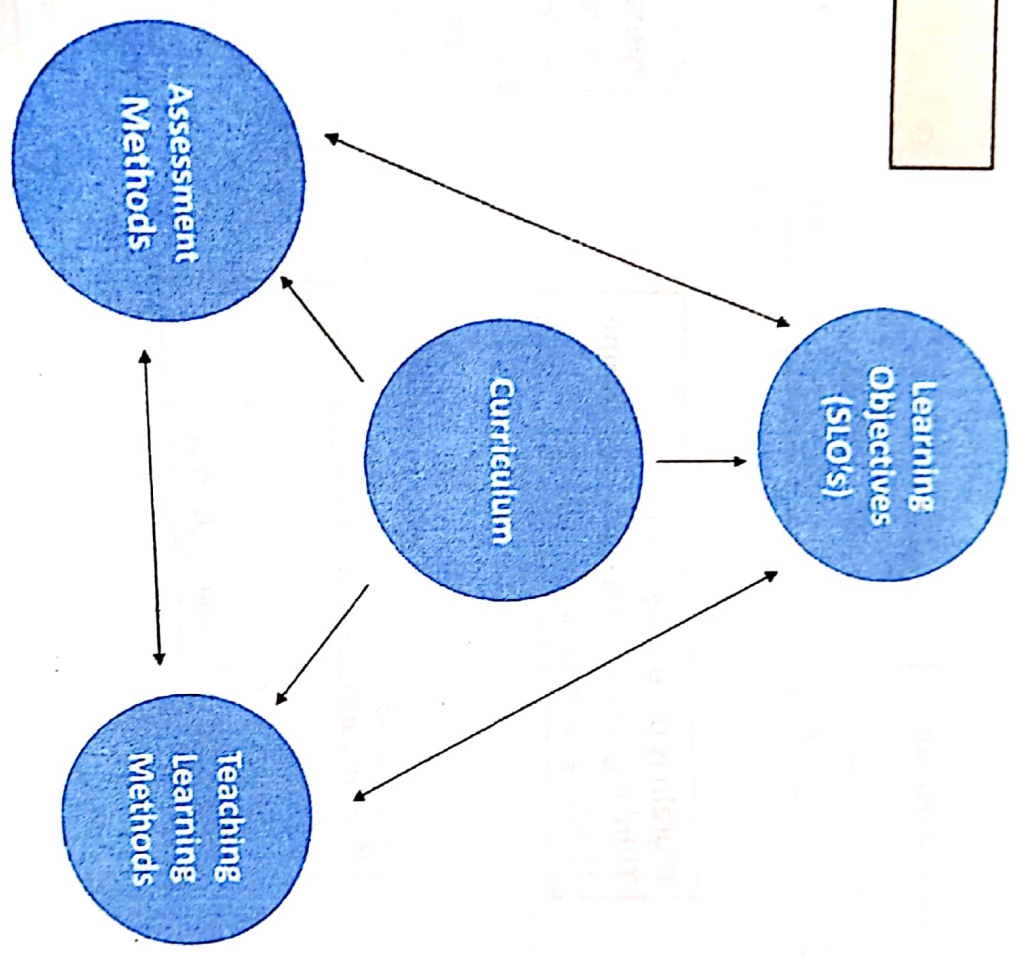

1. Education as a system –
Education process is a complete & continuous process.
It has a chef goal.
To bring desirable changes.
In the behaviour of learners.
On relatively permanent basis.

By way
of

Acquiring Knowledge
Improving Skills.
Developing attitude.

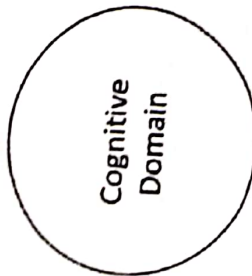

CBDC Curriculum has 3 components

Specific Learning Objectives of CBDC Curriculum -

Bloom's Domain of learning or Blooms Taxonomy

Learning components are classified into 3 basic steps as follows.

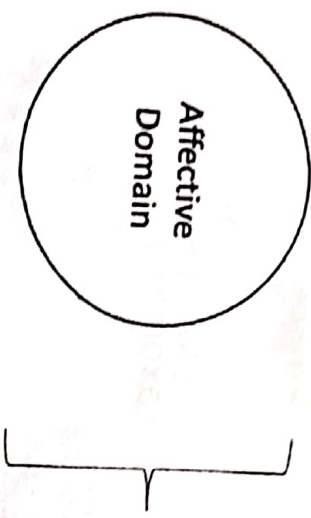

If brain is becoming active
Thinking or Understanding something
Thinking & getting Knowledge

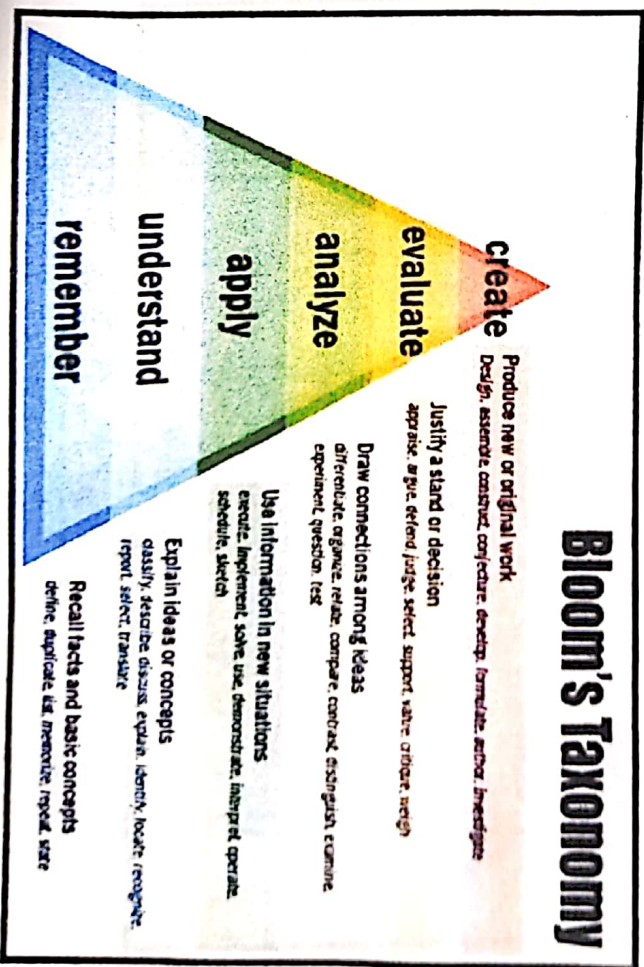

If your various organs are becoming active.
They are showing some activity
Skill based + Thinking (Mind)

Bloom's Taxonomy is a hierarchical framework developed in 1956 by Benjamin Bloom to classify educational learning objectives into levels of cognitive complexity, ranging from basic knowledge recall to higher-order thinking. Revised in 2001, the six levels are: **Remember, Understand, Apply, Analyse, Evaluate, and Create.** It helps educators structure curricula and assessments.

Along with skill & thinking feelings are coming. & Communication is becoming active.
Skill + Thinking + Communication + Emotions + Attitude & Values

Bloom's Taxonomy, categorizes learning into three domains—Cognitive (knowledge/thinking), Affective (attitudes/feelings), and Psychomotor (skills/actions)—ranging from simple to complex processes. It helps educators set learning objectives, with the Cognitive domain to include: Remembering, Understanding, Applying, Analysing, Evaluating, and Creating.

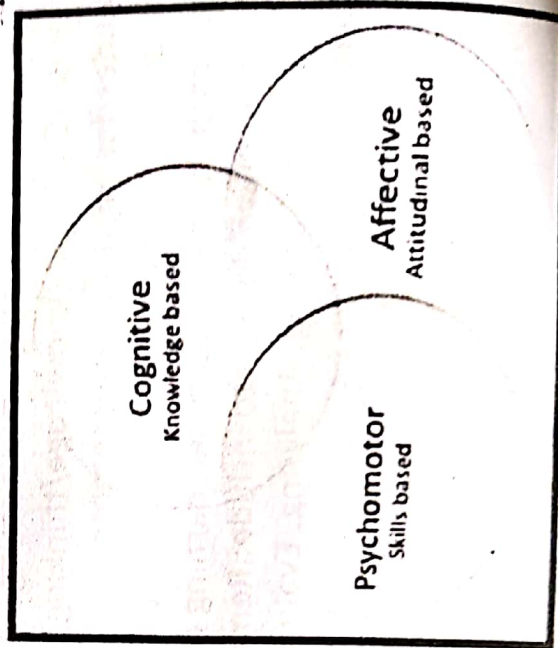

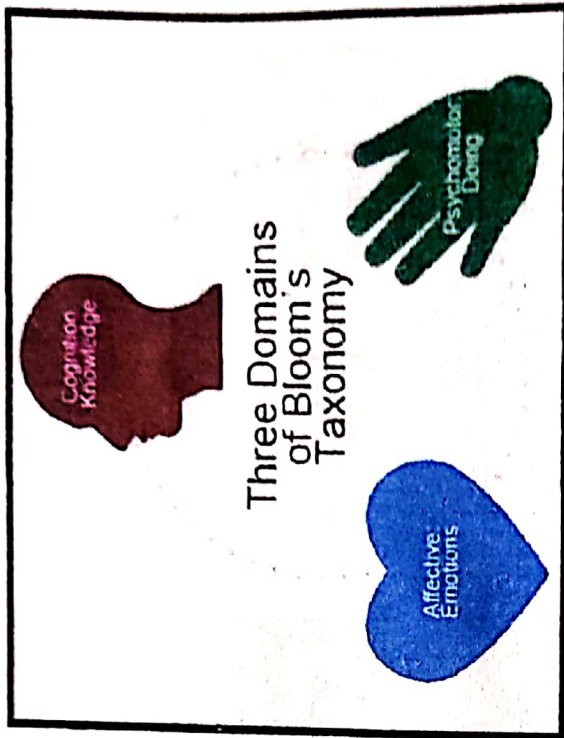

THE THREE DOMAINS OF LEARNING

Cognitive Domain
 Focuses on knowledge and intellectual skills. It involves processes like remembering, understanding, applying, analyzing, evaluating, and creating.

Affective Domain
 Relates to emotions, attitudes, and values. It includes receiving, responding, valuing, organizing, and internalizing values.

Psychomotor Domain
 Involves physical skills and motor activities, such as coordination, precision, and using tools or instruments effectively.

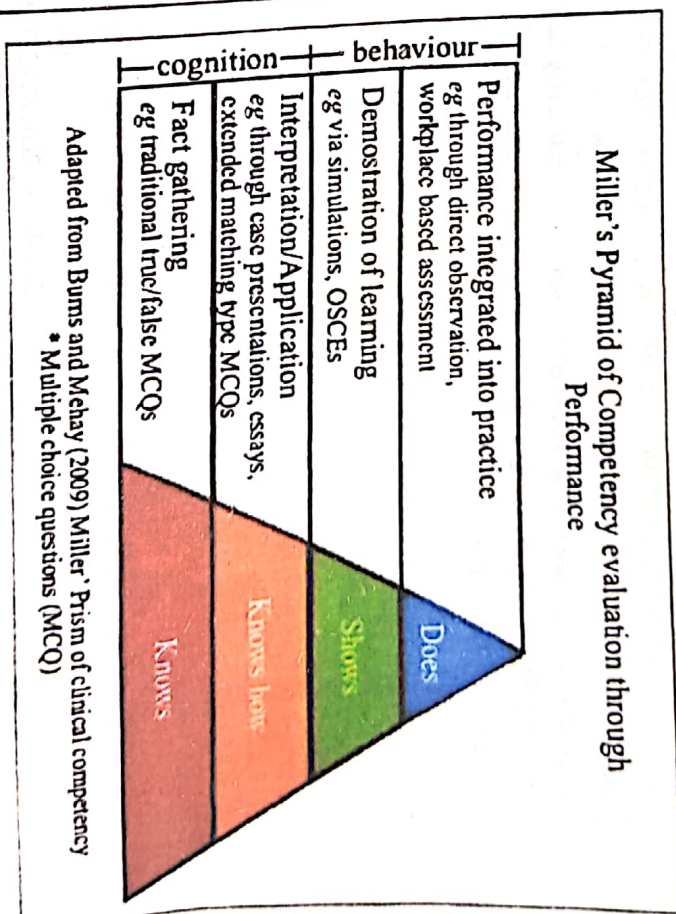

Adapted from Blooms Taxonomy

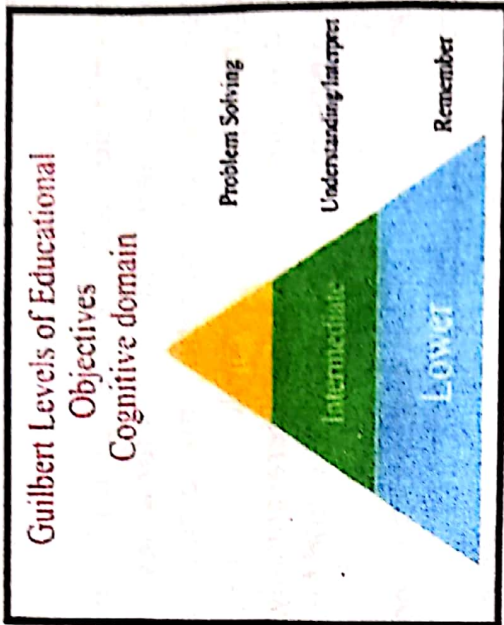

Miller's Pyramid -

Miller's pyramid, developed by George Miller in 1990, is a foundational, four-tiered framework for assessing clinical competence in medical education, mapping a learner's progression from possessing knowledge to independent practice. It structures competence hierarchically, moving from knowing, to knowing how, showing how, and finally, doing. IT consist of 4 levels -

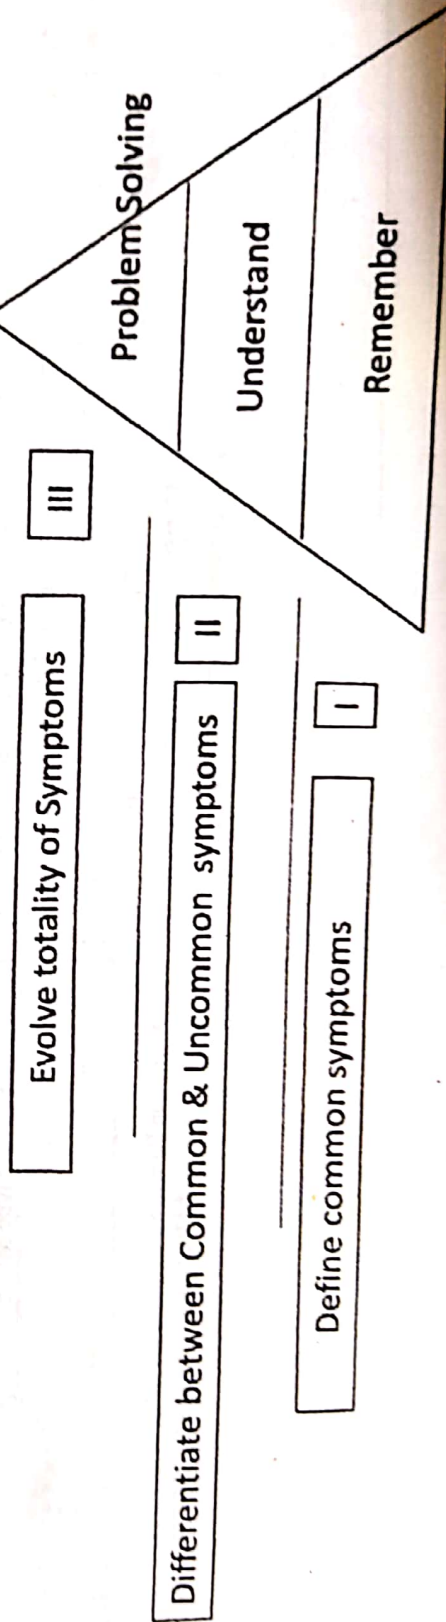

1. **Level I - Knows (Knowledge):** Assesses the knowledge base, typically through written exams or MCQs.
2. **Level II - Knows How (Competence):** Assesses the ability to apply knowledge, often measured through scenarios, data interpretation, and case studies.
3. **Level III - Shows How (Performance):** Assesses the ability to demonstrate skills, usually in simulated, controlled settings like OSCEs (Objective Structured Clinical Examinations).
4. **Level IV - Does (Action):** Assesses the actual, independent practice of skills in real-world clinical settings, monitored through direct observation or workplace-based assessments.

Gilbert's Hierarchy or **Gilbert's Levels of learning** - Gilbert's Hierarchy is a tool that describes the various levels of learning that can be mapped in the 3 domains of learning - cognitive psychomotor & affective. There are also other tools of education that demonstrate the progression of learning such as Bloom's Taxonomy & Miller's Pyramid. All these tools have their strength for discerning the different levels.

Cognitive Domain -

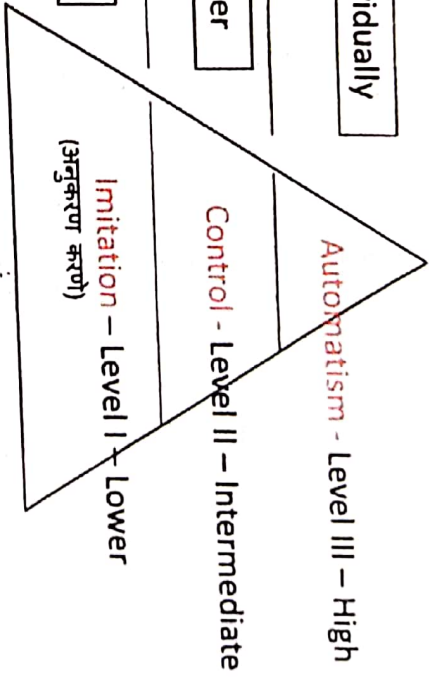

Psychomotor Domain -

To perform auscultation individually

To perform auscultation in presence of teacher

To observe teacher for sequences of auscultation of breath sounds.

Affective Domain -

Recognise the anxiety of a patient before starting history, talking & reassure him/her at outset.

Respond to the anxiety of a patient, reassure him/her at outset

Listen to the patient with empathy during history taking
